

The background of the cover is a black and white photograph of The Citadel building in Charleston, South Carolina. The building is a large, light-colored stone structure with a central clock tower. The tower has a clock face and is topped with battlements. The building has many windows and a large arched entrance at the bottom. A palm tree is visible on the left side of the building.

THE PURPOSE OF MILITARY TRAINING AT THE CITADEL

The Citadel is a liberal arts military college. The college is justly proud of the war records of its sons and will always expect them to respond in national emergencies, but its chief purpose is to prepare men for civil pursuits by giving them a sound education reinforced by the best features of military training.

Military training teaches the value of a methodical and orderly approach to tasks, of physical and mental fitness, and of alertness and self-confidence. It teaches how to command and how to obey, how to organize and coordinate, and how to maintain morale and discipline. Most important of all, it instills the conviction that any sacrifice must be made when principle is involved, and that truth, honor, and integrity are the basis of character.

A civic leader no less than a military commander must be prepared to meet difficult or hazardous situations courageously and effectively, to make decisions and enforce them, to lead when it is his duty to lead, to follow when it is his duty to follow, and to inspire confidence through his resourcefulness, honesty, and courage. Such qualities The Citadel attempts to develop in its cadets.

The training is not given at the expense of academic education. On the contrary, the aim is to make academic training effective through development of soldierly virtues. Graduates in many vocations and in many parts of the world attest the value of the rigorous regimen of the classroom, barracks, and drill field.

Many desirable characteristics do not grow out of scholarship alone. Traditions and codes may more profoundly influence college men than the most scholarly lectures. For this reason, to its academic training, which it assiduously seeks to make vital, The Citadel adds the code of the cadet and gentleman. The visible symbol of this code is the proudly-worn uniform, a constant reminder that alma mater expects of every son the poise and culture of a student, the public spirit and unselfishness of an enlightend citizen, the courage and loyalty of a soldier, and the honor and bearing of a gentleman.

ORGANIZATION

BOARD OF VISITORS

Colonel David E. McCuen, Jr., <i>Chairman</i> , '35	Greenville, S. C. (P. O. Box 636)
Colonel J. R. Westmoreland, <i>Chairman Emeritus</i> , '00	Columbia, S. C. (120 S. Waccamaw St.)
Colonel W. W. Wannamaker, Jr., '19	Orangeburg, S. C. (P. O. Box 542)
Colonel J. M. Holliday, '36	Galivants Ferry, S. C.
Colonel Eugene C. Figg, '28	Charleston, S. C. (24 Savage St.)
Colonel Thomas C. Vandiver, '29	Greenville, S. C. (P. O. Box 456)
Colonel Clarence C. Brown, Jr., '48	Spartanburg, S. C. (P. O. Box 649)
Colonel Charles A. Laffitte, '29	Allendale, S. C.
Colonel C. F. Myers, Jr., '14	Charleston, S. C. (355 St. Margaret St.)
Colonel Henry Deas, Jr., '38	Charleston, S. C. (70 Murray Blvd.)

Ex Officio

His Excellency Ernest F. Hollings, '42, <i>Governor</i>	Columbia, S. C.

Mrs. J. H. Williams	<i>Administrative Assistant</i>
Mrs. A. E. Dufour	<i>Hostess</i>
Miss B. F. Moloney, RN	<i>Head Nurse</i>
The Reverend F. J. Hopwood	<i>Catholic Chaplain</i>

FACULTY

General Mark Wayne Clark, U.S.A., Retired

B.S., U. S. Military Academy; Dr. Pol. Science, Universities of Naples and Vienna; D. C. L. Oxford; D. Sc., University of Florence; LL. D., Oberlin College, Pennsylvania Military College; Universities of Southern California, San Francisco, South Carolina, Akron, and Loyola; Litt. D., Clemson College.

President

Major General George Honnen, U.S.A., Retired

B.S., United States Military Academy

Administrative Dean

Colonel Ralph Milledge Byrd

B.S., The Citadel; M.S., Ph.D., University of North Carolina

Academic Dean

Colonel James William Duckett

B.S., The Citadel; M.S., University of Georgia;

Ph.D., University of North Carolina

Dean of Admissions

Colonel Robert Waller Achurch

A.B., College of Charleston; M.A., Ph.D., University of North Carolina

Professor and Head, Department of English

Major Robert Spencer Adden

B.S., The Citadel; M.B.A., University of Pennsylvania;

Ph.D., University of North Carolina

Associate Professor of Business Administration

Colonel Forrest Jack Agee, U.S.A., Retired

A.B., Howard Payne; M.Ed., Texas University; Ph.D., Yale University

Associate Professor of Education

First Lieutenant Harold Brice Alexander

B.A., The Citadel; M.A., Duke University

Assistant Professor of English

Major Norman Albert Allen, Jr.

B.S., College of William and Mary; M.S., University of Delaware

Assistant Professor of Physics

Colonel Wallace Ervin Anderson

B.S., The Citadel; M.S., University of Kentucky;

Ph.D., University of Michigan

Professor and Head, Department of Physics

- Lieutenant Colonel Charles Leroy Anger
B.S., M.S., Ph.D., University of Virginia
Professor and Head, Department of History
- Captain Jep Harmon Bailey
B.S., The Citadel; M.A., Duke University
Assistant Professor of Physics
- Captain Alva Ray Ballentine
B.S., M.S., Ph.D., University of South Carolina
Associate Professor of Chemistry
- Captain Albert R. Blair
B.S., Texas Agricultural and Mechanical College
Assistant Professor of Air Science
- Lieutenant Colonel James Douglas Blanding
B.A., The Citadel; M.A., Ed.D., George Peabody College for Teachers
Professor and Head, Department of Education
- Major Ernest Irvin Blevins
A.B., John Fletcher College; B.D., Drew Theological Seminary;
M.A., New York University
Assistant Professor of Modern Languages
- Lieutenant Colonel George Semmens Boase
B.S., M.S., Purdue University
Assistant Professor of Chemistry
- Captain William Manor Bostwick
Instructor in Physical Education
- Major Robert Franklin Brand
A.B., M.A., Ph.D., Cornell University
Associate Professor of Modern Languages
- Second Lieutenant Paul Martin Brandenburg
B.S., North Carolina State College
Instructor in Physical Education
- Major Chaford Acquilla Brown
B.S., M.A., University of South Carolina
Assistant Professor of Mathematics
- First Lieutenant Robert Samuel Brown
B.A., M.A., University of Alabama
Assistant Professor of Modern Languages
- Captain Floyd W. Brown, Jr.
B.S., The Citadel
Assistant Professor of Air Science

Captain James Albert Browning

B.S., M.S., University of Georgia
Assistant Professor of Chemistry

Major Donald Cleveland Bunch

B.S., The Citadel; M.S., in I.M., Georgia Institute of Technology
Assistant Professor of Business Administration

Second Lieutenant Joseph Brunet, Jr.

B.S., M.S., University of Florida
Assistant Professor of Physics

Major James Berry Carpenter, Jr.

A.B., Southwestern College; M.A., Vanderbilt University
Assistant Professor of English

Captain Malcolm Lander Causey, Jr.

B.S. in C.E., The Citadel; M.S., Harvard University;
P.E. (South Carolina)
Associate Professor of Civil Engineering

Lieutenant Colonel Carter W. Clarke, Jr.

B.S., United States Military Academy
Associate Professor of Military Science

*First Lieutenant Luther Louis Clauss, Jr.

B.S., The Citadel; M.S., University of West Virginia
Assistant Professor of Physics

Colonel James Karl Coleman

B.S., The Citadel; M. A., George Washington University;
Ph.D., Columbia University
Professor and Head, Department of Political Science

Captain Keith Lynn Comstock

B.S., United States Military Academy
Assistant Professor of Military Science

Colonel Ira Whitehead Cory, U.S.A., Retired

B.S., United States Military Academy; M.A., University of
Pennsylvania
Associate Professor of Electrical Engineering

*Lieutenant John Stanford Coussons, USNR

B.A., Louisiana College; M.A., Louisiana State University
Assistant Professor of History

* On leave of absence.

Colonel Henry L. Crouch, Jr.

B.S., United States Military Academy

Commandant of Cadets and

Professor and Head, Department of Air Science

Captain William E. Crosland

B.S., The Citadel

Assistant Professor of Military Science

First Lieutenant George Leon Crumley

B.S., M.S., Kansas State Teachers College

Assistant Professor of Mathematics

Lieutenant Colonel Thomas Finley Debnam

B.S., M.S., University of Virginia

Associate Professor of Business Administration

Major Joseph William Dellastatious

B.S., M.S., University of Missouri

Professor and Head, Department of Physical Education

Lieutenant Colonel John Robert Doyle, Jr.

A.B., Randolph-Macon College; M.A., University of Virginia;

M.A., Bread Loaf School of English

Associate Professor of English

*Lieutenant Colonel Francis Marion Durham

A.B., University of South Carolina; M.A., University of North

Carolina; Ph.D., Columbia University

Professor of English

Second Lieutenant Robert Braden Dunmire

B.S., Thiel College; M.S., Florida State University

Assistant Professor of Chemistry

Major Charles Eugene Durkee

A.B., Defiance College; M.Ed., University of Pittsburgh

Assistant Professor of Chemistry

Colonel Leaman Andrew Dye

A.B., M.A., University of Rochester; Ph.D., Cornell University

Professor and Head, Department of Mathematics

First Lieutenant Donald Fairchild

B.S., Hope College; M.A., Vanderbilt University

Assistant Professor of Political Science

First Lieutenant Frank Lynn Feigl

B.S., Indiana University; M.A., Ball State Teachers College

Assistant Professor of Physical Education

* On leave of absence.

Colonel Girdler Brent Fitch

A.B., Transylvania College; M.A., University of Chicago;
Ph.D., Ohio State University

Professor and Head, Department of Modern Languages

***First Lieutenant Elbert Conner Flowers, Jr.**

B.A., M.A., Vanderbilt University

Assistant Professor of Political Science

Major Leonard Henry Fortunato

B.S., Duquesne University; M.Litt., University of Pittsburgh

Assistant Professor of History

Major William F. Goeken

B.S., University of Maryland

Assistant Professor of Air Science

Colonel Morgan Goodhart, USAF, Retired

A.B., M.A., University of Georgia; Ph.D., University of Vienna

Assistant Professor of History

First Lieutenant Demetrius Wilbur Griswold

E.E., Cornell University

Assistant Professor of Electrical Engineering

Captain John H. Guiton

B.S., Davidson College; M.A., University of North Carolina

Assistant Professor of Physical Education

First Lieutenant Jack Richard Hall

B.S., Newberry College; M.A., University of Georgia

Assistant Professor of Physical Education

Colonel Alvin Walter Hanson

A.B., Buena Vista College; M.S., Ph.D., University of Iowa

Professor of Physics

Colonel James Geraty Harrison

B.S., The Citadel; B.Litt., Columbia University; M.A., University of Michigan; Ph.D., University of North Carolina

Professor of English

Lieutenant James Albert Harvey, USNR

B.S., M.A., University of South Carolina

Assistant Professor of English

Lieutenant John Albert Harvey

B.A., M.A., University of South Carolina

Assistant Professor of English

* On leave of absence.

Lieutenant Colonel Melvin Charles Helfers, USA, Retired

B.A., The Citadel; M.S., Duke University

Assistant Professor of Modern Languages

Major Oliver Henderson, Jr., USAFR

B.S., Adelbert College, Western Reserve University

M.A., Western Reserve University

Assistant Professor of Biology and Chemistry

Major Oren Leonidas Herring, Jr.

B.S., The Citadel; M.E.E., University of Michigan

Professor and Acting Head, Department of Electrical Engineering

Captain Donald Constantine Hilbert

B.S., United States Military Academy

Assistant Professor of Military Science

First Lieutenant Jesse Lee Hill

B.A., Furman University; M.Ed., University of South Carolina

Assistant Professor of Mathematics

Lieutenant Colonel Loring Kenneth Himelright

B.S. in C.E., Duke University; M.S. in C.E., Harvard University

P.E. (South Carolina)

Professor and Head, Department of Civil Engineering

Lieutenant Colonel Wiley Edward Hodges

B.S., Roanoke College; M.A., Ph.D., Duke University

Professor of Political Science

First Lieutenant Woodrow Lee Holbein

B.A., Baldwin Wallace College; M.A., Western Reserve University

Assistant Professor of English

Captain Stacy Lloyd Hull

B.A., M.S., State University of Iowa

Assistant Professor of Mathematics

Captain William Strong Hummers, Jr.

B.S., Washington & Lee University; Ph.D., University of North Carolina

Associate Professor of Chemistry

Lieutenant Colonel Lee Pressley Hutchison

B.S., Grove City College; M.A., Ph.D., University of Kentucky

Professor of Mathematics

Major Gus Jacob Hutto

B.S., C.E., The Citadel; P.E. (South Carolina)

Associate Professor of Civil Engineering

Major Marvin Leslie Infinger

A.B., Wofford College; B.D., Garrett Biblical Institute;
M.A., Northwestern University
Assistant Professor of Business Administration

Second Lieutenant Jackson Reid Ingraham

A.B., Atlantic Christian College; M.A., East Carolina College
Assistant Professor of Mathematics

Colonel Lionel Rowen Ingram, USA, Retired

B.S. in C. E., The Citadel; P.E. (South Carolina and Georgia)

ASSOCIATION OF CITADEL MEN

OFFICERS

President: Robert A. Daniel, '50, 115 Chadwick Drive., S. Windemere, Charleston, S. C.

Vice-Pres: E. A. Pollock, '21, General, USMC, Ret., P.O. Box 861, Beaufort, S. C.

Sec.-Treas: Hugo A. Pearce, Jr., '43, The Citadel, Charleston, S. C.

ALUMNI MEMBERS, BOARD OF VISITORS:

Henry Deas, '38, 70 Murray Blvd., Charleston, S. C. - Term expires June 30, 1965.

C. Frank Myers, '14, 265 St. Margaret St., Charleston, S. C. - Term Jun 30, 1963.

ALUMNI MEMBERS, ATHLETIC ADVISORY COMMITTEE:

Robert B. Scarborough, '50, Box 855, Charleston, S. C. - Term expires May 31, 1962.

Luther M. McBee, Jr., '37, 203 Augusta St., Easley, S. C. - Term expires May 31, 1963.

Peter P. Leventis, Jr., '41, 3901, McGregor Drive, Columbia, S. C. Term expires May 31, 1964.

DIRECTORS

District No. 1 (Counties of Beaufort, Berkeley, Charleston, Colleton, Dorchester) - Robert L. Clement, Jr., '48, 83 South Battery, Charleston, S. C.

District No. 2 (Counties of Allendale, Bamberg, Barnwell, Calhoun, Hampton, Jasper, Orangeburg) - James P. Jervey, '36, 850 Edisto Ave., Orangeburg, S. C.

District No. 3 (Counties of Clarendon, Kershaw, Lancaster, Lee, Sumter, Williamsburg) - Wortham W. Dibble, '36, Box 1244, Sumter, S. C.

District No. 4 (Counties of Chesterfield, Darlington, Florence, Marlboro) - Ryan E. Tomlinson, '42, Lake City, S. C.

District No. 5 (Counties of Chester, Fairfield, Lexington, Newberry, Richland) - Robert C. Seabrook, '41, P. O. Box 627, Columbia, S. C.

District No. 6 (Counties of Aiken, Edgefield, Greenwood, McCormick, Saluda) - John Douglas Harrison, '39, 218 N. Main St., Greenwood, S. C.

District No. 7 (Counties of Abbeville, Anderson, Oconee) - Wade H. Sherard, Jr., '34, 1601 College Ave., Anderson, S. C.

District No. 8 (Counties of Laurens, Greenville, Pickens) - J. Milton Smeak, '50, RFD No. 2, Butler Springs Road, Greenville, S. C.

- District No. 9 (Counties of Cherokee, Spartanburg, Union, York) - William K. (Toby) Holt, '39, P. O. Box 120, Spartanburg, S. C.
- District No. 10 (Counties of Dillon, Georgetown, Horry, Marion) - Harry E., Clay, '35, 807 E. Main St., Dillon, S. C.
- District No. 11 (Western North Carolina) - Norman H. Nuttall, '38, 4224 Columbine Circle, Charlotte 7, N. C.
- District No. 12 (Middle North Carolina) - Richard L. Bagnal, '40, 921 Avon Road, Winston-Salem, N. C.
- District No. 13 (Eastern North Carolina) - Carl M. Allen, Jr., '40, P. O. Box 1450, Wilmington, N. C.
- District No. 14 (State of Georgia) - G. Rushton Bailie, '51, 716 Broad St., Augusta, Ga.
- District No. 15 (State of Florida) - Ernest J. Hewett, '42, 1830 W. 24th St., Sunset Island No. 3, Miami Beach, Fla.
- District No. 16 (Armed Forces) - Lieutenant Colonel A. Preston Price, '43, The Citadel.
- District No. 17 (States of Maryland, Virginia, W. Virginia) - Thomas L. Taylor, '25, 1509 LaBelle Ave., Ruxton 4, Md.
- District No. 18 (States of Alabama, Tennessee, Mississippi) - E. Bush Peebles, '39, 102 Hillwood Park, Mobile, Ala.
- District No. 19 (States of Illinois, Indiana, Kentucky, Ohio, Michigan, Wisconsin) - William D. Wysockey, '51, 2716 Broadway Ave., Evanston, Ill.
- District No. 20 (District of Columbia) - William W. Beckett, '48, 3481 S. Wakefield St., Arlington 6, Va.
- District No. 21 (States of Delaware, New Jersey, New York, New England, Pennsylvania)
- District No. 22 (States West of the Mississippi except Pacific Coast States) - M. Lartigue Moore, Jr., '29, P. O. Box 2846, Lafayette, La.
- District No. 23 (States of Washington, Oregon, and California) - Claudius A. DesChamps, '27, 3333 California Street, San Francisco, Calif.
- District No. 24 (Puerto Rico) - Jose' B. Davilo, '46, M. D., 779 Ceres St., Dos Pinos, Rio Piedras, P. R.

CLUB PRESIDENTS

Anderson Citadel Club — H. (Hamp) G. Anderson, Jr., '54, 708 E. River St., Anderson, S. C.

Atlanta Area Citadel Club — Roger A. Shelor, '57, 1917 Bandera Dr., Decatur, Ga.

CLUB PRESIDENTS (Cont'd.)

Beaufort Citadel Club — Gen. E. A. Pollock, '21, USMC (Ret'd.), P. O. Box 861, Beaufort, S. C.

Birmingham & N. Ala. Citadel Club — Raymond Astumian, '42, Comptroller, Hq. IV, US Army Corps (Res), Calder Bldg., Birmingham 3, Ala.

Cape Fear Valley Citadel Club — Joseph T. Maloney, Jr., '51, 701 Glenville Ave., Fayetteville, N. C.

Charleston Citadel Club — William O. McCue, '52, 1728 N. Somerset Cir., Northbridge Terrace, Charleston, S. C.

Charlotte Citadel Club — B. K. Thornley, '35, 3411 Seward Place, Charlotte 7, N. C.

Chicago Citadel Club — Wm. D. Wysockey, '51, 2716 Broadway, Evanston, Ill.

Chosun (Korean) Citadel Club — Major James B. Vaught, 1946, GI Sec. Hqtrs. EUSA, APO 301, San Francisco, Calif.

Dillon-Marion Citadel Club — William H. Stewart, '33, Nichols, S. C.

El Paso Citadel Club — Edward W. Breese, '30, 528 E. Yandell, El Paso, Texas

The Citadel Club of Fla. West Coast — R. H. Mobley, '44, 2405 S. Clark Ave., Tampa 9, Fla.

Ft. Benning-Columbus, Ga. Citadel Club — Captain Joseph E. Greene, '49, 129-B Arrowhead Rd., Ft. Benning, Ga.

Ft. Sill, Okla. Citadel Club — Capt. Harvey M. Dick, '53, 3821 Dearborn St., Lawton, Okla.

Greater Cleveland & Ohio Citadel Club — Russell W. McDonald, '46, 34800 Dogwood Lane, Chagrin Falls, Ohio

Greenville Citadel Club — J. Milton Smeak, '50, RFD No. 2, Butler Springs Rd., Greenville, S. C.

Greenwood Citadel Club — Thomas R. Pinson, '31, 227 East Ave., Greenwood, S. C.

Jacksonville-Northeast Fla. Citadel Club — H. L. Williams, Jr., '53, 8157 Cesperdes Ave., Jacksonville 7, Fla.

New Orleans Citadel Club — Wm. J. McComb, '31, 2525 Brodaway, New Orleans 25, La.

CLUB PRESIDENTS (Cont'd.)

Michigan Citadel Club — John E. Damon, '43, 637 Michigan Trust Bldg., Grand Rapids 2, Mich.

Pee Dee Citadel Club — Phil Southerland, '49, 1013 Jackson Ave., Florence, S. C.

Puerto Rican Citadel Club — Jose E. Mendendez, '52, San Rafael 271, Stop 25, Santurce, P. R.

Richland Co. Citadel Club — Walter F. Going, Jr., '41, 4136 Linwood Rd., Columbia, S. C.

Richmond, Va. Citadel Club — Augustus Hydrick, '42, 1805 Vincennes Rd., Richmond 26, Va.

Savannah Citadel Club — Alton H. Whittier, '51, 30 Pine Valley Rd., Savannah, Ga.

Spartanburg Citadel Club — Sam M. Collins, '46, 702 Penarth Road, Spartanburg, S. C.

Sumter Citadel Club — Fulton B. Creech, Jr., '50, 121 N. Purdy St., Sumter, S. C.

HISTORY OF THE CITADEL

The Old Location and the New

The history of The Citadel may be divided into two parts. In the first, extending from December 20, 1842, when the legislature of South Carolina passed an act providing for the establishment of the college, to September, 1922, the institution was located on Marion Square. This is an open space of about ten acres in what has long been the middle of the historic city of Charleston, South Carolina. In the second, extending from 1922 to the present, The Citadel has been situated some three miles northwest of its former location on a campus of about ninety acres between Hampton Park and the Ashley River.

The Origin of the Name

The Citadel derived its name from the building in which it was first housed. Erected with state funds as an arsenal some years after the frustration of the Denmark Vesey slave uprising of 1822, this sturdy old fortress, which still dominates Marion Square, was called The Citadel. It was garrisoned first by Federal, then by state troops until these last were replaced in March, 1843, by the twenty students who made up the first Corps of Cadets. Living under regulations much like those of West Point, these cadets served as a guard for the state's arms at the same time as they pursued a course of study designed to make them useful citizens in time of peace as well as war.

With its sister school, The Arsenal, established at the same time in Columbia, the state capital, The Citadel was a part of what came to be known as the South Carolina Military Academy. From 1845 to 1865 cadets of the Academy spent their freshman year at The Arsenal and their three upper-class years at The Citadel.

The first period of the college's existence on Marion Square lasted until 1865. During this period an east and a west wing were added to the original building, high standards of intellectual accomplishments and military discipline were maintained, and enrollment was built up to 145 cadets on January 1, 1864.

The Citadel in the Civil War

The founders—men like Governors Richardson and Hammond and General D. F. Jamison, who was later to preside over the convention at which the South Carolina Ordinance of Secession was signed—had foreseen that the state might soon need men with military training. When the trouble long brewing between the North and the South erupted in war, the record of Citadel alumni and cadets vindicated the foresight of the founders. Of the 224 alumni living at the time of the Civil War, 193 wore the Confederate grey, all but twenty as commissioned officers and four as generals. Thirty-nine were killed in battle, and four died in the service. On January 9, 1861—before the firing on Fort Sumter—cadets of the Corps manned the guns which drove back from the entrance of Charleston harbor the *Star of the West*,

a steamer sent by the Federal government to the relief of the fort. Made a part of the military organization of the state by a legislative act of January 28, 1861, the Corps of Cadets helped emplace and guard artillery on James Island, did guard duty in Charleston, and on December 6-9, 1864, near the war's end, suffered several casualties in an engagement with Union troops at Tulifinny Creek near Yemassee station, while helping to defend the Charleston and Savannah Railroad.

Very shortly afterwards came years of eclipse for The Citadel. From February 18, 1865, when a Union force marched into Charleston, until April, 1879, the buildings on Marion Square were occupied by Federal troops, and the operation of the college was necessarily suspended.

The Reopening after the Civil War

The second period of The Citadel's existence on Marion Square began on October 2, 1882, with an enrollment of 185 cadets. Though the Corps no longer served as an arsenal guard, the military system of the ante-bellum years was in all other respects continued. The reopening of the college was the culmination of efforts begun by alumni in April, 1877. At their request Governor Hampton appointed a Board of Visitors in 1878, and in January, 1882, the state legislature passed a bill providing for the re-establishment of the college and appropriating money for the repair of its buildings and for its maintenance. The Arsenal in Columbia, its buildings having been burned during the Civil War, was never reopened.

In the forty years that passed before The Citadel moved to its present site, the physical plant was still further enlarged, part of the cost being defrayed with money collected in 1888 from the Federal government for rent and for damages sustained during the years the buildings were occupied by Federal troops. The enrollment was increased, and the curriculum was made somewhat more flexible. In 1910 the name of the college was changed to The Citadel, The Military College of South Carolina. This change was made to keep people from regarding the institution as a preparatory school, something it was not and had never been.

In 1918, during the administration of Mayor T. T. Hyde, the city council of Charleston offered the state the present site of the college—a tract of about eighty acres of high land and a hundred acres of salt marsh. Early in 1919 the state legislature accepted the offer and appropriated money for the erection of the first buildings.

The Greater Citadel

In the fall of 1922, the college began operating at its new location. There were then only a few buildings on the campus. In the forty years that have since elapsed many have been added to those originally constructed. (See Grounds and Buildings, page 31, for a complete description of the present campus.)

Changes in the curriculum and in the nature of the student body

have paralleled those in the physical plant. In the first place, the elective system has been considerably expanded. In the last year at the old location it was possible for a student to major in any one of three fields during his junior and senior years: chemistry, civil engineering, and physics. In his senior year the student was then able to major in one of two others: biology-chemistry and English. Now students may choose among the following, all of which offer major work for at least the junior and senior years: business administration, chemistry, civil engineering, electrical engineering, English, history, mathematics, modern languages, physical education, physics, and political science. In addition, premedical and pre dental courses are now available as are courses in Greek, Latin, education, psychology, sociology, and the appreciation of art and music.

Changes In The Student Body

In the nature of the student body there have been significant changes. One is that it has grown much larger. In 1921-1922 there were fewer than 300 cadets in the Corps; in 1947-48, when the student body was the largest the college ever had, there were 2,271 students enrolled including cadets and veterans. With the passing of Public Law No. 346, popularly known as the G. I. Bill of Rights, nearly 3500 veterans of the Second World War and the Korean Conflict, most of whom were civilian students, have attended the college. The program for veterans ended with the opening of college in September, 1960. All students are now members of the Corps of Cadets. Since June 20, 1950, women have been admitted as students, although only to summer sessions.

The growth of the Corps is further reflected in the fact that, while there were 700 Citadel graduates and ex-cadets in the armed forces in World War I, there were about 6000 alumni and ex-cadets on active service in World War II. Of these, 280 died for their country. Some 1500 were on active duty during the Korean conflict, 450 of whom were in combat and 26 of whom gave their lives. Virtually all graduates on active duty have been commissioned officers.

Memorials to the Makers

Persons prominent in the history of The Citadel are memorialized in campus structures. For example, the mess hall is named for Colonel Asbury Coward, superintendent from 1890 to 1908; the largest barracks, for Colonel James Padgett, member of the Board of Visitors for many years, and J. P. Thomas, its longtime chairman; the stadium, for General Johnson Hagood, chairman of the Board at the time the college was re-established after the Civil War; another barracks, for Mr. Andrew B. Murray, philanthropist whose generosity made possible the construction of that building and several others; LeTellier Hall, for Colonel L. S. LeTellier, for many years head of the Department of Civil Engineering and later acting president of the college; the largest academic building, for Colonel O. J. Bond, president from 1908 to

1931; the chapel, for General Charles P. Summerall, former Chief of Staff of the United States Army, president from 1931 to 1953; and the new activities building for General Mark Wayne Clark, currently president of The Citadel.

Good Signs for the Future

Since that date most significant events in the history of The Citadel have been three of the most generous gifts ever made to the college and the inauguration of another distinguished soldier to succeed General Summerall as President.

The first gift, public announcement of which was made on August 31, 1953, was the bequest by Mr. Joseph D. Aiken, of Charleston, South Carolina, of \$750,000. The other two gifts, both made by United States Senator Charles E. Daniel, of Greenville, South Carolina, and his brother, Mr. R. Hugh Daniel, of Birmingham, Alabama, were the Thomas Dry Howie Memorial Carillon and the sum of \$50,000 for scholarships. The scholarship gift was announced on October 9, 1954. On December 5, 1954, was held the ceremony dedicating the Carillon to the memory of Major Howie, of the class of 1929, who died heroically in the fighting at St. Lo, France, on July 17, 1944. (See Grounds and Buildings, page 31 for description of the Carillon.)

General Clark, who commanded the U.S. Fifth Army in Italy and the United Nations forces in Korea, has been president of The Citadel since March 19, 1954.

Under his leadership the enrollment has steadily increased until the maximum barracks capacity of 2,000 cadets was reached in 1957. Since then the Corps of Cadets enrollment has remained at 2,000. Admission requirements and academic standards have continually improved under a program of selectivity.

GROUPS AND BUILDINGS

Location

The Citadel is located on a one hundred acre campus in the north-western part of the city of Charleston. The view to the west and south across the Ashley River, which skirts the campus, is typical of the Carolina low country scenery. From the east, the campus is entered through Hampton Park, a show place of flowers, trees, terraces, and sunken gardens. From the north and south, the entrances are through residential areas of the city.

Buildings

The buildings, both in design and location, follow the carefully prepared plan made by a firm of distinguished architects. Architecturally, the buildings follow the Spanish-Moorish style of the original campus in the heart of the city. All structures, such as barracks, academic and administrative buildings, chapel, armory, student activities building, and library-museum border the large parade ground, which forms the center of the campus.

Bond Hall

Bond Hall, the main building on the campus, contains in the center part the administrative offices of the college, and the offices of the Association of Citadel Men. In the large wings are academic departments, laboratories, and classrooms of Chemistry, Physics, Electrical Engineering, Business Administration, and Military Science.

Arts Building

The Arts Building is a classroom building housing the Departments of English, Mathematics, Modern Languages, Education, History and Political Science.

LeTellier Hall

LeTellier Hall contains the Department of Civil Engineering, with its library, classrooms, and laboratories.

The Armory

The Armory with its annexes is used for indoor drills, athletic contests, dances, and other activities and functions at which large crowds are assembled. The main area has a floor surface of three thousand square feet, supported independently from the rest of the building, and a ceiling clearance of sixty-five feet. The steel balconies of this area will seat approximately two thousand four hundred spectators.

An annex at the rear of the armory contains the swimming pool, with pressure filters, sterilizing and heating apparatus to assure cleanliness and to provide year-round use.

The Chapel and Carillon

The General Charles Pelot Summerall Chapel, on the east side of the campus, faces the row of barracks which forms the western boundary

of the parade ground. The cathedral-like proportions of the Chapel with its fine pipe organ and splendid memorial windows of stained glass create an atmosphere of religious piety befitting its purpose.

To the north of the Chapel is the Major Tom Howie Carillon, a gift of two Citadel Alumni, Senator Charles E. Daniel and his brother Mr. R. Hugh Daniel, in memory of the famous "Major of St. Lo," a classmate of the donors.

Barracks

The four dormitories, or barracks, of brick and concrete construction, are rectangular with paved interior courts enclosed by galleries. Each room accommodates two cadets and is equipped with hot and cold water.

Coward Hall

Conveniently located behind the barracks is the cadet dining hall, with a seating capacity of two thousand. Constructed of concrete and tile, this building is fully equipped with the modern facilities for storing, preparing, and serving food in the most approved manner. Dining-room floors are terrazzo, kitchen and other floors of quarry tile, and all wainscots of glazed brick, so that cleanliness and sanitation are easily maintained. During the summer of 1958, completely new and up-to-date equipment was installed in the Kitchen, and in 1961 the three dining rooms and the steward's offices were airconditioned.

The Mary Bennett Murray Hospital

The college infirmary conforms with the most modern standards of equipment and personnel. The college surgeon is aided by a head nurse and her assistant.

Alumni Hall

This building is used for sports, and recreational activities. On the ground floor are athletic lockers, showers and equipment rooms.

Physical Education Building

This building contains the Physical Education offices and classrooms as well as a drafting room and two classrooms of the Civil Engineering Department. It also has athletic dressing and shower rooms and facilities for housing visiting varsity teams.

Mark Clark Hall

This million dollar student activities building, dedicated in May 1957, has on the first floor a large central lobby, on one side of which is a well appointed reception room and on the other side and rear, a post office, canteen, barber shop, billiard room, and bowling room of six alleys. On the second floor an auditorium with a seating capacity of one thousand can also be used for dances and other large gatherings. The cadet store, television room, and game rooms, a large club room with kitchen facilities, and the offices of the Director of Cadet Affairs are also located on the second floor. On the third floor are a court room for the Cadet Honor Committee, three conference

rooms, a dark room for camera enthusiasts, and editorial rooms for campus publications. Apartments for distinguished guests of The Citadel are on this floor.

Memorial Library

The Citadel Memorial Library was dedicated on June 2, 1960, to the memory of The Citadel men of all wars who gave their lives for their country. This building, combining as it does the best features of modern library planning with an aesthetic appreciation of beauty, provides an excellent location for the student not only to study those books for his classroom work, but also to familiarize himself with the literature which will give him an appreciation of reading as a part of his cultural heritage.

The beauty of the building is enhanced by a mural program which depicts outstanding events in the history of The Citadel and its contribution to the life of our state and our nation. When completed, eight events will be portrayed. At present, five are in place and the others are planned over the next three years. Another beauty spot of the Library is the Rare Book Room which combines the elegance and beauty of the interior with the practical planning of the architect to provide a safe housing for our valuable items in a place of beauty.

Books must be an integral part of any educational process and, with this in mind, the main collection of over 80,000 books, bound periodicals, documents and pamphlets is easily accessible to all students in our open-stack arrangement. These, combined with the books found in the Reference Room of the library, provide an excellent basis upon which the student may base his education. Each year more than 4,000 volumes are added to this already excellent collection.

In addition, the library subscribes to more than 400 current periodicals and to newspapers from the principal cities of South Carolina and the nation. Most of this valuable research material is preserved for

future use by either microfilming or binding. The library has the latest equipment for the reading of all types of microprint publications.

In addition to the books in the main collection of the library there are also collections of technical books in the departmental libraries for the Chemistry and Civil Engineering Departments. All books on the campus are catalogued and included in the catalogue of the main library.

The new building will seat 450 students exclusive of the lounge area seating. In addition, provision has been made for seminar and conference rooms for both faculty and cadets. Built to shelve 250,000 volumes, this library will be adequate for many years and will provide space for an excellent college collection.

Museum

The Citadel Memorial Military Museum, occupying the third floor of the new Library-Museum building, provides a setting in which objects and articles related to the school's proud history can be preserved and displayed. The museum also provides a program of changing exhibits to supplement and support the academic program.

Included in the long-range museum program are plans for a well-rounded collection which will feature complete series of Citadel uniforms from the time of the school's founding to the present, a representative collection of American military uniforms, including those of the Southern Confederacy, a representative collection of American military weapons, and a collection of pictures and documents recording every aspect of Citadel history. Success of the museum program depends to a great extent upon the support of alumni and friends of The Citadel.

The museum is still in its infancy. Begun in 1956 as a cadet activity, it has achieved its present status as a result of continuing efforts by cadet volunteers and the enthusiastic support of The Citadel President, General Mark W. Clark. The Museum's small collection, in storage since 1958, has been moved to the new building where it will provide the nucleus of a comprehensive collection of The Citadel and military material.

Much of the responsibility for the operation of the Museum rests with members of the Cadet Museum Committee who assist, under the supervision of the Museum Director, in such important operations as cataloguing the collection, historical research, exhibit construction, and cleaning and preservation of articles in the collection.

As its collection grows and its permanent exhibits are constructed, the Museum will play an increasingly important role as guardian of The Citadel's proud heritage.

Utilities

The steam plant, laundry, machine shop, carpenter shop, paint shop, electric shop, warehouses, grounds shop, vehicle repair shop, and utility

yard are inconspicuously grouped in the northwest corner of the campus. The tailor shop and the print shop are located in back of Barracks No. 2.

Boating Facilities

Located on the northeast bank of the Ashley River, The Citadel has taken advantage of the splendid opportunities offered by the Charleston harbor and the local rivers for an almost year-round program of boating activities and water sports. The Citadel Yacht Basin has piers, slips, and a floating dock for mooring boats, and power equipment for lowering and raising small craft into and out of the basin. A marine railway, hoist, boat shed, and locker and tool room provide ample facilities for the care and maintenance of boats owned by cadets and those provided by the college, which include a forty-five foot power cruiser, a fleet of Lightning Class sailboats, outboards, and other type craft. All boating activities are under the auspices of the Yacht Club and are supervised by an experienced director.

Educational Standing

The Citadel is a fully accredited senior college. It is a member of the Southern Association of Colleges and Secondary Schools and is on the approved list of the Association of American Universities.

The Civil Engineering Department is accredited by the Engineers' Council for Professional Development. The Department of Chemistry is accredited by the American Chemical Society.

Reserve Officers Training Corps

The Citadel is justly proud of the record of its Reserve Officers Training Corps (ROTC). For more than twenty years, it has had the highest rating by the Department of Defense (prior to 1947, the Department of War.)

The courses of study in ROTC are those prescribed by the Department of Defense.

New students have a choice of Army or Air Force ROTC. AFROTC first classmen (seniors) who are qualified and who elect to receive pilot training after graduation are required to fly in the light aircraft training program at The Citadel and will, upon graduation, serve for a minimum of five years active duty.

Army ROTC graduates receiving reserve commissions serve either two years or six months on active duty in the Army depending on the needs of the service. Selected qualified Army ROTC first classmen (seniors) may participate in the light aircraft pilot training program and will, upon graduation, receive a three-year active duty tour in the Army.

Further counseling is given new cadets in this subject before they make their final choice.

Selective Service

Cadets accepted for formal enrollment in Army or Air Force ROTC are, by special provisions of law, exempted from registering for Selective Service. (Requirements for formal enrollment are listed under Department of Military Science and Department of Air Science.) Those cadets who have already registered with the Selective Service and are formally enrolled in The Citadel ROTC program are exempt from induction by such enrollment, and the Military Science and Air Science Departments will notify draft boards of these exemptions. However, both conditions continue only so long as the cadet is formally enrolled and the Military Science and Air Science Departments are obligated to inform local draft Boards when such status changes.

Cadets of draft age (18 years or above) who fail to qualify for formal enrollment and/or who are removed from formal enrollment, are *responsible for registering* for Selective Service. The Citadel Registrar will send Selective Service Form 109 to such cadet's Selective Service Board informing the Board of the cadet's Student Status.

Marine Corps Program

The Marine Corps offers commissions to a limited number of college

students through the Platoon Leaders' Class and the Officer Candidate Class programs. The general requirements for enrollment in either of these programs are:

Be at least 17 years of age, and not more than 26 years of age upon graduation; be majoring in a field other than premedicine or pre-dentistry; be in sound health; maintain at least a "C" average in college; be a citizen of the United States; and agree to serve on active duty for a minimum of three years. Commissions are offered in both the ground and aviation components.

The Marine Corps Officer Selection Officer makes frequent visits to The Citadel during the school year to interview interested cadets.

U. S. Service Academies

Since The Citadel is not a preparatory school, it has no courses specifically designed to prepare students to enter the national military, naval, and air academies at West Point, Annapolis, and Colorado Springs. The regulations for admission to these institutions provide for the acceptance of work done in certain accredited colleges, of which The Citadel is one, in place of the usual mental examination. Many Citadel cadets have entered West Point and Annapolis by certificate under these regulations.

Religious Influences

The Citadel is non-sectarian, but its high objectives cannot be achieved unless its educational program is founded on a solid religious life. Divorced from the spiritual aspirations of the individual and of the group, education is likely to destroy greater values than it creates. The basic purpose of education is to integrate its curricula with character-building activities and a normal religious life to the end that young people may be not only more efficient but better motivated by a sense of duty and obligation. Thus, in an atmosphere of tolerance and mutual respect, every cadet is encouraged to maintain his ties with the religious group to which such association may be made most fruitful.

It is significant that the college in planning its building program thought of a cadet chapel which in size, dignity, and beauty would be a fitting reminder to all cadets that education must be founded upon spiritual strength. This building, imposing and churchly, always accessible, is dedicated to no denomination or creed, but is a shrine of religion, of patriotism, and of remembrance in which any group of good will and seemly purpose may hold services and feel at home in doing so.

In keeping with the religious emphasis at The Citadel, a full time chaplain is available to all cadets for counseling, guidance, and spiritual advice. Colonel Sidney R. Crumpton, a retired U. S. Army chaplain, assumed his duties on February 1, 1962.

At nine o'clock each Sunday morning a general Protestant Religious service is held in the Summerall Chapel. At 6:30 A.M. each Sunday morning there is a Episcopal Communion service in the Chapel. Low Mass is observed for the Roman Catholic Cadets each Sunday morning at 7:40 A.M. Greek Orthodox, Lutheran and Jewish services are held in Mark Clark Hall each Sunday morning.

Special services are held for Episcopalians on Ash Wednesday and Good Friday, and the special early masses on Holy days of obligation for Roman Catholics. During the Advent season, and shortly before the beginning of the Christmas furlough, a great carol service is held. Annually, parallel religious emphasis week programs are conducted under four auspices—those for Protestant cadets, the Newman Club for Roman Catholics, the Hillel Club for the members of the Jewish faith, and the Greek Club for the Orthodox group. These programs, led by outstanding speakers, are intended to bring into clearer relief a sense of the dignity and manliness of the religious life.

In all of the services thus conducted and in the other influences which the college brings to bear on its cadets the casual and the perfunctory is avoided. Cadets are encouraged to regard contacts with their church as vital to their education and development, and the act of worship as a deeply significant experience that should be accompanied by dignity, reverence, and gratitude. Thus, on Sunday mornings one may view the impressive ceremony of battalions of cadets, each marching from its respective barracks across the drill field and converging on the chapel, and will sense no evidence of mere routine in their attitude. On the contrary, in this reassuring spectacle and in the service that follows, there is a fine manifestation of respect and reverence for this hour as the most significant of the entire week. The college realizes that these services, and the underlying religious life of which they are the outward manifestations, must be more than a mere gesture. Otherwise young men will find, as their intellectual horizons widen and they come into possession of the uncertain techniques of lay learning, that there is a temptation to abandon religious teaching as guide and to substitute "reason" for faith as the ultimate guide. From this peril, education must protect itself by constantly reminding young people that education builds and enriches life not by abandoning religious faith as outmoded, but by accepting it as the source of truth and understanding.

The inscription on the front of the chapel is "Remember now thy Creator in the days of thy youth."

Religious Groups

For Episcopal cadets there is a student parish, "St. Alban's at The Citadel"; for Roman Catholic cadets, "The Citadel Newman Club";

and for each other group an appropriate club. These meet on Monday evenings for instruction by the chaplain or spiritual advisor, and social functions are planned in cooperation with civilian young people's groups of similar churches in Charleston. Denominational chaplains from the major religious faiths in Charleston act as spiritual advisors to the cadets of their groups. At the nine o'clock general service Sunday morning there is a de-emphasis on denominational doctrine; on Monday evenings doctrinal training is paramount, so that cadets may leave The Citadel stronger in their faith than before they entered.

The Citadel Religious Council

All students at matriculation become members of The Citadel Religious Council. The purpose of the Religious Council is to direct the course of religious activities at The Citadel under the President and with the supervision of the College Chaplain. The planning and supervision for all the religious programs of the year come under the direction of this council.

General

The Commandant of Cadets commands the Corps of Cadets and controls the daily routine of duties. He grants leaves and other privileges provided by regulations and is charged with the maintenance of discipline over all students attending The Citadel. The department exercises supervision over barracks, controls the Officer in Charge and the cadet guard and keeps the President of the College informed of matters pertaining to the conduct and discipline of the Corps of Cadets.

The Citadel is a military college, and it is therefore essential that a high standard of discipline be maintained. Through a system of merits and demerits, a record is kept of the conduct of each cadet. This record influences his military standing. Privileges of cadets who fail to respond to ordinary corrective measures are curtailed. Any cadet exceeding the allowed limit of demerits for the year will be dismissed.

By instruction and example cadets are taught to be neat in person and in uniform. Daily inspections of rooms insure cleanliness and good order. Through individual personal contacts and group meetings, cadets are encouraged to uphold the traditions of The Citadel and the standards of honor, integrity, and courtesy which are an outstanding mark of the cadet and gentleman.

System of Management

Leadership, initiative, and character are developed by placing upon cadets the stimulating responsibilities of command within the organization of the Corps of Cadets.

All cadets live in barracks. From reveille to taps, every hour of the cadet's time is accounted for. The regular habits of study and living thus formed, the attention to duty, obedience to authority, and love for order inculcated are considered among the most valuable features of the military education. While some of the graduates enter the military profession, hundreds in all walks of civil life attest to the high value of the training received at the institution.

The daily routine is regulated by the *Cadet Regulations*, generally known as the "Blue Book."

The Fourth-Class System

The purpose of the fourth-class system at The Citadel is to provide a foundation upon which a fourth classman may develop those qualities essential to a good leader. It is predicated upon the principle that no one is able to lead who has not learned to follow.

Success in the society in which we live demands qualities such as prompt and willing obedience to authority, loyalty, self control, accuracy, reliability, courtesy, and confidence. The system consists of a collection of traditional customs which function to develop these qualities, to maintain discipline in the new class, and to continue the best of the customs in the Corps of Cadets.

Hazing

The practice of hazing is becoming less and less common in our colleges. It is a practice which should be totally abolished because, if countenanced at all, it almost invariably is carried to excess by a few irresponsible students.

At The Citadel, where all the cadets live together in barracks, the presence of individuals who are obsessed with the idea that beatings and indignities are part of a student's education cannot be tolerated, and no student is wanted in the Corps who does not subscribe voluntarily to the regulations which absolutely bar hazing.

The regulations concerning hazing are contained in the following resolutions of the Board of Visitors:

Whereas, The Statutes of the State makes it unlawful for any student to engage in hazing (XXVIII, Statutes at Large, page 619), and

Whereas, This Act requires the governing board of all colleges supported in whole or in part by the State to formulate and issue such regulations as may be necessary to enforce this law.

Therefore, be it resolved, That the Board of Visitors of The Citadel in compliance with the law cited, hereby adopts the following regulations:

Every cadet entering the college shall subscribe to the following matriculation promise:

"I hereby engage to serve as a cadet in The Citadel, The Military College of South Carolina, until graduation or until I shall be discharged by proper authority, and I promise to support loyally the constituted authorities thereof as long as I remain a member of the Corps of Cadets."

Every cadet entering the third or higher class will be required to subscribe to the following promise:

"Hazing is defined as striking, laying hands upon, treating with violence, or offering bodily harm to a cadet who has been connected with the college for less than one year; or other treatment of a harassing, tyrannical, abusive, or humiliating nature; or requiring a freshman cadet to perform any personal service whatever for a member of the sophomore, junior or senior class.

"I fully understand the meaning of hazing as above defined and hereby promise that I will not engage in hazing in any form during my connection with The Citadel."

Customs and Courtesies

Customs and Courtesies, a 37-page booklet published at The Citadel, is designed to provide cadets with a compact manual of good deportment. This manual is used as the textbook in a course in deportment given under the supervision of the Commandant of Cadets.

After explaining clearly the value of a knowledge of the correct way of conducting oneself in social contacts, the booklet presents detailed

information on such matters as personal appearance and dress, correct speech, table manners, introductions, calling cards, calling, social correspondence, overnight visits, and punctuality.

Automobiles

Cadets of the 1st, 2nd and 3rd classes, proficient academically and in conduct for the preceding semester, are granted the privilege of having cars and parking them in assigned class parking areas on the campus. The privilege may be withdrawn on loss of good standing. Cars must be registered with the Adjutant. Evidence of legal state registration must be shown and all registrants will be required to have a minimum of bodily injury liability insurance, \$10,000 per person, \$20,000 each occurrence and property damage liability insurance, \$5,000 each occurrence. Parking permits in the form of stickers will be issued to each registrant on the day he brings his car on the campus. Stickers will be affixed permanently on the left-front and the rear bumpers of the car.

Fourth classmen (freshmen) are not permitted to have cars on the campus during the first semester of the academic year. Fourth Classmen proficient academically and in conduct for the first semester will be granted the privilege of having cars and parking them in an assigned area on the campus during the second semester.

Emergency and Special Leaves

By applying for permission for their sons' entry to The Citadel, parents voluntarily relinquish control over them to the authorities of the college, and it is expected that they will not ask for leaves for their sons except in emergencies. In every case the reason for the leave should be stated and the decision left to The Citadel authorities whether the circumstances warrant the approval of the application. This must be done before leaves will be approved.

The paragraphs which follow are extracted from regulations for the Corps of Cadets of The Citadel.

27.04. EMERGENCY AND SPECIAL LEAVES: a. Emergency leave may be granted only upon the request of the parent or guardian in the event of death or critical illness of a member of the cadet's immediate family. Duration of this leave will be predicated upon distance and time required. The immediate family includes parents, grandparents, brothers, sisters, and the permanent resident members of the family.

b. Special leave may be granted upon the request of the family or guardian in the event of the marriage of a member of the cadet's immediate family or golden wedding anniversary in the cadet's family.

c. Cadets may be granted special leave for such unusual business affairs as cannot be arranged by correspondence, but require the presence of the cadet in person, in which case applications from parents or

guardians stating the circumstances are required. In all cases, the final decision must rest with the authorities of the college.

41.08 CADETS FORBIDDEN TO ARRANGE FOR MEDICAL SERVICES: Except in an emergency occurring on leave and requiring immediate medical attention, a cadet will not arrange for or receive professional treatment from doctors or specialists without permission of the Surgeon. Applications for any special leaves required for such treatment will be submitted to the Commandant and referred to the Surgeon.

41.09 SPECIAL MEDICAL AND DENTAL SERVICES: Dental work, special examination of eyes, etc., should be looked after during the summer or the Christmas furlough. Leaves will not be requested for this purpose. In cases of emergency there are competent specialists and ample facilities in Charleston for taking care of any needs of cadets. In matters of health, the regular Surgeon of the college will advise the proper course to be taken. In case the services of a local dentist, oculist or other specialist are deemed necessary, the request therefor will be submitted to the Surgeon, who, if he approves the request, will make all necessary appointments for the cadets.

Week-End Leave

Generally, week-end leaves are authorized in the numbers shown below:

Class	First Semester	Second Semester	Total for School Year
First	3	3	6
Second	2	2	4
Third	1	2	3
Fourth	0	2	2

The Commandant of Cadets will assume that all cadets have permission to avail themselves of this privilege unless notified to the contrary in writing by parents or guardians.

Furloughs

Suspension of work for ten days, including Christmas Day and New Year's Day is required by law. Normally furloughs are granted at Christmas, at Easter, and upon completion of the Second Semester.

Mark Clark Hall

All cadet affairs, except the athletic programs and Beach club activities, are now housed in Mark Clark Hall, The Citadel's new student activities building. This handsome and spacious structure was dedicated on May 31, 1957, and was completely furnished and equipped for the opening of the 1957-1958 session. The Board of Visitors of The Citadel named the structure Mark Clark Hall to honor our distinguished president, General Mark Wayne Clark. General Clark's untiring and productive efforts in the interest of the personal welfare of the cadets made this action most appropriate. Mark Clark Hall was constructed and furnished at a cost exceeding \$1,000,000.00 from tuition fees paid by cadets; no State appropriation was required to defray this cost. The facilities which are provided are listed as follows:

First Floor	Second Floor	Third Floor
Reception Room	Lounge & Club Room	3 Conference Rooms
Hostess Office	Kitchen	<i>Sphinx</i> Staff Office
Cadet Depository	Cadet Store	<i>Brigadier</i> Staff Office
Cadet Canteen	Alcove Lounge	<i>Shako</i> Staff Office
Barber Shop	Auditorium	<i>Guidon</i> Staff Office
Post Office	Television Room	Honor Court
Billiard Room	Game Room	Projection Booth
Bowling Alley	Administrative Offices	Dark Room
Cloak Room.	Rest Rooms	10 Guest Rooms
Rest Room		Linen Closets & Storage
		Catholic Chaplain's Office

Full use is made of all these facilities. Cadets, alumni, and friends of The Citadel are proud of the fine edifice which contributes so much to stimulate interest and participation in the extracurricular activities. Detailed information concerning the various activities will be found in the following paragraphs.

The Beach Club

The Colonel Robert R. McCormick Beach Club of The Citadel, located on The Isle of Palms, was dedicated on November 30, 1958, and immediately put into operation. It offers to cadets unparalleled opportunities for enjoyment of sun, sea and surf. The beautiful two-story club house is built on a five-acre tract and overlooks the Atlantic.

The Beach Club was named to memorialize a great American soldier, editor and philanthropist, Colonel Robert Rutherford McCormick. His service in World War I under the command of General Charles Pelot Summerall, who was later President of The Citadel (1931-1953), was responsible for the Colonel's interest in and many benefactions to The Citadel. Actually, the proceeds from the sale of a magnificent piece of property given to The Citadel by Colonel McCormick, financed the construction of the Beach Club.

The simple necessary rules and regulations for the use of the club

are established by the Cadet Beach Club Committee and are the minimum essential to the enjoyment of all concerned. They will be changed as the need becomes apparent. The rules state that the Beach Club is for the use of cadets, staff, faculty, and their guests only; drinking or the possession of alcoholic beverages is prohibited; cadets will be in complete uniform when arriving and leaving the Beach Club. Swimming suits or appropriate civilian clothes may be worn while at the club; swimming is authorized only when life guards are on duty; no bathing suits may be worn in the main upstairs room, but they may be worn on the porches; cadets will limit visitors to three, except when visiting families are guests. All violations will be handled by the Cadet Beach Club Committee.

The schedules that the Committee has established are: the Beach Club is open from 3:00 until 5:30 p.m., on Mondays and Wednesdays; Friday from 6:00 until 11:00 p.m.; Saturdays from 12:00 noon until 11:00 p.m.; and Sundays from 10:00 a.m. until 9:30 p.m. Campus organizations, activities and companies may reserve the main room for parties by contacting the Cadet Beach Club Committee.

The Beach Club is well equipped for practically any type of party. On the second floor, in addition to a large screened porch, is a modern kitchen and a general purpose room with huge open fireplaces at each end. The kitchen is fully furnished with the latest in stainless steel equipment. The ground floor contains an apartment for the Resident Custodian, utility room and the bathhouse area.

The bathhouse area is equipped with a battery of vending machines providing carbonated drinks, coffee, milk, sandwiches, cigarettes, pastries, etc.

Outside on the eastern edge of the property is an oyster roast grill and four shuffleboard pads. In the wooded area around the beach house four grills are located, each with four picnic tables and running water. The area is to be floodlighted to facilitate nighttime parties for small groups.

Service Station

The Citadel Servicer, located north of the Armory, fills a real need for convenient vehicle service. The service station hours are regulated to accommodate the needs of the cadets, faculty, staff and other employees of The Citadel. The prices charged those eligible to use the services are reasonable and the station is fully equipped. Net proceeds of this auxiliary enterprise go into The Citadel Educational Foundation for scholarships. It has proved to be a successful and satisfactory undertaking.

Publications

THE BRIGADIER is published semimonthly by a staff of students. It serves as the campus newspaper and is financed by an allotment

from the student activities fee, augmented by the revenue from subscriptions and sale of advertising space.

THE SHAKO, the literary magazine, is published three times a year. It is supported by voluntary subscriptions, the income from advertisements, and an allotment from the student activities fee.

THE SPHINX is published annually by a staff of students. This publication serves as a semiofficial record of the year. By means of copy and photographs, the faculty and staff, student classes, military organizations, athletic activities, social affairs, and other student programs are portrayed vividly to preserve a record of student life for posterity. THE SPHINX is financed by an allotment from the student activities fee and the sale of advertising space.

THE GUIDON, the cadet handbook, is published annually by a staff of cadets. The handbook contains a complete description of the activities of the college, college history, customs, duties and responsibilities of cadets and deals with other phases of cadet life. It is particularly helpful to entering freshmen. The publication is financed by the allocation of a portion of the student activities fee. It is distributed to all students at the beginning of the college year.

Literary and Discussion Groups

Four student societies offer opportunities for discussing subjects of cultural interest and for developing proficiency in public speaking; the Calliopean Literary Society, the International Relations Club, the English Club, and the Round Table.

The Calliopean Literary Society sponsors forensic interest including radio speaking, intramural and intercollegiate debating, and oratory. Membership is open to all students.

The International Relations Club is devoted to the study of contemporary world economic and political problems. Membership is restricted to those students especially interested in government and politics.

The English Club is an organization of students interested in English. At meetings, professional writers are heard and problems of literary interest are discussed.

The Round Table is a discussion group with a limited membership. Elections are made from lists prepared by the faculty of those students with marked intellectual interests.

Professional Clubs and Societies

The following professional clubs and chapters of national professional societies are to be found at The Citadel: Knox Chemical Society; Pre-medical Club; Student Chapter, American Society of Civil Engineers; Student Chapter, American Institute of Electrical Engineers; Sigma Pi Sigma, national honor society in physics; Student Chapter, Society of American Military Engineers; Student Chapter, American Ordnance

Association; Economic Honor Society; Association of the United States Army; Beta Iota Chapter of Pi Sigma Alpha, national political science honor society; Phi Alpha Theta, national honor society in history; and Spanish-American Club.

Committees of the Corps of Cadets

The President's Advisory Committee was inaugurated by General Mark W. Clark for the purpose of keeping the president and the Corps of Cadets working in congenial relationship.

The Cadet Honor Committee is made up of first classmen and is the group upon whom rests the actual administration of the Honor System of the Corps of Cadets.

The Cadet Orphanage Fund Committee is directly in charge of all phases of its program. The objective is to give the children of the Charleston orphanages a better Christmas. The committee collects donations from cadets, finds out the needs of the children, makes the purchases, and wraps and tags the presents by name. On the last day before Christmas furlough the cadets form a motorcade to visit each of the orphanages to present the gifts in person. This program was organized in 1952 and has grown each year since.

The Cadet Activity Advisory Committee has the mission of advising the Director of Cadet Affairs on all activities under the jurisdiction of that office. The committee pays particular attention to the Auxiliary Enterprises which include the Cadet Canteen, the Barber Shop, the Billiard Room, the Bowling Alleys, the Servicenter and the Beach Club. These Auxiliary Enterprises are under the direct management of Captain Harvey F. Brand.

The Ring & Invitation Committee of the First Class is charged with the responsibility of purchasing the class rings and the commencement invitations of the class. Specific regulations govern the design and specifications, the award of the contract for manufacture, the ordering, and the wearing of the ring. The committee is in charge of the ceremonies conducted when the first classmen receive their rings.

Hostess Bureau

The Citadel hostess, Mrs. A. E. Dufour, serves as social advisor for students. Her office is located in the reception room of Mark Clark Hall. Under her supervision dancing classes are conducted and informal tea dances are held in the auditorium on weekday afternoons. At the time of formal hops, she arranges for overnight accommodations in private homes for the ladies from out-of-town and plans for refreshments and the care of personal effects at the hops. She keeps the reception room open and maintained in good taste for the use of students and their guests from 9:00 a.m. until retreat daily. The hostess serves the students constantly in the discussion and solution of their personal problems.

Social Events

All Citadel dances are under the sponsorship of the Standing Hop Committee, an organization elected by the cadets from the student body. The duties of this committee are to set dates for the dances, provide bands, and coordinate all plans for the hops held for the Corps.

The Citadel hops are the highlights of the social activities of the cadet. As dances are strictly for and by cadets, few invitations are issued to civilians. The formal hops held annually are the Thanksgiving Hop, First Class Ring Hop, the Valentine's Hop, the Corps Day Hop, and the Commencement Hop. Although these dances are formal, by tradition corsages are not worn by the cadet's dates. In addition to the formal dances, several informal dances are held throughout the year. Often the cadet orchestra, "The Bulldogs," plays for these dances. Other than the allocation from the Cadet Activities Fee for athletics, the next largest allotment of funds is made to finance these formal and informal hops and other social functions. Every cadet is privileged to attend the social activities held.

Clubs and Fraternities

It is not considered in keeping with the democratic ideals of The Citadel to encourage the formation of exclusive societies or fraternities, membership in which is based on other requirements than individual worth and achievement. When new cadets report to the college, all are at once put in uniform and, as far as possible, all artificial distinctions

based on wealth, position, or influence are minimized and the cadet is encouraged to achieve his place by individual merit. All cadets live under practically identical conditions, and all are rated by the same standards, but there is a wide range of opportunity for each to develop in accordance with his needs and aptitudes. Elsewhere in this bulletin are described the various clubs, organizations, and activities that are open to all cadets.

Musical Activities

The cadet orchestra, under the direction of Captain Leon Freda, furnishes the music for informal dances.

The Chapel Choir, under the direction of Mr. Vernon W. Weston, serves as the choir at chapel services and gives programs in Charleston churches.

The college band, under the direction of Captain Leon Freda, provides the music for parades, guard mount, and other official ceremonies.

The Music Club was formed to bring together in congenial association all students interested in good music. These students have for their use records and phonographs given The Citadel by the Carnegie Foundation.

In addition to The Citadel band, which constitutes one of the drill and administrative units into which the Corps of Cadets is organized, the college affords several excellent ways in which cadets may develop their musical interests.

Through the Carnegie Corporation the college has acquired a very valuable music set consisting of an electric phonograph, nearly seven hundred records, and various books dealing with musicians and music appreciation.

Auxiliary Enterprises

The Citadel now owns and operates all Auxiliary Enterprises under the supervision of the Department of Cadet Affairs. The enterprises are in existence primarily to provide appropriate and timely services for the convenience of the Corps of Cadets. The net profits from each enterprise is deposited in the Mark Clark Hall Fund. This Fund is used exclusively to foster and support many other phases of cadet life as directed by the President of The Citadel.

These enterprises are the barber shop, beach club, billiard room, bowling alleys, cadet canteen, motion pictures, service station and automatic vending machines.

Other Organizations

There are several important cadet organizations that do not come under a specific classification. The following should be mentioned as having distinctive functions in cadet life: the summerall Guards (first classmen), the Bond Volunteers (second classmen), the Junior Sword Drill, Sons of the American Revolution, Alpha Phi Omega (scouting), the Yacht Club, the Camera Club, the Chess Club, and the regional cadet clubs.

Director of Athletics: Teague

Coaches

Football: Teague, Witt, Ratteree, Guiton, Hall, Newsome, Patton

Basketball: Thompson, Brandenburg

Baseball: Newsome, Patton

Track: Hall

Cross-Country: Rariden

Tennis: Bunch

Golf: Rariden

Rifle: Hilbert

Wrestling: Guiton

Swimming: Reilly

Indoor Track: Hall

Staff: Assistant Director: Read; Publicity: Stewart; Trainer: Bostwick;
Administrative Assistant: Rariden

The Citadel is a member of the National Collegiate Athletic Association, and the Southern Conference. The Southern Conference is made up of nine institutions: The Citadel, Davidson College, Furman University, George Washington University, University of Richmond, Virginia Military Institute, Virginia Polytechnic Institute, West Virginia University and the College of William and Mary. The Citadel sponsors eleven teams in inter-collegiate athletics, both varsity and freshman. The eleven sports are football, basketball, swimming, wrestling, indoor track, cross-country, baseball, outdoor track, rifle, golf, and tennis.

Facilities for a well rounded development in athletics are provided for all cadets and are constantly being improved upon as the program expands. Home football games are played in Johnson Hagood Memorial Stadium which seats over 22,000 spectators. The Citadel Armory is used not only for varsity basketball but for intra-mural basketball and recreational games. The seating capacity for varsity basketball is approximately 4,500 with ample seating for all cadets in bleachers and seats surrounding the main court. Home baseball games are played on the Washington Light Infantry Field which is located in the southwest area of the campus. The varsity and freshman wrestlers have a large wrestling practice room which is located in the basement of Alumni Hall and all official matches are held in The Citadel Armory. The swimming pool at The Citadel has six lanes and is of regulation length for official inter-collegiate meets and is ranked as one of the outstanding pools in the Southern Conference. There are six well kept all-weather tennis courts on the campus for varsity tennis use and for the convenience of all cadets. Golf facilities are available to Citadel cadets at the local courses. Indoor and outdoor rifle ranges are available for varsity competition as well as for training and recreational use by all Citadel cadets. Willson Field, a large area on

the extreme north end of the campus provides space not only for two practice football fields but also a quarter-mile track which has a 220-yard straight-away. Track and field events in official competition are held on this field. It is also used for intra-mural activities when not in use by varsity teams.

All inter-collegiate athletic teams are handled by experienced and competent coaches who take every precaution for the physical conditioning of the teams under their care. A carefully supervised training room is open all year for the care and treatment of athletes on all eleven teams.

The Citadel is justly proud of the inter-collegiate record of all the teams representing the military college on the different fields of athletic competition, but is aware of the fact that not all students can compete in inter-collegiate athletics and every measure is taken to provide adequate facilities ~~for~~ healthful athletic participation for all cadets.

Applicants for admission to The Citadel must be not less than sixteen nor more than twenty-one years of age. They must be at least five feet in height and physically able to do military duty.

Formal application for admission must be submitted by parent or guardian on the blank provided by the Dean of Admissions, The Citadel, Charleston, S. C. A non-refundable \$5.00 application fee must accompany the completed application request. This \$5.00 fee will be used to defray partial cost of processing an application request.

Married men are not eligible for enrollment as cadets.

The requirements for admission to the freshman class are those prescribed by the Southern Association of Colleges and Secondary Schools, of which The Citadel is a member. The standards of the Association require "the satisfactory completion of a four-year course of not less than fifteen units in a secondary school approved by a recognized accrediting agency, or in a secondary school that is a member of this Association, or the equivalent of such a course as shown by examination."

High-school subjects required are four units of English; three of mathematics, two of which must be in algebra; and one of history. For physical science and engineering courses, two units of algebra and one unit of plane geometry are mandatory. Too low a score on the mathematics entrance examination will disqualify an accepted applicant from majoring in the fields of engineering and physical science.

In addition to the above minimum scholastic requirements, acceptance for admission to The Citadel is determined by:

1. Entrance examinations.
2. High School grades.
3. Graduation from an accredited high school.
4. Recommendation of high-school official.
5. Physical qualifications.

South Carolina applicants must furnish a written certificate signed by at least two (2) graduates of The Citadel who are residents of South Carolina certifying that in their opinion the applicant is a person of good moral character and will conform to the student life, ethical standards, and discipline of the College.

The Citadel authorities reserve the right, at their discretion, to require a non-South Carolina applicant to have a written certificate signed by at least two (2) graduates of The Citadel certifying that in their opinion the applicant is a person of good moral character and will conform to the student life, ethical standards, and strict discipline of the College.

All candidates for admission to The Citadel are required to stand the following College Entrance Examination Board tests:

Scholastic Aptitude test

English Composition Achievement Test

Intermediate Mathematics Achievement Test

or

Advanced Mathematics Achievement Test

The aptitude tests are given in the morning and the English and mathematics achievement tests are given in the afternoon of the same day.

The tests consist of exercises demanding verbal communication, mathematical reasoning, and English language skills. The mathematics achievement test requires a knowledge of algebra and plane geometry. The student's development of English vocabulary and comprehension throughout his schooling will be drawn upon answering the verbal reasoning and English language skills exercises. He cannot expect, therefore, that last minute coaching and cramming will contribute importantly to his examination score. In order to apply for these tests, the applicant must write directly to College Entrance Examination Board, P.O. Box 592, Princeton, New Jersey, for their Bulletin of Information and examination application blank. The fee for the complete examination is \$13, payable with completed application which must be submitted at least one month prior to the date of the test. If you list The Citadel as one of the colleges in which you are interested, test scores will be sent to us approximately 30 days after the tests are taken. The Admissions Committee of The Citadel will notify you as to acceptable test scores within ten days after receiving your report from the College Entrance Examination Board.

These tests will be given at locations throughout the United States and some foreign countries on December 1, 1962, and in 1963 on January 12, March 2, and May 18. The aptitude test is given in the morning and the various achievement tests of one hour each are given in the afternoon on dates given above. An applicant may take three afternoon achievement tests. The Citadel requires the English and mathematics only. All applicants for The Citadel are urged to complete all required entrance examinations not later than March 2, 1963, and if possible by January 12, 1963. For further information write the College Entrance Examination Board, Box 592, Princeton, New Jersey.

A thorough physical examination is required of all applicants for admission. Forms for reporting the results of the examinations are supplied by the Dean of Admissions and when completed should be returned to him.

A reservation fee of \$50.00 is required of all new cadets accepted for enrollment in the regular session at The Citadel, payable within 15 days after notification of acceptance by the Dean of Admissions. The reservation fee will be applied to the first installment of regular college fees. This fee is not refundable to newly accepted cadets who cancel their reservation after July 1 (no exceptions).

Applications for admission should be submitted early in the student's

senior year of secondary school. New students are admitted only in September. As all available facilities of the institution are required for continued education and training of cadets promoted from the fourth class, it is the general policy of the college not to accept transfer students. Exceptions may be made only with the approval of the Executive Committee of the Board of Visitors.

Policy of Admissions

The prospective student's rating in the *College Entrance Examination Board test* will be given considerable weight, but it will remain only one factor to be used in determining the student's acceptability. If a student obtains a grade above the cut-off score currently used, it does not mean he will automatically be admitted. His high-school grades must indicate the probability of success with college work, he must have reached a maturity level sufficient for serious study, he must have proper motivation for college work, and he must have a suitable recommendation from his high school.

The prospective student's *high-school record* will be given careful examination to see that his grades and high-school rank indicate the ability to do college work and that the student is properly motivated and has established habits of study essential to college success. Particular attention will be given to the grades obtained on college preparatory subjects such as English, mathematics, science, history and foreign languages.

A *positive recommendation* on each student seeking admission will be sought from the high school he attended. The recommendation will be sought from the high-school principal and from the high-school guidance counselor, if one exists. This recommendation will be given considerable weight since it represents a judgment on ability and maturity to handle college-level work based upon considerable experience with the student during his most formative years. If a student has sufficient ability but lacks emotional stability, motivation, or suitable character, he may be rejected for admission. On the contrary, if a student is close to the borderline in ability but has great motivation, advanced maturity, is emotionally stable and of excellent character, he will be given every consideration for admission, since his good qualities seem to outweigh his limitations and he seems to have a fair chance of college success.

There are a number of intangible factors that are important but are difficult to measure. Nevertheless, The Citadel will attempt to assess these factors by all possible means. These *miscellaneous factors* concern character, maturity, motivation, contribution to student life, amenity and obedience to authority, and salutary rules of discipline and emotional stability. Where any of these factors are in question, the College will obtain additional data on them by any of the following methods: interviewing the potential student; interviewing the parents; interviewing the leaders of the community where the potential student

resides; asking the student to write a special report on such subjects as goals in life, his reason for his choice of college, and his vocational selection; or to take a special test to determine any of the factors in question. While none of these methods of screening candidates is conclusive by itself, many of them can be used to supplement other admittance requirements in obtaining suitable students capable of college-level work.

In summary, *no single factor* will be controlling in admitting students. Instead, the College will look for well-rounded, mature students with good motivation and a good educational achievement level, so as to upgrade its student effort, its teaching, and its development of future leaders.

Prospective Students

The Citadel encourages prospective students to visit the campus for weekends during the academic school year. This will give the student a first-hand opportunity to observe cadet life. Since space in barracks for these visits is limited, prospective visitors are requested to notify the Adjutant by letter at least two weeks before the planned visit. Visitors may eat their meals in the cadet dining hall and stay in barracks at a nominal charge.

Withdrawal

If a cadet finds it necessary to withdraw from The Citadel during the college year or does not wish to return the following fall, a request for an honorable discharge must be sent by the parent or guardian in writing directly to the Dean of Admissions.

It is not the policy of The Citadel to grant discharges between the completion of examination and the Commencement exercises, or at the beginning of a furlough.

The Citadel, a state-supported institution, is operated on a non-profit basis. The cost of operation is borne through the collection of fees from the students and appropriations made by the General Assembly of South Carolina. The college reserves the right at any time to adjust fees collected from the students to meet the current cost of operation.

Payments

The Quartermaster of The Citadel is the Fiscal Officer, and all transactions relating to payments should be conducted through him. All remittances should be made by money order or check made payable to The Citadel and should be mailed directly to Colonel J. F. Bosch, Jr., Quartermaster.

The academic year at The Citadel is divided into two semesters. For the convenience of the parents an installment system has been instituted at The Citadel for the payment of college fees. The payment of college fees for each semester is due and payable as shown on the schedule below.

Bills will be rendered by the Quartermaster to parents approximately one month prior to the date the installment is due. All college fees must be paid by the dates indicated in the schedule below.

Schedule of Payments for South Carolina Students

	<i>Fresh- men</i>	<i>Sopho- mores</i>	<i>Juniors</i>	<i>Seniors</i>

Footnotes on Schedules of Payments and Expenses

- † 1. The reservation fee of \$50.00 will be credited to the first installment of the first semester.
- § 2. An additional deposit of \$40.00 is required of freshmen students who elect engineering drawing.
- * 3. Those Fourth Classmen (Freshmen) and Third Classmen (Sophomores) formally enrolled under the Army or Air Force R.O.T.C. Basic Program will receive a credit of \$25.00 uniform allowance on the installment due on 28 January 1963 and 1 April 1963, respectively.
- Those Second Classmen (Juniors) and First Classmen (Seniors) formally enrolled under the Army or Air Force Advanced Program will receive a \$50.00 uniform allowance credit on the installment due on 28 January 1963 and 1 April 1963, respectively.

For particulars see pages 66, 94 and 136.

Explanation of Fees

Reservation fee: A reservation fee of \$50.00 is required of all cadets. This fee is not an additional charge but is an advance payment toward the fees due for the Fall Semester. It assures a cadet a place in the Corps of Cadets and barracks for the following September.

All new cadets are required to pay this fee within fifteen days after notice of acceptance has been received from the Dean of Admissions.

A cadet currently enrolled who plans to continue his education at The Citadel is also required to pay the reservation fee not later than June 1 for the semester beginning in September. If this fee is not paid by June 1, The Citadel is in no way obligated to permit him to continue his education at The Citadel.

The reservation fee will be refunded to old students who notify the Dean of Admissions in writing not later than June 1 to cancel their reservations at The Citadel. After June 1 but prior to registration for the Fall Semester, this fee will be refunded only to those upperclassmen (sophomores, juniors, and seniors) who have been dropped from enrollment at The Citadel due to academic deficiencies or other causes.

Those students who complete registration for the fall semester will receive credit on the first installment for the reservation fee previously paid.

Tuition. — The Board of Visitors of The Citadel has established the following tuition fees:

South Carolina Students — For all students whose guardians or parents reside in South Carolina the tuition fee has been established at \$80.00 per academic year or \$40.00 per semester.

Out-of-State Students — All students whose guardians or parents are non-residents of South Carolina will pay an out-of-state tuition fee.

The out-of-state tuition fee has been established at \$320.00 per academic year or \$160.00 per semester.

This fee is not refundable.

Student Activities. — A fee of \$80.00 an academic year is assessed each student and is payable in payments of \$40.00 each semester. This fee is used for the support and maintenance of various student activities, such as the *Sphinx*, the cadet annual; the *Brigadier*, the cadet newspaper; the *Shako*, the literary magazine of the Corps of Cadets; the *Guidon*, an information and orientation handbook; the Religious Council, social functions, including dances; and athletics. That portion of the fee for athletics is not an admission fee to athletic contests since students are admitted to all athletic games free of charge. This fee is not refundable.

Board. — All students living on the campus are required to eat in the college dining hall. The cost is \$459.00 per academic year or \$229.50 per semester. Due to many uncontrollable factors, the college reserves the right to increase this fee at any time to meet current increases in the cost of operation. This fee is refundable on a pro-rata basis upon withdrawal from school.

Overhead and Maintenance — A charge is assessed each student for the normal wear and tear and maintenance of the facilities used by the students and for overhead on services provided the students. The Board of Visitors of The Citadel has established this fee to be \$136.00 per academic year. This fee is not refundable.

Service Fee.—A charge of \$185.00 is made for the academic year of two semesters for room, light, water, janitor service, laundry, normal hospital care, and library use. This fee is refundable on a pro-rata basis. The College reserves the right to increase this fee at any time to meet current increases in the cost of operation.

Breakage.—A \$10.00 deposit will be maintained by all cadets enrolled at The Citadel. When there is insufficient money in the cadet's Quartermaster Account to cover the cost of damages to buildings, rooms, equipment, or loss of R.O.T.C. manuals and government property, this deposit will be used. This deposit is refundable after graduation or withdrawal from The Citadel.

Books and Supplies.—This deposit is used to cover the cost of books, supplies, uniform alternations, dry cleaning and pressing tickets, laboratory fees, engineering drawing equipment and supplies. The amount expended by each student varies. The required deposit is based on the average needs and in most cases is ample. If the deposit is not sufficient an additional deposit should be made. The required deposits are as follows:

Freshman Year	\$515.00
Additional deposit for freshmen engineering students	\$40.00
(Students who elect engineering drawing will be rendered a supplementary bill for this deposit to cover the purchase of drawing instruments and supplies.)	
Sophomores	\$80.00
Juniors	\$80.00
Seniors	\$80.00

Uniforms.—All cadets are required to wear The Citadel uniform which is issued by the college. New cadets should not bring a supply of civilian clothes other than those which are worn upon reporting to the college as they are not permitted to wear civilian clothes except during authorized furloughs. It is also advisable to bring inexpensive trunks or suitcases since it is not permissible to retain them in the cadet's room; luggage must be stored in a warehouse provided for such at the risk of the owner.

Cost of uniforms should not be considered as an educational expense but rather a clothing expense which is incidental to attending any college. With proper care, the uniform should last for several years. Of course, the requirements during the subsequent years will depend on the manner in which the cadet has cared for his uniform. Small deposits are made in the sophomore, junior and senior years to replace worn-out uniforms. The overall cost of the uniform should not exceed that which would be incurred in purchasing clothes to attend a civilian college. The uniform deposit requirements are as follows:

Freshman Year	\$515.00
Sophomore Year	170.00
Junior Year	150.00
Senior Year	115.00

The woolen uniforms issued to cadets are custom made for The Citadel. Once the uniforms have been fitted and issued to a cadet the entire cost will be charged to him.

Since the full dress uniform is tailor-made to the measurements of each cadet after enrolling at The Citadel, those cadets withdrawing from the school will be charged a cancellation fee of \$4.50 for cancelling the purchase of the full dress uniform during its manufacture. The deadline for cancelling the purchase of the full dress uniform is November 15, 1962. After this date no cancellations will be accepted and the cadet will be charged the entire cost of the full dress uniform.

The cost of articles and uniforms issued to the freshmen during the 1961-1962 academic year was as follows:

<i>Quantity</i>	<i>Article</i>	<i>Cost</i>
1	Bed Spread, Citadel	\$ 6.82
1	Blanket, Citadel	9.98
1	Blouse, Dress, wool	47.51
1	Blouse, Full Dress, wool	62.90
1	Cap, dress	7.15
1	Cap, field	2.48
1	Cap, white with covers	6.33
1	Coat, Overcoat, wool	50.66
1	Coat, rain	21.89
1	Coat, white and accessories	19.35
8	Cuffs, pairs, @ \$.41	3.28
2	Covers, mattress, @ 2.48	4.96
2	Gloves, pairs dance @ \$.52	1.04
6	Gloves, pairs, drill @ \$.80	4.80
1	Gloves, pair, leather	3.30
1	Jacket, grey	13.81
1	Muffler	1.20
1	Shako, with pom pon, chain	9.90
8	Shirts, grey cotton @ \$2.64	21.12
2	Shirts, athletic \$.90	1.80
2	Shorts, athletic @ \$.68	1.36
1	Suit, sweat	3.23
8	Trousers, grey cotton @ \$3.83	30.64
4	Trousers, White, full dress @ \$6.83	27.32
2	Trousers, Dress, wool @ \$20.00	40.00
1	Trousers, Full Dress, Wool	20.32
2	Laundry Bags	1.30
1	Bathrobe	6.45

Miscellaneous Items:

1 Belt, waist; 8 Collars; 1 Cover, rain cap; 4 cuffs, pr	
2 Letters, company; 1 Links, pair, cuff; 2	
Numerals, class; 1 Plate, breast; 1 Plate,	
waist; Rental, cartridge box or music pouch;	
supplies; 2 Tags, Name; 1 Ties; Shine Kit, Clothes	
Hangers; Suspenders; Webbing	19.90
Total	\$450.80
S. C. Sales Tax	13.52
	<hr/>
	\$464.32

The above prices were in effect during the 1961-62 academic year and are subject to changes in accordance with the contract prices at the time of purchase by the cadets. Extra shirts, trousers, or other articles of uniform in excess of the above quantities are not included in the required deposit. Additional deposits should be made if extra shirts, trousers, or other articles of uniform are desired.

In order to keep the appearance of the Corps of Cadets at the highest level, an additional issue of one dress blouse, one pair dress trousers, has been authorized. Cadets in the Third Class (Sophomore Year) will be measured for these articles of uniforms in February with delivery being made not later than March 15 of the same year. A uniform deposit of \$65.00 is included in the first installment of the second semester of the sophomore fees to cover the cost of this issue of uniforms.

Cadets in the Second Class (Juniors) will be issued four cotton shirts during the first semester.

The policy of The Citadel does not permit the use of used uniforms. Entering freshmen are advised not to procure such uniforms since they will not be approved.

In accordance with the above policy the college does not operate a second-hand uniforms department. Parents should not send used uniforms to the Quartermaster or college tailor with the request that they be sold. Such uniforms when received will be returned at the expense of the sender.

Diploma Fee.—The charge for the diploma is \$10.00.

Transcript Fee.—Official transcripts of scholastic records will be furnished upon request. There is no charge for the initial transcript, but a fee of \$1.00 is charged on all subsequent ones. Remittances for transcripts should be made payable to the Quartermaster. The payment should accompany the application for the transcript and should be mailed directly to the Registrar.

Laboratory Fee.—A laboratory fee of \$10.00 a semester is charged students taking courses involving laboratory work in biology, chemistry, civil engineering, electrical engineering, geology, and physics. These

laboratory fees are used to cover the added expense of supplies and costly equipment used in the teaching of these courses. This fee is not collected directly but is included in the estimated deposit for books and supplies, and is chargeable against the deposit.

A laboratory fee of \$5.00 a semester is charged to students of the junior and senior classes majoring in physical education.

Refunds

Since the college fees are paid to The Citadel in four equal installments during the Academic Year, no refunds for registration, tuition, student activities, and maintenance will be made when a cadet withdraws during the period for which his fees have been paid. However, if a cadet should withdraw prior to the date on which an installment is due the amount of any installments paid in advance will be refunded. On the other hand, a cadet who is enrolled on the date on which an installment is due, the entire amount of the installment will be due and will not be refunded.

Board and service fees will be refunded on a pro-rata basis. All unused portions of this book and uniform deposit will be refunded.

The uniform and book deposits are estimated to cover the needs of the cadet for such purchases during the entire academic year. It should not be expected that the school refund this money to the cadet for his personal needs. The unexpended balances of these deposits will be returned upon request in June at the close of the academic year; otherwise, they will be held to the cadet's credit until the next academic year or until he withdraws from The Citadel.

Additional Information

Unsatisfactory Accounts.—When a cadet's account is in an unsatisfactory condition, no honorable discharge will be made, no diploma will be awarded, and no transcript of credits will be provided until a satisfactory settlement of the account has been made.

Pocket Money.—The college does not handle pocket money accounts. All allowances for pocket money should be sent directly to the cadet. No estimate is made of this requirement, for the amount varies among the cadets and can best be determined by the cadet and his parents. Laundering of the white uniform, haircuts, and travel must be paid for out of the cadet's pocket money.

Cadets who receive substantial allowances for their personal needs should deposit this money in The Citadel Depository which is maintained for the accommodation and convenience of the cadets. This depository is located in Mark Clark Hall.

Clothing and Bedding

All cadets are required to furnish their own bedclothes except a bedspread and blanket which will be issued to each cadet. Both the bedspread and the blanket are in Citadel colors and have The Citadel seal

imprinted thereon. These items can be used after graduation on single beds.

Beds and mattresses are provided by the college, but pillows are not. Two mattress covers will be issued at cost to each cadet. Cadets *must* come provided with the following articles:

Three Pajamas	One pair white tennis shoes
Twelve white tee shirts and twelve short drawers	Ten white towels
Twelve pairs of black socks	One pillow
Four pairs of white athletic socks	Three white pillow cases
Twelve white handkerchiefs	Four white sheets for single bed
One pair bedroom slippers or shower shoes	One Army style blanket for single bed
Two pairs, plain toe black oxford shoes (with rubber heels)	Toilet articles

Since the school does not furnish bed linens, it is advisable that each cadet who ships his belongings to The Citadel bring with him two sheets, one pillow case, and one pillow for his use until he is able to get access to his belongings.

New cadets are advised to break in their cadet uniforms shoes at least three weeks prior to reporting to The Citadel.

Before the opening of the session, a new cadet is assigned a laundry number, which he retains as long as he remains at The Citadel. Clothing should be marked with the name and full initials, as well as the laundry number, as follows: sheets, towels, and handkerchiefs, in the corner; pillow cases, in the corner at open end; collars, on inside near center; shirts, on bands at back of neck; socks, on leg near top; other articles, where most practicable.

Accommodations for Cadets During Holidays

Cadets who cannot go to their homes during the Christmas and Easter holidays may remain on the campus and occupy the visiting teams' dormitory. The barracks and the dining hall will be closed during vacations.

Employment

The time of a cadet at The Citadel is so taken up with his duties that there is no opportunity for outside employment for the purpose of financial assistance. However, there are a limited number of part-time jobs available from time to time with various campus activities. These jobs are not of a substantial nature which can be relied upon to pay a cadet's college fees. To be eligible for such work a cadet must be an upper classman and must be proficient in both his academic work and conduct. Application forms for part-time work are available in the College Placement Bureau.

Hospital

The hospital facilities at The Citadel are excellent, and all ordinary cases of sickness are treated by the surgeon and the nurses of the college without expense to the parent. Surgical cases requiring the removal of a cadet to an infirmary in the city, services of a special nurse in the college hospital, and special treatment of eyes, ears, teeth, etc., must be at the expense of the parents or guardian.

R.O.T.C. Allowances

Students formally enrolled (see pages 94 or 136 for particulars) in Military or Air Science I and II are paid by the Government \$25.00 per semester as a uniform allowance. Fourth Classmen (freshmen) and Third Classmen (sophomores) must be enrolled at least through the sixth week to receive this allowance. Students formally enrolled in the Advanced Course are paid \$50.00 per semester as a uniform allowance. The above uniform allowances are not paid directly to the students but are credited to the students' Quartermaster accounts.

In addition to the uniform allowance a subsistence allowance of approximately \$27.00 per month is paid directly to those students formally enrolled in the Advanced Course.

Students formally enrolled in either the Army or Air ROTC Programs must attend a summer camp between their junior and senior years. At this camp students receive the pay rate of an Army Recruit or Basic Airman (\$78.00 per month) while attending, plus travel pay to and from camp computed at a rate of five cents per mile. During the camp period the subsistence allowance is not paid.

Summary of Estimated R.O.T.C. Allowances

Fourth Class year (Freshmen) (formally enrolled):

Commutation of Uniforms Allowance	\$ 50.00
Total	\$ 50.00

Third Class Year (Sophomores) (formally enrolled):

Commutation of Uniform Allowance	\$ 50.00
Total	\$ 50.00

Second Class Year (Juniors) (formally enrolled):

Commutation of Uniform Allowance	\$100.00
Subsistence Allowance (estimate)	\$232.20
Total	\$332.20

First Class Year (Seniors) (formally enrolled):

Commutation of Uniform Allowance	\$100.00
Subsistence Allowance (estimate)	\$288.90
Total	\$388.90

Summer Camp:

Pay a Basic Airman (four weeks)	\$78.00
Pay of an Army Recruit (six weeks)	\$117.75
Travel - five cents a mile to and from camp (formally enrolled)	_____

Summer Session

A summer session is conducted for students who wish to accelerate their work or to make up conditions or failures.

The summer session must be self-supporting, and the same fees must be charged to both South Carolina and out-of-state students. Fees for the summer session are as follows:

	<i>First Term</i>	<i>Second Term</i>
Tuition - \$12 per semester credit hour
Summer Term Fee	\$ 12.00	\$ 12.00
Room, Board and Laundry	108.00	90.00
Hospital*	6.50	6.50
Laboratory - for laboratory courses in biology, chemistry and physics	10.00	10.00

* Not charged to men in the teaching profession,
or to any women.

During the summer session all purchases of books and supplies will be on a cash basis. There will be no charging to the student's account since no book or supply deposits will be collected.

It is pointed out that bills for the summer session will not be sent to the parents by the Quartermaster. It is impossible for the Quartermaster to compute these bills since the tuition fee is based on the number of credit hours of work which is scheduled by the student. The student should come supplied with sufficient cash to take care of his fees for the summer session.

SCHOLARSHIPS AND HONORS

Scholarships

The Charleston City Scholarships are six scholarships maintained by the City of Charleston. Each is worth \$250 a year. Appointments are made by the Committee on Ways and Means of the City Council on the basis of a competitive examination. Applicants must be residents of the City of Charleston.

The Joseph D. Aiken Scholarships cover all expenses for the first three years and are supported by a trust fund made possible by a bequest of the late Joseph D. Aiken. It is anticipated that several scholarships will be available each year, but they are limited to applicants from the New England states with some preference being given to Rhode Island and Connecticut.

The First Field Artillery Brigade, A. E. F., and The Fifth Field Artillery Scholarships cover all expenses at The Citadel for four years. They were established in 1934 by Colonel Robert R. McCormick of Chicago, and are limited to candidates from the State of Illinois.

Association of Citadel Men Scholarships.—The Association of Citadel Men maintains several scholarships in the amount of \$100 to \$200 each. The scholarships are awarded for one year only to both entering cadets and upperclassmen.

Baruch Scholarships are scholarships with a value of \$300 each and were inaugurated from the income of a fund donated to The Citadel by Mr. Bernard Baruch. One is open to a rising senior and the other to a rising junior for one year.

The W. W. Benson Scholarship pays all expenses; it is named in honor of Major Benson, Class of 1907, and is supported by his friends from Greenwood County, South Carolina.

The Oliver J. Bond Scholarship is supported by the income from a trust fund established by alumni as a memorial to the late Colonel Oliver J. Bond, President of The Citadel, 1908-1931. The present value is \$300 a year for four years.

The Alton H. Bryant Memorial Scholarship is worth \$500 a year for four years. It is in memory of Alton H. Bryant, a graduate of the Class of 1940, who lost his life in the service of his country. Applicants are limited to residents of Orangeburg County, South Carolina.

The Richard P. Cardwell Scholarship was established by General and Mrs. Eugene F. Cardwell in memory of their son, Cadet Richard P. Cardwell, a member of the Class of 1957. It is given in alternate years to a member of the sophomore class and has a value of \$250 a year.

The Citadel Endowment Fund Scholarships consist of several scholarships maintained by The Citadel Endowment Fund from revenue derived from the dividends of life insurance policies voluntarily purchased by members of graduating classes since 1953.

The Mark Clark Scholarship is a \$500 scholarship awarded each year to one of the most outstanding members of the rising senior class.

The Cogswell Scholarships of the Washington Light Infantry pay \$500 a year for four years and are limited to candidates who are members of the Washington Light Infantry or, in the event no member is qualified, a son of a member of the Washington Light Infantry in good standing. Selection is made by the Washington Light Infantry.

The Consolidated Foods Scholarships are provided by the Consolidated Foods Corporation and pay \$500 a year for each of two recipients.

The James R. Crouch Scholarship was founded in 1925 by the late James R. Crouch of Greenville, S. C. The present value is \$100 a year for four years.

The Daniel Scholarships are derived from the income of a fund generously donated to The Citadel by Charles E. and R. Hugh Daniel.

The Exchange Club of Charleston Scholarship pays all expenses of an upperclassman for one year. It is limited to residents of Charleston County, South Carolina.

The Andrew Griffith Scholarship was established by Mr. Andrew D. Griffith of Orangeburg, S. C., and pays all expenses for four years.

The Toney B. Jackson Scholarship, established by Mr. Toney B. Jackson of the Class of 1915, is given in alternate years to a member of the sophomore class and has a value of \$250 a year.

The P. P. Leventis, Sr., Scholarship covers all college expenses and is supported by the income from a trust fund as a memorial to the late P. P. Leventis, Sr., outstanding Charlestonian. This scholarship is available to students of outstanding leadership and ability, without reference to financial need or geographical limitations.

The Freddie Levine Scholarship was established from funds contributed friends of Lieutenant Freddie Levine, who died in the service of his country. It pays \$500 a year for four years.

The Owen-Corning Fiberglass Corporation Scholarships, having a value of \$500 each, are awarded each year to outstanding upperclassmen majoring in engineering.

Post-Courier Scholarship. The Post-Courier Foundation of Charleston, S. C., offers to Post-Courier carriers scholarships valued at \$1,000 distributed over a four-year period. These scholarships are limited to Post-Courier carriers who are residents of South Carolina. Awards are made each year, and the selections are made by a committee appointed by the Foundation.

President's Honorary Scholarships. Each year General Mark W. Clark gives several scholarships to outstanding high-school graduates and outstanding members of the current junior, sophomore, and freshman classes of The Citadel. Each Scholarship has a value of \$200.

The Sears, Roebuck Scholarship, worth \$1,000 a year for four years, was established by Sears, Roebuck and Company in 1955.

Sottile Foundation Scholarships. The Albert Sottile Foundation of Charleston, S. C., in accordance with its policy of furthering educational opportunities, offers several scholarships worth from \$100 to \$500 a year. Some scholarships are limited to young men in the employ of companies contributing to the Foundation, or to sons of the employees of said companies. Others are limited to Charleston County and appointments are made by the Foundation on the basis of competitive examinations.

The Star of the West Scholarships were awarded for the first time in 1951. They cover all college expenses and are supported by the income from an anonymous Trust Fund. These scholarships are available only to students of outstanding ability and attainment without reference of financial need or geographical limitations.

The Summerall Scholarship is worth \$500 a year for four years, in memory of General Charles Pelot Summerall, President of The Citadel, 1931-53.

The Swig Scholarships are worth \$500 each for one year. These two scholarships were made possible by a donation from Mr. Benjamin H. Swig, president and owner of the Fairmount Hotel, San Francisco, California.

The Edgar A. Terrell Scholarship is worth \$600 a year for four years. It was made possible by a donation from Edgar A. Terrell, Class of 1915, and, is limited to candidates from Mecklenburg County, North Carolina, or, in case there is no qualified candidate, to the geographical boundary of the state of North Carolina.

The Western Electric Scholarship is awarded each year to an outstanding senior majoring in electrical engineering; the value is \$400 to \$600.

The William States Lee Scholarship was founded in 1925 by the late William States Lee of Charlotte, N. C. Its present value is \$150 a year for four years.

The General Robert E. Wood Scholarships, valued at \$500 a year for four years, were established by General Robert E. Wood, retired chairman, Board of Directors, Sears, Roebuck and Company.

Applicants for scholarships need not specify any particular scholarship. All applications will be evaluated and the best applicant selected for the scholarships available. Selections are made on the basis of comparative evaluations of high-school records, taking into consideration all attributes considered desirable in a well-rounded cadet. Entrance examination scores will be given some weight in the evaluation of an applicant.

The Star of the West and Leventis Scholarships were established primarily for the purpose of attracting to The Citadel outstanding

young men, and they are not restricted by either financial need or geographical limitations.

Completed scholarship application forms should be submitted to the Chairman of the Committee on Scholarships prior to March 15. Application for admission to The Citadel must be on file with the Dean of Admissions at the time the Scholarship application is filed. The Scholarship Committee will carefully screen the applications and make awards by the middle of April. In certain cases, applicants may be asked to appear for a personal interview.

National Defense Student Loans

The Citadel participates in the student loan program established by the National Defense Education Act of 1958.

Both currently enrolled cadets and new cadets who have been accepted for admission may apply for these loans. To be eligible for favorable consideration, applicants must establish financial need and give evidence of likely academic success. In accordance with the law, preference is given those applicants majoring in engineering, sciences, modern languages, or education.

To assist them in determining financial need, The Citadel National Defense Student Loan Committee requires the parents of all applicants to complete the Parents' Confidential Statement published and analyzed by the College Scholarship Service, Princeton, New Jersey. The committee also gives favorable consideration only to those new cadets whose academic promise is above average as shown by their entrance examination and high-school record.

For more detailed information and for loan application forms, one should write to the Registrar, The Citadel.

Academic Honors and Awards

The Scholarship Medal is presented annually by the Board of Visitors to the cadet graduating at the head of his class.

General High Honors are awarded to those cadets of the graduating class whose academic standing for the four college years is not below a grade point ratio of 3.60.

General Honors are awarded to those cadets of the graduating class whose academic standing for the four college years is between a grade point ratio of 3.50 and 3.59 inclusive.

Departmental Honors are awarded on recommendation of heads of departments to those cadets of the graduating class who have established a grade point ratio of 3.50 or better in at least 36 semester hours' work in a department, including all departmental work in the junior and senior years.

The Dean's List is a recognition given to those students registered for eleven or more semester hours whose grade point ratio is 3.00 or

higher, with no grade below C, for the work of a semester. Medals are awarded and worn on the uniform the following semester.

The Gold Star is awarded to those students on the Dean's List who have made a grade point ratio of 3.60 or higher for the work of a semester. The star is worn on the collar of the uniform during the next semester.

The Citadel Honorary Society. Membership in The Citadel Honorary Society is limited to members of the first class whose standing is in the upper eight per cent of their class.

The Francis Marion Cup is awarded by the Rebecca Motte Chapter, D.A.R., to a cadet of the June graduating class for outstanding achievement in American History.

The Granville T. Prior Award consists of key and scroll presented annually by The Citadel History Club to the student whose first-class essay is selected by a joint faculty committee as the best in the departments of English, History, Modern Languages, and Political Science. It is named in honor of the late head of The Citadel History Department.

William E. Mikell Award, a cash award donated by the late William E. Mikell, is awarded to that member of the graduating class having the highest average in English over a three-year period.

The Wall Street Journal Student Achievement Award is donated by the *Wall Street Journal* and awarded to the student having the greatest achievement in business administration during the school year.

The Charles P. Summerall Cup is donated by the European Citadel Association and awarded annually for one year to the company of cadets which makes the greatest improvement in scholastic work during the college year.

The Post-Courier Awards are given by the Post-Courier to the three best writers on *The Brigadier Staff*.

The Peter Gaillard Memorial Award is given annually by Colonel and Mrs. Pierce Gaillard in memory of Peter Gaillard of The Class of 1948 to a graduating first classman majoring in electrical engineering on a basis of scholastic attainment, leadership, and participation in extracurricular activities.

The Charles T. Razor Memorial Award is given annually in memory of Colonel Charles T. Razor to a graduating cadet selected by the Head of the Department of Electrical Engineering on the basis of scholastic achievement and ability and willingness to help others.

Military Honors and Awards

R.O.T.C. Distinguished Military Student Program — Students whose proficiency in military training and whose qualities of leadership and attention to duty have merited the approbation of the Professor of Military Science are designated Distinguished Military Students.

Distinguished Military Students are eligible to apply for appointment as Second Lieutenants in the Regular Army when they have registered for their last academic year.

Distinguished Air Force Reserve Officer Training Corps (AFROTC) Students and Graduates. The Professor of Air Science (PAS) may appoint as Distinguished AFROTC Students at the start of the second year advanced course of AFROTC, students who have distinguished themselves by displaying outstanding qualities of leadership, adaptability to military training, and academic ability. Students thus selected and appointed may be appointed Distinguished AFROTC Graduates upon graduation provided they have continued to display essential qualities. Distinguished AFROTC Students may apply for an appointment in the Regular Air Force during the first semester of their first class year. Distinguished Air Force ROTC Graduates, who are Distinguished AFROTC Students, who do not apply for appointment in the Regular Air Force in the first semester of their first class year, may apply for Regular Air Force Commissions upon completion of one year active duty and will be given special consideration.

The 103rd Field Artillery Award was established by the veteran organization of that regiment as a trophy to be won each year by the company of cadets which has attained the best record in discipline.

The J. D. Sehorne Trophy is awarded annually to the platoon winning the platoon drill competition.

The Association of U.S. Army Medal is donated by the Association of the United States Army and awarded annually to the outstanding Army second class ROTC cadet.

The South Carolina Reserve Officers Association Awards are donated annually by the South Carolina Reserve Officers Association and awarded to both the outstanding army ROTC second class cadet and Air Force ROTC second class cadet for demonstrated leadership ability, moral character, academic, and other activities.

Armed Forces Communications and Electronic Association Awards are donated and awarded annually to both the outstanding Air Force and Army ROTC first-class cadet majoring in electrical engineering.

The South Carolina Sons of American Revolution Awards are donated and awarded annually to the outstanding Army and Air Force first-class cadets selected on the basis of leadership ability, soldierly bearing, and excellence in theoretical studies.

A Certificate of Meritorious Leadership Achievement is awarded annually by the Commanding General, Third United States Army, to a graduating cadet selected on the basis of leadership development throughout his ROTC career.

The Major William M. Hutson Award is presented annually by Colonel and Mrs. J. C. Hutson in memory of their son, Major William

M. Hutson, USAF, Class of 1939, to a rising senior selected for outstanding leadership ability, academic standing, and devotion to duty.

The Superior Cadet Ribbon Awards are awarded annually by the Department of the Army to the outstanding Army ROTC cadet in each academic class.

The Chicago Tribune Award is presented annually to the outstanding member of each AFROTC class, fourth-class through first-class.

The National Defense Transportation Association Award is presented annually to a first-class AFROTC cadet, majoring in business administration, who qualifies for the Air Force specialty of air or surface transportation officer.

The Convair Cadet Award donated by the General Dynamics Corporation, Convair Division, to The Air Science 2 cadet showing outstanding ability in the AFROTC program.

The 444th Fighter Interceptor Squadron Award is awarded to the AFROTC cadet who has displayed the greatest interest in aviation and has shown outstanding qualities of leadership and military aptitude.

The Armor Association Award is given annually to the outstanding graduate commissioned in Armor.

The American Ordnance Association Key is given annually to the outstanding Army first classman commissioned in the Ordnance Corps.

The Air Force Association Award is presented each year to the outstanding first class AFROTC cadet based on the recommendation of the PAS.

The Washington Light Infantry Marksmanship Trophy and Medals consists of a trophy awarded annually for one year to the organization whose team makes the highest score in small-bore rifle marksmanship; silver medals are awarded to the members of the winning team and a gold medal to the cadet making the highest individual score. All are presented by the Washington Light Infantry.

The Wade Hampton Saber is awarded annually by the South Carolina Division, U. D. C., to the member of the first-class who has attained the highest standing in military or Air Science and Tactics.

**The Star of the West Medal*, originally presented to The Citadel by Dr. B. H. Teague, is awarded annually for one year to the best drilled cadet.

**The W. C. White Medal* is presented annually by Mrs. W. C. White to the captain of the best drilled company.

Daughters of the American Colonists Award is given annually to the first classman with the best disciplinary record during his four years at The Citadel.

General Honors and Awards

The Carlisle Norwood Hastie Award is given to a member of the

graduating class whom his classmates elect as having shown the most tact, consideration, and courtesy to fellow students.

The Algernon Sydney Sullivan Awards are bronze medallions presented by the college, through the benefaction of the New York Southern Society, to students or others in recognition of high thought and noble endeavor; established by that Society in 1925, the awards have been made to The Citadel since 1933.

The John O. Willson Ring. — The bequest of Dr. John O. Willson, a ring is given annually to the member of the first-class voted by his classmates as the manliest, purest, and most courteous member of his class.

The American Legion School Award is donated by the Department of South Carolina American Legion to the first-class cadet displaying conspicuous leadership, citizenship, and true Americanism.

**The Commandant's Cup* presented to The Citadel by the late Lieutenant Colonel W. C. Miller, is awarded annually for one year to the best drilled company.

* Competition held as part of commencement exercises.

DEPARTMENTS OF INSTRUCTION

The Objectives of The Citadel

The objectives of The Citadel, The Military College of South Carolina, are to offer such courses in the liberal arts and sciences as will develop the mind and character of the student, increase his likelihood of success in any useful pursuit, and fit him to discharge the duties of citizenship; to give to students who so desire professional training in Civil Engineering, Electrical Engineering, and Business Administration; to see that its graduates are adequately equipped in their respective fields of concentration to enter in full standing post-graduate, professional, or technical schools; and to qualify them for commissions in the Officers' Reserve Corps of the Armed Forces.

Courses

The course of study is essentially the same for all freshmen except those in engineering, where drawing is taken in place of a modern language. Certain subjects are required in the sophomore year of all students, the remaining subjects being determined by the course which the student is to follow during his junior and senior years. Major work is offered in the following departments: Business Administration, Chemistry, Civil Engineering, Education, Electrical Engineering, English, History, Mathematics, Modern Languages, Physics, Political Science, and Physical Education. Thorough premedical and predentistry courses are available.

A statement of the courses required each year in each department and a detailed description of the various courses will be found in the following pages.

Grades

A, B, C, and D are passing grades. F represents failure. I represents work of a satisfactory character incomplete for acceptable reasons. Any Citadel student permitted to take courses at another college must earn a grade of C or better for transfer credit. All transfer credits are provisional. If a department involved finds within four weeks after classes begin that the student is not prepared to take a course for which the course transferred is a prerequisite, the allowance or credit is withdrawn, and the student must take the prerequisite course at The Citadel.

Grade reports are mailed to parents or guardians at the end of each semester. Mid-semester reports are sent to parents showing the status of the cadet's academic work at that time.

Changes in schedule must be effected during the first ten days of the term. A subject dropped after the first three weeks will receive a grade of F.

Promotions

No student will be promoted who is behind more than eight (8) semester hours of his required number of hours at a given period. In

addition, for advancement to the second class, a student must have accumulated 115 quality points, and for advancement to the first class, he must have accumulated 190 quality points and completed all the courses of the fourth class and third class which are required in his academic major. Exception to this course requirement will be made for the second year in a foreign language required in the third class for those students who transfer from an engineering curriculum at the end of the third-class year.

For purposes of ascertaining quality points and/or grade point ratio (GPR) to determine class standing or promotion, grades shall be weighted as follows: A, 4 points per semester hour, B, 3 points; C, 2 points; D, 1 point; F, zero points. The total of the weighted grades divided by the total credit hours taken by the student is the grade point ratio (GPR).

Minimum Requirements for Continuance in College

Any full-time student who fails to achieve the following minimum requirements shall be required to withdraw from The Citadel:

(1) Credit Hours and Quality Points.

- (a) at least 18 semester hours credit and 27 quality points in the twelve-month period after entrance.
- (b) at least 21 semester hours credit and 36 quality points in the second, third, and fourth twelve-month periods,
- (c) at least qualified as a second classman at the end of the third twelve-month period.

(2) Number of Times Student May Fail A Course:

- (a) A student who has twice failed a semester course in the regular session and has not made up this failure by the subsequent September shall be required to withdraw from The Citadel.
- (b) A student who has failed a semester course three times shall be required to withdraw from The Citadel.

The Dean of Admissions will notify in June all students who have failed to meet the minimum standards that they must make up their deficiencies in summer school in order to be eligible to continue at The Citadel in September.

Any student who is required to withdraw from The Citadel for academic reasons may submit a written request to the Dean of Admissions for readmission after he has made up his deficiencies at an accredited college. Such deficiencies may be made up in summer-school sessions at The Citadel.

Requirements for Graduation

For graduation a student must have completed satisfactorily one of the courses of study as stated in this catalogue. He must also have accumulated twice the number of quality points as the number of semester hours required in his course of study. In addition, during his last two years, he must have accumulated twice the number of

quality points as there are credit hours in those courses to be taken in his department of specialization.

It is also a requisite for graduation that every senior prepare a senior essay on a subject chosen from his field of concentration. This essay is designed as an exercise in the preparation of a formal research paper, measuring up to commonly accepted professional standards, and is wholly apart from the requirements of a particular course in the curriculum. The writing of the senior essay shall be done in residence.

For the sake of uniformity it is recommended that the subject of the senior essay be selected in all departments not later than eight weeks after the opening of college and that the preliminary draft be submitted not more than twenty weeks after the opening of college. The final date for approval of the senior essay shall be two weeks before Commencement.

In addition to the formal credits required for graduation, the candidate must have demonstrated that he is of high character and worthy to receive the diploma of the college. Recommendations for graduation are made by the Academic Board to the Board of Visitors, who in turn award the diplomas.

Requirements for promotion and for graduation for all students who enrolled at The Citadel prior to September 1959 are listed in the 1958-59 Citadel Catalogue. The requirements in the current catalogue apply to students who enrolled in the fall of 1959 and thereafter.

Degrees

The degree of Bachelor of Arts is conferred upon satisfactory completion of the English, History, Modern Language, or Political Science programs of study. The degree of Bachelor of Science is conferred upon satisfactory completion of either the Chemistry, Mathematics, Physics, Education, Physical Education, or the Premedical programs.

The degree of Bachelor of Science in Business Administration is awarded to students who complete satisfactorily the course in Business Administration.

Graduates in Civil Engineering receive the degree of Bachelor of Science in Civil Engineering. Graduates in Electrical Engineering receive the degree of Bachelor of Science in Electrical Engineering.

Classification of Cadets

The cadets are arranged in four distinct classes, corresponding with the four years of study. Cadets pursuing the first year's course constitute the Fourth or Freshman Class; those taking the second year's course, the Third or Sophomore Class; those in the third year's course, the Second or Junior Class; and those in the fourth year's course, the First or Senior Class.

Courses of Study

In the following pages will be found a detailed schedule of the cur-

riculum required for each degree according to the major subject elected. The clock hours and the credit value of each course are noted. The individual courses are described under the appropriate departmental heading in the pages following the schedules.

The biology and geology courses are given in the Department of Chemistry; the drawing, in the Department of Civil Engineering; the psychology, philosophy, and sociology, in the Department of Education.

The courses of the fourth class are numbered from 101 upward, of the third class from 201 upward, of the second class from 301 upward, and of the first class from 401 upward.

DEPARTMENT OF AIR SCIENCE

Professor: Crouch

Assistant Professors: Wells, Ruggiero, Goeken, Blair, Rose, Simonet, Weickhardt, McVeigh, Brown.

The Department of Air Science is responsible for the operation of the Air Force Reserve Officer Training Corps (AFROTC) program at The Citadel. The mission of the AFROTC is to instill in selected cadets, through a continuing program of instruction and training, those qualities of leadership, integrity, devotion to duty and other attributes essential to their progressive advancement to positions of increasing responsibility as commissioned officers in the United States Air Force (USAF).

All students at The Citadel are required by South Carolina law to take 4 years of either Army or Air Force ROTC; however, not all cadets earn the privilege of being commissioned an officer in the Armed Forces. Cadets with prior ROTC training should notify the Department of Air Science as soon as possible so that credit, if appropriate, may be granted.

Those cadets who meet all the qualifications may be formally enrolled in AFROTC and offered a reserve commission upon graduation. Others not formally enrolled will continue to take AFROTC for academic credit. Outstanding cadets designated as Distinguished Air Force Cadets may apply for a Regular Air Force Commission during their First Class (Senior) year.

The AFROTC course of instruction is divided into two parts. The first two years comprise the *Basic Course*, and the last two years, including a four-week summer training course at an Air Force Base, comprise the *Advanced Course*. All basic students are required to apply for the Advanced Course.

Formal Enrollment Requirements*Basic Course*

1. U. S. citizenship
2. Physically qualified - The most frequent disqualifying item is eye condition.

Some of minimum acceptable vision standards are:

Pilot - 20/20 uncorrected in both eyes

Navigator - 20/50 correctable to 20/20 in both eyes

Non-Rated - 20/400 correctable to 20/30 in one eye and 20/40 in other.

An Air Force physical examination is given at the beginning of 3rd class (sophomore) year.

3. Satisfactory academic standards maintained with class.
4. Good moral character (Convictions by civil or military court for offenses other than minor traffic violations are disqualifying; excessive minor traffic violations may also cause disqualification.)

5. Signed certificate of loyalty to U. S. Government.

Advanced Course (Selection Competitive)

1. Complete Basic Course.

2. Pass physical requirements (Second physical examination given during Summer Training).

3. Pass Air Force Officer Qualifications Test (AFOQT), (Administered during 4th class year).

4. Agree to serve on active duty for 5 years if qualified for pilot or navigator. Other categories - 4 years.

5. Maintain good standing academically - to graduate with class.

6. Possess and demonstrate exemplary code of ethics and conduct.

7. If not physically qualified for pilot or navigator, cadets may qualify for a commission in a technical or non-technical area depending on their academic major.

Pay—See ROTC Allowances on Page 66.

Course of Instruction

101, 102. *Air Science 1, First Year Basic* Two Credit Hours

Introduction to AFROTC (2 Hours)

Elements and Potential of Aerospace Power (20 Hours)

Air Vehicles and Principles of Flight (20 Hours)

Military Instrument of National Security (12 Hours)

Professional Opportunities in the USAF (6 Hours)

Leadership Training Laboratory (160 Hours)

Classes meet two hours per week.

201, 202. *Air Science 2, Second Year Basic* Two Credit Hours

Fundamentals of Aerospace Weapons (50 Hours), Systems to include the study of missiles, propulsion systems, nuclear weapons, operations of the Strategic Air Command, and Astronautics.

Contemporary Military Thought (10 Hours)

Leadership Training Laboratory (160 Hours)

Classes meet two hours per week.

301, 302. *Air Science 3, First Year Advanced* Four Credit Hours

The Air Force Staff Officer (60 Hours)

Leadership Seminar (40 Hours)

Military Justice System (15 Hours)

Preparation for Summer Training (5 Hours)

Leadership Laboratory (160 Hours)

Classes meet four hours per week.

Summer Training

Normally all formally enrolled AFROTC Cadets upon completion of Air Science 3 are required to attend Summer Training at an Air Force Base. This course is made up of four weeks of intensive training and indoctrination into the Air Force. Training is carried out through observation and participation rather than through formalized instruction.

Major areas of instruction are:

1. Aircraft and Air Crew Indoctrination (58 Hours)
2. Military Fundamentals (56 Hours)
3. Physical Training (20 Hours)
4. Organization and Functions of Air Force Base (12 Hours)
5. Weapons and Marksmanship (9 Hours)

401, 402. *Air Science 4, Second Year Advanced* Four Credit Hours

Weather and Navigation (30 Hours)

International Relations (30 Hours)

Military Aspects of World Political Geography (45 Hours)

The Air Force Officer (15 Hours)

Leadership Laboratory (160 Hours)

Classes meet four hours per week.

Professor: Lewis

Associate Professors: Tibbetts, Debnam, Mettler, Adden, Young

Assistant Professors: Lucas, Wilson, Masters, Infinger, Bunch, Kuhlman, Stockton, Whitney, Phillips, Marjenhoff

Modern business has become so large in the size of industrial units and so complex in organization that a mastery of its theory and practice can no longer be acquired through apprenticeship. Today no single industry or business can give so adequate a training to its beginners as can be obtained in the department of business administration of a good college. Such college training is now considered the best method of equipping a man for success as a business and economic leader.

The purpose of the Department of Business Administration is to prepare the student to take his place in a business enterprise with such general knowledge of business that he can forego many of the years of experience which would be required of an apprentice, to prepare him to enter in full standing the graduate schools of business administration, to pursue further professional business studies, and to take his place in economic society as does a professional man in other fields of endeavor with sufficient knowledge to make sound decisions on economic problems.

The courses described below are not all pure business courses; rather they are designed to offer instruction in subjects commonly given in schools of arts and science, in schools of social science, and in schools of business administration.

201. *Economic Origins and Principles* Three Credit Hours
Required of all Business Administration Sophomores.

A study of the origins of capitalism and the development of economic institutions; an introduction to economic principles, including an analysis of supply and demand and of the pricing process under various forms of competition.

202. *Economic Principles and Problems* Three Credit Hours
Required of all Business Administration Sophomores.

A study of income distribution, money and banking, government finance, international economic relations; the problems of labor, agriculture, transportation, large-scale production, and other contemporary economic problems.

Prerequisite: B. Ad. 201.

203. *Raw Material Wealth* Three Credit Hours
Required of all Business Administration Sophomores.

A study of how wealth comes into existence from raw materials; the location, the quantity, the quality, the values before and after manufacturing; manufacturing processes; relative importance to economic society.

204. *Business Psychology*

Three Credit Hours

Required of all Business Administration Sophomores.

Applied psychology as an aid to the business executive; statistical measures as an aid to the psychologist; vocational psychology; hiring and promotion of the employee; the psychological factor in the business cycle; the psychology of granting credit, selling advertising, and market research.

303. *Accounting Principles and Practices*

Three Credit Hours

Required of all Business Administration Juniors.

A study of the fundamentals of accounting, including the analysis and recording of business transactions and the preparation of financial statements for individuals, partnerships, and corporations; practical problems given in the laboratory. Lecture: two hours; laboratory: two hours.

304. *Advanced Accounting Theory and Practice*

Three Credit Hours

Required of all Business Administration Juniors.

An analysis of the balance sheet and the profit and loss statement with particular emphasis in the technique of evaluation of items comprising these statements; practical problems given in the laboratory. Lecture: two hours; laboratory: two hours.

Prerequisite: B. Ad. 303.

305. *Business Law*

Three Credit Hours

Required of all Business Administration Juniors.

A discussion of the law which relates to the business man: contracts, agency, negotiable instruments, business association, sales, bailments, security relations, real property, and the like; discussion of court decisions in actual cases to supplement the class work.

Prerequisite: B. Ad. 202.

306. *Business Organization*

Three Credit Hours

Required of all Business Administration Juniors.

The legal relations of a business unit; kind of organization best adapted to various sorts of business activity; internal organization for maximum efficiency; the legal nature of mortgages, bonds, stocks; a study of combinations as administrative units.

Prerequisites: B. Ad. 303 and 305.

307. *Principles of Labor*

Three Credit Hours

Required of all Business Administration Juniors.

An analysis of the worker's position in modern industry and the effects of industrial production on the worker's social position; introduction to the problems of wages, hours, working conditions, child labor, industrial accidents, unemployment, trade unions, and collective bargaining; economic problems of the worker under current labor legislation. Prerequisite: B. Ad. 202.

308. *General Insurance*

Three Credit Hours

Required of all Business Administration Juniors.

A course in predictable business risks and the methods of minimizing

these risks through insurance; intelligent planning of a program of insurance for personal needs and business responsibilities; contract forms, coverages, and rates of life, fire, casualty, marine insurance, and fidelity and surety bonds.

309. *Marketing*

Three Credit Hours

Required of all Business Administration Juniors.

The business activities' necessary to effect the physical distribution of goods from the producer of the raw materials to the consumer; the marketing institutions; a study of the marketing functions and some marketing problems such as price policies and price maintenance, brands, marketing costs and efficiency.

Prerequisite: B. Ad. 202 and 203.

310. *Foreign Trade*

Three Credit Hours

Required of all Business Administration Juniors.

The channels of distribution used in exporting and importing, the theory of international trade, foreign trade promotion activities; the commercial organization and policies governing foreign trade practices; trade methods and problems; financial arrangements.

Prerequisite: B. Ad. 309.

311. *Government Finance*

Three Credit Hours

Required of all Business Administration Juniors

A study from the point of view of the businessman of the amount and purposes of government expenditures; scope of government financial activity; public budgets; principles of public borrowing; sources of revenue; theories of tax distribution; general principles and practices of the property tax, commodity taxes, corporation, and other business taxes.

Prerequisite: B. Ad. 202.

312. *Taxation*

Three Credit Hours

Required of all Business Administration Juniors.

A study of the basic principles of income taxation, including a thorough analysis of the present federal law dealing both with persons and corporations; a survey of social security taxes, death taxes, and gift taxes.

Prerequisite: B. Ad. 311.

401. *Industrial Accounting*

Three Credit Hours

Required of all Business Administration Seniors.

An elementary course in the principles of industrial accounting, including the accounting for materials, labor, and overhead under the job-order process, and standard cost systems; practical problems given in the laboratory. Lecture: two hours; laboratory: two hours.

Prerequisite: B. Ad. 304.

402. *Advanced Accounting Problems*

Three Credit Hours

Required of all Business Administration Seniors.

A study of advanced accounting problems, including the technical procedures in the organization and liquidation of partnerships; special prob-

lems in mergers and consolidations, estates, trusts, and receiverships; practice problems done in the laboratory. Lecture: two hours; laboratory: two hours.

Prerequisite: B. Ad. 401.

403. *Corporation Finance*

Three Credit Hours

Required of all Business Administration Seniors.

The manager's problem in securing, disposing of, conserving and using the finances of his business; the legal and practical uses of bond, stock, circulating capital; development of policies regarding dividends, surplus, income, expenses, and capitalization in relation to the size of the business unit and type of integration.

Prerequisite: B. Ad. 304 and 306.

404. *Investments*

Three Credit Hours

Required of all Business Administration Seniors.

Analysis of government, state, municipal, public utility, railroad, and industrial securities; discussion of the tendency to regard stocks as investments; the tests of a good investment applied to securities to give the untrained person an awareness of the nature of his investments and the protection available to him.

Prerequisite: B. Ad. 304 and 403.

405. *Sales Administration*

Three Credit Hours

Required of all Business Administration Seniors.

The sales problems of retailers, wholesalers, and manufacturing concerns; merchandising policy and research; functions of the various departments connected with sales activities such as credit, traffic, and advertising; selection and training of salesmen; operation of sales branches; sales promotion as dealing with selling methods, advertising, and the planning of sales campaigns.

Prerequisite: B. Ad. 310.

406. *Transportation*

Three Credit Hours

Required of all Business Administration Seniors.

A study of the services rendered in the movement of goods by all forms of transportation; rate making; discrimination; competition; co-operation; administration; terminals; and the general effects of these problems on carriers, shippers, and the public.

Prerequisite: B. Ad. 202 and 405.

407. *Money*

Three Credit Hours

Required of all Business Administration Seniors.

The nature and functions of money; the various monetary standards; the development of our monetary system; the factors affecting the value of money; methods and objectives of money and credit control; international exchange; analysis of recent developments in money and credit.

Prerequisite: B. Ad. 202.

Well-trained voices constitute The Citadel Choir which was initially formed in 1931 as The Citadel Glee Club to participate that year in the college's "Pass-in-Review Show," a talent show staged for cadet entertainment. Since 1956 the choir has been under the direction of Mr. Vernon Weston, prominent music teacher and director of music in Charleston. In addition to its regular appearance each Sunday as part of the cadet service held in Summeral Chapel, the choir has become somewhat of a local institution through numerous performances in various churches in Charleston.

408. *Banking***Three Credit Hours**

Required of all Business Administration Seniors.

A study of the functions, management and operation of commercial banks; the development of banking in the United States; the policies of the Federal Reserve Banks as they relate to the volume of physical production, the national income, and the price level; the relation between commercial banks and investment institutions; organization, operation, and economic effects of the Federal Reserve System; effects of recent changes in banking.

Prerequisite: B. Ad. 407.

409. *Personnel Management***Three Credit Hours**

Required of all Business Administration Seniors.

The principles and practices in the management of employees, introducing positive stimuli into industrial endeavors and promoting the industrial efficiency of labor, treating such factors as selection and placement, training, job analysis, promotion, turnover, health, morale building, and recreation.

Prerequisite: B. Ad. 307.

410. *Production***Three Credit Hours**

Required of all Business Administration Seniors.

The problems of the production manager; location and design of plants; internal and external transportation; inventory control; methods of measuring activities of personnel; incentives, efficiencies, budgets, and organization.

Prerequisites: B. Ad. 202, 203, 401 and 409.

420. *Senior Essay***Two Credit Hours**

Required of all seniors as a prerequisite to graduation. See page 78.

DEPARTMENT OF CHEMISTRY

Professors: Wideman, Watkins, Steedly, Metcalf

Associate Professors: Wilkinson, Hummers, Ballentine

Assistant Professors: Boase, Durkee, Wixom, Henderson, Browning, Medberry, Smith, Timmerman, Dunmire

The objectives of this department are to offer to all freshmen majoring in the sciences or engineering a course in the fundamentals of general chemistry and to freshmen majoring in the arts a course in the introduction of general chemistry, to provide (for students majoring in chemistry) a course of study which will meet the educational requirements of the American Chemical Society for the professional chemist, to afford to premedical students adequate preparation for admission to standard medical colleges, and to provide a two-year course for students preparing for the study of dentistry.

Chemistry Major

The courses of study for students majoring in chemistry are designed to prepare them to fill positions as chemists in commercial laboratories or as control chemists in industrial plants, and to provide the basic training for them to enroll as graduate students in full standing at the leading universities.

The courses of study embody training in the four fundamental subdivisions of the science: inorganic, organic, analytical, and physical chemistry.

The department occupies nine commodious laboratories, nine lecture rooms, and one large lecture and demonstration room, all located in the west wing of Bond Hall. The laboratories are equipped with modern apparatus, and all of them are well lighted.

The department maintains a centrally-located library with well selected reference books and scientific journals. A complete series of the journals of the American Chemical Society may be found on the shelves of the reading room. Current periodicals and scientific magazines are kept up to date on the reading room tables.

A chapter of Student Affiliates of the American Chemical Society is active at The Citadel.

Students majoring in chemistry are required to take all of the courses offered by the department for Chemistry Majors and also Mathematics 119, 121, and 122; German 101, 102 and 201, 202; and Physics 201, 202.

Premedical Major

The sequence of courses offered to students majoring in premedicine is based upon the requirements of the Association of American Medical Colleges for admission to a standard medical college. A student must not only complete certain prescribed work for admission to a medical college but must show also an aptitude for medical studies. The

Medical Aptitude Test, prepared by the Association of American Medical Colleges, is given at The Citadel each year to all students who expect to apply for admission to a medical college.

Students taking the Premedical Elective course are required to take Chemistry 101, 102, 201, 202, 303, 304, 403, 404, and 405, 406; Mathematics 111, 112; Physics 203, 204 and 305, 306; German or French 101, 102 and 201, 202; English 101, 102, 201, 202; Psychology 303, 304; and Biology 201, 202, 301, 302, and 401. Biology 402 is a recommended elective.

Predental Major

Students who desire to prepare themselves for the study of dentistry are offered a two-year predental course which meets the minimum requirements of the American Association of Dental Colleges for admission to a standard school of dentistry. If the student decides to continue his college training for the Bachelor of Science degree, this curriculum will constitute the first two years of his college work. The courses taken during the last two years must be the same as those required by The Citadel for the Bachelor of Science degree in premedicine. Students who complete the two-year predental course are qualified for admission to a school for veterinarians or to a school of pharmacy.

Students taking the Predental Elective course are required to take Chemistry 101, 102 and 303, 304; Mathematics 111, 112; Physics 203, 204; German, French, or Spanish 101, 102 and 201, 202; English 101, 102, and 201, 202; and Biology 201, 202.

101, 102. *General Chemistry*

Eight Credit Hours

Required of all freshmen majoring in the sciences, engineering, or mathematics.

Theoretical and descriptive chemistry, including the elements of modern chemical theory and discussion of some of the more common industrial processes. Lectures and recitations: three hours a week; laboratory: two hours a week.

103, 104. *Introduction to General Chemistry*

Eight Credit Hours

Required of all freshmen majoring in the arts courses.

A course designed for students majoring in the arts courses who do not expect to take any other course in chemistry. The fundamental principles of chemistry as drawn from the experiences of daily life; less comprehensive than Chemistry 101, 102. Lectures and recitations three hours a week; laboratory: two hours a week.

201. *Qualitative Analysis*

Four Credit Hours

Required of all sophomores majoring in chemistry or premedicine; elective to others.

The separation and identification of the common cations and anions, with emphasis on the theory involved. Lectures: three hours a week; laboratory: three hours a week.

202. *Quantitative Analysis***Four Credit Hours**

Required of all sophomores majoring in chemistry or premedicine; elective to others.

The theory and practice of quantitative analysis, with emphasis upon volumetric determinations. Lectures: two hours a week; laboratory: four hours a week. Prerequisites: Chemistry 101, 102, and 201.

301. *Advanced Quantitative Analysis***Four Credit Hours**

Required of all juniors majoring in chemistry; elective to others.

A rigorous extension of volumetric and gravimetric analysis. Several of the determinations are largely instrumental procedures. Lectures: two hours a week; laboratory: four hours a week.

Prerequisite: Chemistry 202.

302. *Instrumental Methods***Four Credit Hours**

Required of all juniors majoring in chemistry; elective to others.

The student is acquainted with the theory and practice of methods involving such instruments as colorimeters, electrophotometers, spectrophotometers, polarographs, pH meters, titrimeters, electrodeposition apparatus, recorders, vapor phase chromatographs, gamma ray scintillation spectrometer, calorimeters, and other modern instruments including those used for detecting and measuring radioactive materials. Lectures: two hours a week; laboratory: four hours a week.

Prerequisites: Chemistry 202, 301; or permission of the department head.

303, 304. *Organic Chemistry***Eight Credit Hours**

Required of all juniors majoring in chemistry or premedicine; may be taken by students majoring in predentistry in the sophomore year. The aliphatic and aromatic series and heterocyclic compounds; class room discussions, lectures, and laboratory training in general reactions and synthetic methods. Lecture: three hours a week; laboratory: three hours a week.

Prerequisites: Chemistry 101, 102 and 201, 202 for students majoring in chemistry or premedicine and Chemistry 101, 102 with a grade of C or better for students majoring in predentistry.

305, 306 *Physical Chemistry***Eight Credit Hours**

Required of all juniors majoring in chemistry; elective to others.

A study of the properties of solids, liquids, and gases, and of their relation to chemical constitution. Lecture: three hours a week; laboratory: three hours a week.

Prerequisites: Chemistry 201, 202 and Mathematics 121.

308. *Chemical Literature***One Credit Hour**

Required of all juniors majoring in chemistry; elective to others.

An introduction to the effective use of chemical literature. One lecture hour a week.

401, 402. *Inorganic Chemistry***Six Credit Hours**

Required of all seniors majoring in chemistry; elective to others.

A study of the principles and reactions of inorganic chemistry; atomic theory, valence, chemical bonds, the periodic system, acid-base theories, complex ions, radioactivity and nuclear relationships. Lectures: Three hours a week.

Prerequisites: Chemistry 101, 102.

403, 404. *Advanced Topics in Organic Chemistry* Six Credit Hours
Required of all seniors majoring in chemistry or premedicine.

A course designed to familiarize students with the survey of complicated molecules and their reactions thus contributing to their facility for undertaking the study of biochemistry and other complicated fields of organic chemistry. Lecture and recitations; three hours a week.

Prerequisites: Chemistry 303, 304.

405. *Advanced General Chemistry* Three Credit Hours

Required of all seniors majoring in premedicine; elective to others, except chemistry majors.

A comprehensive review of general chemistry with special emphasis on quantitative relations, equilibria, the periodic law, and the relation of chemical behavior to atomic structure. Lecture: three hours a week.

Prerequisites: Chemistry 201, 202.

406. *Physical Chemistry for Premedical Students* Three Credit Hours

Required of all seniors majoring in premedicine.

A course designed to permit students majoring in premedicine and lacking mathematical training to survey the general method of investigation of physical chemistry in quasi-mathematical forms. Lecture: three hours a week.

Prerequisites: Chemistry 201, 202; and Physics 203, 204.

407. *Organic Preparations* Three Credit Hours

Required of all seniors majoring in chemistry.

Advanced organic syntheses and technique with emphasis on purity and yield of products. Lecture: one hour a week; laboratory: four hours a week.

Prerequisites: Chemistry 303, 304.

408. *Qualitative Organic Analysis* Four Credit Hours

Required of all seniors majoring in chemistry; elective to others.

The classification, the study of type reactions, and the identification of pure organic compounds and mixtures of organic compounds. Lecture: two hours a week; laboratory: four hours a week.

Prerequisites: Chemistry 303, 304.

411. *Physical Chemistry Topics* Three Credit Hours

Required of all seniors majoring in chemistry; elective to others.

Further exploration of problems and theory of physical chemistry in areas not fully treated in Physical Chemistry 305, 306. No advance in level of difficulty.

Lectures: three hours a week. Prerequisite: Chemistry 305.

412. *Inorganic Preparations*

One Credit Hour

Required of all seniors majoring in chemistry.

Techniques employed in several widely different inorganic syntheses. Laboratory: two hours a week. Prerequisites: Chemistry 301, 305.

Biology and Geology

No attempt is made at The Citadel to maintain separate departments in these two subjects. The courses are under the supervision of the Department of Chemistry.

The courses in biology offered to students majoring in premedicine meet the requirements of the more exacting medical colleges. However, since biology and geology have made a great contribution to modern philosophy, a knowledge of at least their elemental aspects is a distinct contribution to the general culture of the students. Accordingly, Biology 201, 202 and Geology 301, 302 are made available for election to all upper classmen. Geology 303 is limited to students majoring in civil engineering.

201, 202. *Elementary Biology*

Eight Credit Hours

Required of all sophomores majoring in premedicine or pre dentistry, education and physical education; elective to others.

The various classes of organisms from the standpoint of anatomy, physiology, phylogeny, and ecology; occasional lectures given on some of the broader aspects of the subject such as heredity, cycle of the germ-cell, pathogenic organisms. Lecture: two hours a week; laboratory: four hours a week.

301, 302. *Comparative Vertebrate Anatomy*

Eight Credit Hours

Required of all seniors majoring in premedicine.

Comparative anatomy of vertebrate forms. Lecture: two hours a week; laboratory: four hours a week.

Prerequisites: Biology 201, 202.

303. *Human Biology: Anatomy*

Three Credit Hours

Required of juniors majoring in physical education.

The structure of the body considered, with special emphasis upon the skin, musculature, and the skeleton. Lecture: three hours a week. Prerequisites: Biology 203, 304.

304. *Human Biology: Physiology*

Three Credit Hours

Required of juniors majoring in physical education.

A consideration of human physiology from a practical point of view; the processes of digestion, assimilation, elimination, circulation, respiration, excretion, and reproduction considered. Lecture: three hours a week.

Prerequisites: Biology 203, 204.

401. *Embryology*

Four Credit Hours

Required of all seniors majoring in premedicine.

Embryology of representative vertebrates, including the amphibian and

bird, with additional material on mammals. Lecture: two hours a week; laboratory: four hours a week.

Prerequisites: Biology 301, 302.

402. *Descriptive Histology*

Three Credit Hours

Elective to all seniors majoring in premedicine or predentistry.

Histology of mammalian tissue with descriptive function of each; practical work in the identification of vertebrate tissue and occasional lectures on microscopic technique. Lecture: two hours a week; laboratory: two hours a week.

Prerequisite: Biology 301, 302.

301, 302. *Elementary Geology*

Six Credit Hours

Elective to all juniors and seniors.

The various processes, such as crust movements, igneous influences, weathering, erosion, denudation, and transportation which have been instrumental in shaping the earth; the composition, structure, and arrangement of igneous and sedimentary rocks; and a survey of the historical aspects. Lecture: three hours a week.

303. *Engineering Geology*

Four Credit Hours

Required of and limited to juniors majoring in Civil Engineering.

The origin and occurrence of the three major groups of rocks, their composition, resistance to weathering, and employment in engineering construction, the various processes of dynamic geology considered with special reference to their application to engineering practice. Lecture: three hours a week; laboratory: two hours a week.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 78.

DEPARTMENT OF CIVIL ENGINEERING

Professor: Himelright

Associate Professors: Hutto, Myers, Causey, Mellard

Assistant Professors: Key, Middleton, Rutland, Robinson, Ingram

The objective of this department is to give a course that will meet the basic educational requirements of the profession of civil engineering. This objective is sought through a co-ordinated program of liberal, scientific, and technological courses designed to broaden and enrich the student's general education as well as to lay the foundation for technical competence.

Recent curriculum changes have been made in order to increase the number of liberal arts courses so that students may achieve a well rounded general education.

The program in the freshman class does not differ essentially from liberal arts programs in most undergraduate courses. In the sophomore class, limited specialization begins with the introduction of courses in surveying, analytic mechanics, and graphic statics. In the junior and senior years the time is devoted essentially to basic professional courses. Throughout the four years the program is taught with the primary emphasis upon inculcating habits of orderly study, investigation, and sound reasoning rather than upon the mere acquisition of factual information. Constant attention, too, is given to engineering procedure in its wider

sense, that is, the characteristic methods by which engineers conceive, design, and construct engineering projects.

Such a curriculum, ably taught, should prepare the better students to develop a mastery of such special fields as their subsequent employment may lead to, or to pursue more advanced work in the graduate schools of engineering. In general educational value, if properly adapted to the student's interests and aptitudes, it should meet the educational demands of good citizenship in whatever field the graduate enters.

The new concept of the engineer is that of a professional man thoroughly grounded in technology but also alive to the social and economic implications of his professional activities. It clearly appears to be the duty of engineering schools to fashion their graduates in this mold in so far as time limitations will permit.

The civil engineering curriculum is accredited by the Engineers' Council for Professional Development.

There is a successful student chapter of the American Society of Civil Engineers.

For students having an especial interest in highway engineering there is a student chapter of The American Road Builders Association.

DEGREE: The degree of Bachelor of Science in Civil Engineering (B.S. in C.E.) is awarded to those who successfully complete the program of studies on page 82.

BUILDINGS: The department is housed in its own buildings on the north of the campus. The main building was designed specifically for the needs of civil engineering instruction, and it contains the necessary laboratories, drafting rooms, classrooms, and other rooms needed to carry on the work of the department. An auxiliary building houses a portion of the soils laboratory. In addition this department has classrooms and a drafting room in the Physical Education Building.

JOHN ANDERSON MEMORIAL LIBRARY: The department maintains a small but well selected and arranged library that is open to students at all hours. Current copies and files of leading engineering magazines are available in the reading room.

EQUIPMENT: Well equipped laboratories are maintained for work in cement and concrete, bituminous materials, soils, fluid mechanics, sanitary engineering and structural materials. For the work in cement and concrete a curing room with temperature and humidity controls and another room for steam curing are available.

In the concrete laboratory there is an adequate supply of equipment for every student to prepare his individual test specimens. The equipment includes a large supply of molds, platform scales, mixing tables, a two-cubit-foot concrete mixer, concrete block machine, air entrainment apparatus, and the usual minor articles.

In the materials testing laboratory the main items of equipment are a 400,000 pound Baldwin-Southwark universal hydraulic testing machine with a clearance of ten feet for column testing and a 36-inch wide working table; a 60,000 pound Tinius-Olsen hydraulic universal testing machine; a 150,000 pound Olsen screw-power universal testing machine; a 10,000 inch-pound torsion machine; a Rockwell hardness testing machine; a Sonntag fatigue machine; Brinell, cold bend, shearing, and transverse testing attachments, three spherically seated bearing blocks, and a variety of specimen grips for tensile testing; S R-4, Berry Whittemore, Riehle, and G. F. Moore strain gauges; compressometers, deflectometers, and other instruments for measuring deformation; machined bearing blocks and I-beam with adjustable supports for transverse tests. This laboratory is equipped with an overhead crane for handling heavy specimens in any part of the room.

In the bituminous materials testing laboratory there is adequate equipment for making routine tests of asphalt cements, cut-back asphalts and emulsified asphalts as well as tests of road tars. The equipment includes a Saybolt-Furol viscosimeter, an Engler viscosimeter, distillation apparatus, a penetrometer, a Cleveland open-cup flask point apparatus, ring and ball softening point apparatus, a Rotorex extraction machine and float test apparatus. In addition there is a Marshall Stability Testing machine and accessory equipment for design and analyzing asphalt paving mixtures by the Marshall method. Supplemental equipment includes ample glassware, thermostatically controlled electric ovens, constant temperature water bath, a cold water circulating apparatus and cleaning tank with special solvent for quick and easy cleaning of equipment.

The soils laboratories are equipped with both scale and dead-weight consolidometers, triaxial and direct shear machines, unconfined compression machines, permeameters, Atterberg limit equipment, Proctor and modified A.A.S.H.O. compaction apparatus, standard sieves and soil hydrometers, C.B.R. apparatus, and other equipment needed for tests and experiments with soils.

The fluid mechanics laboratory is equipped for a variety of experiments in the flow of water through pipes and orifices and over weirs. Water is supplied by a 500 gpm centrifugal pump to a constant head tank, from which it is distributed to the various test units and returned through floor channels to the pump intake. Equipment includes Venturi meter, orifices, weir, parshall flume, pipe ranges, differential gauges, hook gauges, weighing tanks, and scales.

The sanitary engineering laboratory is equipped for experiments according to "Standard Methods," which represents the current practice for ordinary problems in water and sewage analysis. For water analysis, pH, alkalinity, acidity and bacteriological examinations may be made. For sewage analysis, pH, biochemical oxygen demand, and solids content may be made. The equipment includes: incubator,

muffle furnace, balances, pH meters, and constant temperature refrigerator.

Adequate equipment is available for the courses in surveying. This includes fourteen transits, one micro-optical reading transit, nine levels four plane tables, two sextants, aneroid barometer, several compasses, standardized tapes, and a complete supply of level rods, tapes, and pins. For photogrammetric work there is a rectoplanograph, stereocomparagraph, stereoscopic radial plotter, extended eye base stereoscope, parallax bar, "Lazy Daisy" mechanical triangulation set, forty pocket stereoscopes, thirty-nine height finders and about five hundred aerial photographs of various sections of the United States including a complete stereoscopic coverage of Charleston County, South Carolina. This equipment is used in both the surveying and the photogrammetry courses.

All drafting rooms, laboratories, classrooms, and the library are equipped with fluorescent lighting. Two of the larger classrooms and one drafting room may be darkened at any time to show motion pictures, for which a sound or slide projector is available. The drawing rooms are furnished with tables, and there are available drafting machines, parallel rules, planimeters and necessary minor items. A printing room is equipped with an Ozalid dry printing machine.

A computation room in the center of the building, open to students at all times, is equipped with Monroe calculating machines. This facility has done much to expedite numerical calculations and thus saves much of the students' time.

The electives in the sophomores and junior years must be in the field of humanities and must have the approval of the Department of Civil Engineering. Also the requirements of the department offering the elective must be met.

101, 102. *Drawing and Descriptive Geometry* Four Credit Hours
Required of all Civil and Electrical Engineering Freshmen.

Use and care of drawing instruments; proper weights and types of lines for clear, clean-cut, and complete graphical representation; useful geometrical construction; freehand sketching; orthographic projection; auxiliary, revolved, and sectional views; pictorial representation with emphasis on isometric drawing; dimensioning; true lengths and shapes; intersections and developments; problems on points, lines, and planes to be solved by the method of auxiliary planes in third angle projection; also specifications of fastenings, welding symbols, piping and electric diagrams, and typical engineering drawing of reinforced concrete buildings. Problems selected with a view to emphasizing practical applications and developing the ability of the student to think in three dimensions. Development of reasonable skill in lettering. Laboratory four hours.

202. *Analytic Mechanics and Graphic Statics* Three Credit Hours
Required of all Civil Engineering Sophomores.

Analytic and graphic solution of problems in statics: principles of statics;

resultants, reactions, and equilibrium of forces; analysis of simple beams and trusses; friction. Laboratory period used for graphical solutions. Lecture: two hours; laboratory: two hours.
Prerequisites: Phys. 201, eligible for Math. 122.

204. *Photogrammetry* One Credit Hour
Required of all Civil Engineering Sophomores.

An elementary course in aerial photography and topographic mapping; methods of topographic projection; planning topographic flights; basic photo-interpretation; geometric properties of photographs; radial line plotting; photographic measurements. Laboratory: two hours.
Prerequisites: C.E. 205, Concurrent with Surveying 206.

205, 206. *Surveying* Eight Credit Hours
Required of all Civil Engineering Sophomores.

Linear measurements; leveling; compass and transit; slide rule and calculating machines; theory of errors; land surveying; boundary laws; latitudes and departures; areas and volumes; stadia; plane table; route surveys; vertical, circular and transition curves; state plane coordinates. Required student equipment: "loglog" duplex slide rule. Lecture: three hours; field: two hours.
Prerequisites: Concurrent with or following Math. 122.

301. *Analytic Mechanics* Four Credit Hours
Required of all Civil Engineering Juniors.

Statics and dynamics: centroids and centers of gravity; moment of inertia; principles of dynamics; rectilinear translation; curvilinear translation; rotation; work and energy; impulse and momentum. Lecture: four hours.
Prerequisites: C.E. 202, Math, 122.

303. *Mechanics of Materials* Four Credit Hours
Required of all Civil Engineering Juniors.

Elastic properties of structural materials; internal stresses and strains in beams, columns, shafts; riveted and welded joints; shear and moment diagrams; combined bending and direct stress. Supplemented by materials Laboratory, C.E. 307, which is to be taken either before or concurrently with CE 303. Lecture: four hours.
Prerequisites: Math. 122; C.E. 202.

304. *Mechanics of Materials* Three Credit Hours
Required of all Civil Engineering Juniors

Deflection of beams; unsymmetrical bending; principal stresses; Fundamental theory and principles of pre-stressed concrete. Lecture: three hours.
Prerequisites: Math. 220; C.E. 303.

305. *Highway Engineering* Three Credit Hours
Required of all Civil Engineering Juniors.

Highway economics; road costs and road user costs; economic comparison of alternates by benefit-cost ratio method; planning and

financing; legislation and administration; location and geometric design; basic principles of traffic surveys; method of predicting future traffic volumes; basic highway soils engineering; drainage; grading. Lecture three hours.

Prerequisites: C.E. 206.

306. *Highway Engineering*

Three Credit Hours

Required of all Civil Engineering Juniors.

Alignment and earthwork drawings and computations; routine tests of highway materials, bituminous and non-bituminous; pavement and base thickness design; design and testing of asphalt paving mixtures; construction of roadway elements; construction surveys; contracts and specifications. Lecture: two hours; laboratory; two hours.

Prerequisite: C.E. 305.

307. *Materials Laboratory*

One Credit Hour

Required of all Civil Engineering Juniors.

Laboratory supplement to Mechanics of Materials C.E. 303. Introduction to the use of testing machines and equipment; strength and deformation measurements of ferrous metals and concrete; properties of materials as determined by test results; compression, tensile and bending specimen tests; use of SR-4 electric strain gauge; use of ASTM Specifications and Test Procedure. Laboratory: three hours.

Prerequisites: C.E. 202; Math. 122, concurrent with C. E. 303.

308. *Structural Analysis I*

Three Credit Hours

Required of all Civil Engineering Juniors.

Analytic analysis of simple structures: force systems in space; shear and moment for static and moving loads on beams and trusses; forces in various types of statically determinate framed structures; influence line diagrams; plastic theory and analysis of elementary structures.

Prerequisites: C.E. 301, C.E. 303, Math. 220.

310. *Engineering Law and Specifications*

Three Credit Hours

Required of all Civil Engineering Juniors.

An elementary course in law in relation to engineering practice, beginning with a brief study of the Constitution of the United States; contracts, agency, real and personal property, sales, mechanic's liens, workman's compensation laws; construction contract documents; advertising and awarding contracts; writing and interpretation of standard specifications. Lecture: three hours.

Prerequisite: Completion of all Freshman Work, English 202, & Surveying 206.

401. *Concrete Laboratory*

Two Credit Hours

Required of all Civil Engineering Seniors.

Design, preparation and testing of portland cement concrete mixes for a desired quality of concrete using both plain portland cement concrete and concretes containing the various commonly used admixtures; test specimens cured under controlled temperatures and moisture con-

ditions; close attention given to the influence of the quality and grading of the aggregates and to other features affecting the properties of the concrete ultimately forming a structure; the fundamentals of making concrete masonry building units studied by making blocks from various "damp" mixes in a vibrating type block machine. Lecture: one hour; laboratory: two hours.

Prerequisite: C.E. 307.

402. *Soil Mechanics Laboratory..*

Two Credit Hours

Required of all Civil Engineering Seniors.

Classification, control, and soil strength tests to predict suitability of soil for use in earth dams, roads, and foundations; to include specific gravity, combined mechanical analysis, Atterberg limits, permeability, compaction, unconfined compression, consolidation, triaxial, direct shear, and C.B.R. tests; field tests to consist of field density tests, soil borings, and load tests. Lecture: one hour; laboratory: two hours.

Prerequisites: C.E. 401; C.E. 410 to be taken concurrently.

403-404. *Reinforced Concrete Design*

Six Credit Hours

Required of all Civil Engineering Seniors.

Theory and design of reinforced concrete structures, including the ultimate theory as applied to beams and columns. Design of footings; retaining walls; combined stress members; theory and design of prestressed concrete structures; design of selected portions of concrete buildings and bridges with special attention to current specifications for design and construction. Lecture: three hours.

Prerequisites: C.E. 304, C.E. 308.

405. *Structural Analysis II*

Four Credit Hours

Required of all Civil Engineering Seniors.

Theory of statically indeterminate structures, using method of work, three moment theorem, slope deflection, moment distribution; analysis of multistoried steel frame building.

Prerequisites: C.E. 304, C.E. 308.

406. *Steel Design*

Four Credit Hours

Required of all Civil Engineering seniors.

Two different philosophies of analysis and design: First, by the elastic theory, the design of tension and compression members, beams, plate girders; analysis and design of highway bridge trusses; analysis, design, and structural drawing of a steel mill building. Secondly, by the plastic theory, the analysis and design of continuous beams and single-story rigid frames.

Prerequisite: C.E. 405.

407. *Fluid Mechanics*

Four Credit Hours

Required of all Civil Engineering Seniors.

Fluid characteristics, properties and definitions; fluid statics; fluid dynamics; fluid flow and measurements, and application in meters, orifices, weirs, pipes, and open channels; laboratory period for experimental

demonstration of theory and for supervised computation work.

Lecture: three hours; laboratory: two hours.

Prerequisite: C.E. 301.

408. *Sanitary Engineering*

Three Credit Hours

Required of all Civil Engineering Seniors

Relationship of water supply and sewage disposal to public health; hydrology; water consumption; quality standards; collection, treatment and distribution of water; sewers and sewerage; quantity and characteristics of sewage; methods of treatment and disposal of sewage; laboratory period for experimental demonstration of theory and for supervised computation work. Lecture: two hours; laboratory: two hours.

Prerequisites: Completion of all work of the junior year and C.E. 407.

409, 410. *Soil Mechanics and Foundations*

Six Credit Hours

Required of all Civil Engineering Seniors.

Soil physics; nomenclature and field identification; grain shape and soil structure; classification systems; soil capillarity; Atterberg limits; permeability; seepage; flow nets; piping; subsurface drainage; frost action; permafrost; stresses in soils; consolidation; shear strength; stability of slopes; earth dams; bearing capacity; shallow foundations; pile foundations; earth pressure; retaining walls and open cuts; underpinning; caissons and cofferdams; subsurface exploration; soil stabilization. Lecture: three hours.

Prerequisites: Geol. 303, C.E. 304, C.E. 301, C.E. 306, C.E. 402 to be taken concurrently with C.E. 410. C.E. 407 to be taken concurrently with or preceding C.E. 409.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 78.

DEPARTMENT OF EDUCATION

Professor: Blanding

Associate Professors: Agee, Wimpey

Instructors: Lenhardt, Weston

1. TEACHER-TRAINING

The Department of Education provides professional training for students who plan to teach in secondary schools. The curriculum meets the requirements for South Carolina teacher certification and the requirements of most other states.

The department also offers elective courses, which are available to majors in other departments, in the related fields of psychology, sociology, philosophy, and fine arts.

THE EDUCATION MAJOR

The following professional courses, in addition to the elective and basic courses listed on page 83, are required in the Education Major:

301. *Philosophy of Education*

Three Credit Hours

An orientation course; a survey of the history, philosophies, and theories underlying organized education; the significance of the dissemination of knowledge in a democracy.

303. *Guidance*

Three Credit Hours

Philosophy, principles, and techniques to provide teachers with competencies needed for participation in guidance programs; theories and practices of guidance; mental, vocational, and aptitude testing.

306. *Educational Tests and Measurements*

Three Credit Hours

Theories, principles, and practices of mental and educational measurements. The construction and use of the various types of objective instruments of evaluation. Elements of statistics needed in the interpretation and use of examination results.

400. *Directed Teaching*

Six Credit Hours

A requirement for certification; observation and teaching in approved high schools under approved supervisory teachers; supervision by college instructor.

To avoid scheduling difficulties, the student should reserve two hours in his daily schedule (the same two hours every day) for this teaching experience. The student is required to provide his own transportation. Limited to seniors majoring in Education.

401. *Methods and Materials of Secondary School Teaching*

Three Credit Hours

Study of the aims, methods, and materials employed in secondary school teaching; organization of subject-matter; motivation and direction of learning; development of attitudes, appreciations and ideals; class-

room presentation of formal materials; conducting informal activities; provision for individual differences; measuring educational outcomes; reports discussion.

402. *Principles and Problems of Secondary Education* Three Credit Hours

Definition and analysis of issues in American secondary education; the principles most applicable to the solution of these problems; the aims, curriculum, scope, and organization of the secondary school. Secondary education in a changing America; the impact of world conditions upon the secondary school; American secondary schools and the future.

403. *Seminar in Secondary Education* Three Credit Hours

Definition and discussion of principles, methods, and problems arising from experience in directed teaching; consideration of practical problems of secondary school teaching and administration; discovery of specific professional interests; observation of teaching; reading and observation reports.

Limited to seniors who will take Directed Teaching

407. *Audio-Visual Aids* Three Credit Hours

The aims and scope of audio-visual instruction; techniques underlying their use; projects and practice in the uses of objects, specimens, models, and pictures; the opaque projector, the motion picture, film strips, and slides; radio, television, the public address system, and the various types of recorders; selection and care of equipment; administration and supervision of the audio-visual program.

420. *Senior Essay* Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 78.

II. RELATED FIELDS

In addition to the electives listed below, any of the Education courses except *Directed Teaching* and *Seminar in Secondary Education*, may be elected by qualified students in other departments.

Psychology

201. *Educational Psychology* Three Credit Hours

Heredity, maturation, and environment as constituent factors in human nature; the nervous system as the basis of experience and behavior; individual differences; intelligence; learning; interest; principles and practices of effective learning; psychological approaches to pupil behavior; the psychology of teaching; motivational factors; attention and perception; emotion; *gestalt* concepts; attitudes, beliefs, and habits; tests and measurements; mental discipline and transfer; mental health.

202. *Psychology of Adolescence* Three Credit Hours
Required of Education majors.

The physical, psychological and social development of the adolescent;

emphasis on personality formation and problems of social adjustment.

303. *General Psychology*

Three Credit Hours

Elective for juniors and seniors. Required of premedical students.

An introduction to the scientific study of human behavior; emphasis upon experimental investigation of such fields as attention, perception, learning, intelligence, emotion, personality.

304. *Abnormal Psychology*

Three Credit Hours

Required of premedical students.

Findings based upon experimental investigation of such fields as attention, perception, and association; theories of personality; discussion of the common neuroses and psychoses.

Prerequisite: Psychology 303.

305. *Social Psychology*

Three Credit Hours

A study of the individual in relation to his social environment with special attention to group behavior, social motivation, and individual adjustment to group situations. May be considered a social science course.

307. *Mental Hygiene*

Three Credit Hours

Science of preserving psychological health. The causes and prevention of mental abnormalities.

404. *Applied Psychology*

Three Credit Hours

Application of the principles of psychology to such topics as education, mental health, industry, crime, advertising, and personal problems. Emphasis will be upon a practical system of psychology and the well integrated personality.

Philosophy

306. *Logic*

Three Credit Hours

The principles of valid thinking; laws of reasoning; common fallacies; deductive and inductive methods.

307. *Ancient Philosophy*

Three Credit Hours

A brief survey of Greek philosophy; primarily a study of Plato's *Republic* and Aristotle's *Politics*.

308. *Medieval and Early Modern Philosophy*

Three Credit Hours

A study of the ideas most important to the contemporary world which developed in the period from the fourth to the eighteenth century. These will include the philosophies associated with the medieval church, the Renaissance and Reformation, the rise of scientific thought and rationalism, and the eighteenth century enlightenment.

309. *Modern Philosophy*

Three Credit Hours

A study of some of the most important and representative ideas of the nineteenth and twentieth centuries. For example, these will in-

clude conservatism, liberalism, Darwinism, nationalism, Nazism, and communism.

Sociology

301. *Introduction to Sociology* Three Credit Hours

The scientific study of principles and comparisons in society and culture as these relate to population and communities, behavior systems, group collectivity and structure, social change and institutions.

302. *Social Problems* Three Credit Hours

A study of the breakdown of society in its various forms with consideration of the causation as well as the resultant problems; special emphasis given to contemporary problems such as the broken family, juvenile delinquency, unemployment, and individual personality maladjustment.

303. *The Contemporary American Family* Three Credit Hours

A frank and comprehensive analysis of the problems confronting the modern American family, with case studies treating the various phases of conflict within the family.

401. *Criminology* Three Credit Hours

A study of crime, its causes, conditions, prevention, and treatment; a presentation of theories and hypotheses, supported by concrete facts, designed to assure the student that the theories proposed are based upon realities and exact observation.

Recommended only for students who have had *Introduction to Sociology*.

Fine Arts

305. *Music Appreciation* Three Credit Hours

A non-technical course to enhance the student's understanding and enjoyment of music by a two-fold approach: first, to gain fundamental knowledge of style, content, and form of the more outstanding works of the great composers; and, second, to study the evolution of musical art up to the present time; particular emphasis placed upon the latter.

306. *Art Appreciation* Three Credit Hours

Lectures on the theory and history of art. The theory of abstract principles and material techniques as applied in the evaluation of works of art. The employment of such theory in a chronological study of art history from primitive man to contemporary civilization.

DEPARTMENT OF ELECTRICAL ENGINEERING

Professor: Herring

Associate Professor: Cory

Assistant Professors: Johnson, Griswold

In 1941 the Board of Visitors authorized the establishment of a Department of Electrical Engineering at The Citadel. The department was founded to meet the needs of many students who are attracted to the type of education which The Citadel offers, but who were formerly compelled to go elsewhere to obtain training in the field of their special interest.

A considerable part of the normal curriculum in electrical engineering had long been offered by the Department of Physics for the benefit of students in physics and in civil engineering. Upon the founding of the Department of Electrical Engineering, this work was expanded into a curriculum concordant with the offerings of other engineering colleges, and the laboratory facilities were augmented to provide training leading to the degree of Bachelor of Science in Electrical Engineering.

The first graduating class of eight men received degrees in September, 1948. Since then, the facilities and curriculum have been steadily improved. A chapter of Student Members of the American Institute of Electrical Engineers is active at The Citadel.

It is the purpose of the department to prepare men for professional work or for graduate study in the field of electrical engineering and to give them training in as many of the elements of a broad education as can be included in a program of professional study leading to the degree of Bachelor of Science in Electrical Engineering.

The classrooms and laboratories of the department are located in the east wing of Bond Hall. The electronics laboratory is equipped with custom-built breadboards for the efficient study of vacuum-type tube and transistor circuits. Modern instruments are available for performing tests and making measurements. The recent addition of an X-Y plotter has provided accurate characteristic and response curves in far less time than formerly required. The apparatus used in the electrical measurements laboratory is modern precision equipment made for laboratory and industrial use. An instrument store-room and shop joins the electrical measurements laboratory to the electronics laboratory.

The computer laboratory is combined with a student workroom where electric desk calculators are available for student use. A ten-amplifier analog computer along with such peripheral equipment as a low-frequency function generator, a two-channel recorder, an X-Y plotter and an oscilloscope camera is used extensively in the study of various types of physical systems.

The machines laboratory is equipped with machine benches having

individual electric power panels to which connections are made by polarized plugs. The machines are of moderate size to allow the student to have intimate contact with them in their operation. The student can, therefore, make his own connections and operate and control the machines without assistance.

The shop has adequate facilities for instrument repair and maintenance, and for construction of special apparatus.

Curriculum

The freshman courses in electrical engineering and in civil engineering are identical. Courses in the electrical engineering curriculum which are offered by other departments are described by those departments.

201, 202. *Introduction to Electrical Engineering* Six Credit Hours
Required of Electrical Engineering Sophomores.

D. C. circuit theory; simple networks and their solutions; introduction to electric and magnetic fields; circuit components and their ratings; electrical standards and definitions; fundamental electrical measuring instruments; selected topics supplementing the electrical content of Physics 202. Lecture: three hours, two semesters.

Prerequisites: To be preceded or accompanied by Physics 201-202; Math. 201.

305. *Introduction to Electronics* Three Credit Hours
Required of Electrical Engineering Juniors

Electron ballistics and basic semiconductor physics; characteristics of high-vacuum and gas-filled tubes; semiconductor devices; analysis of active networks. Lecture: three hours.

Prerequisites: Math. 201; Physics 202; E.E. 202.

306. *Introduction to Electronics* Three Credit Hours
Required of Electrical Engineering Juniors

Theory and design of rectifiers and amplifiers employing electron tubes and semiconductor devices. Lecture: three hours.

Prerequisites: E.E. 301; Math. 202.

308. *Elements of Electrical Engineering* Four Credit Hours
Required of Civil Engineering Juniors

Direct-current circuits, magnetic circuits, alternating-current circuits, transformers, industrial wiring, rotating machinery, basic electronics, methods of electrical measurements and control. Lecture: Three hours; Laboratory or demonstration: two hours.

Prerequisites: Math. 202; Physics 202.

309. *Electrical Engineering Circuits* Five Credit Hours
Required of Electrical Engineering Juniors

Analytical and phasor treatment of harmonically varying electromotive forces, currents, and power in any combination of resistance, in-

ductance, and capacitance; calculation of balanced and unbalanced polyphase circuits. Network theorems and matrix methods.

Lecture: Five hours.

Prerequisites: E.E. 202; Physics 202; Math 201.

310. *Electrical Machinery*

Five Credit Hours

Required of Electrical Engineering Juniors

Flux, torque, current, electromotive force, and regulation in self-regulating machines; commutation and armature reaction; power losses and efficiency; control of motors and generators; transformers

Lecture: five hours.

Prerequisites: E.E. 309; Math. 202.

312. *Electrical Machinery Laboratory*

Two Credit Hours

Required of Electrical Engineering Juniors

A laboratory course to accompany E.E. 310. Laboratory: Four hours.

401. *Electronic Circuits*

Five Credit Hours

Required of Electrical Engineering Seniors

Theory and design of electronic circuits; narrow-band, wideband, and D.C. amplifiers; oscillators, modulators, and detectors; pulse circuits, Lecture: five hours.

Prerequisites: E.E. 302, 304, 306; Physics 302; Math 302.

402. *Electronic Systems*

Five Credit Hours

Required of Electrical Engineering Seniors

A.M., F.M., and pulse communication systems; computers; instrumentation and control systems. Lecture: five hours.

Prerequisites: E.E. 401, 403, 405, 407, 411.

403. *Electronics Laboratory*

Two Credit Hours

Required of Electrical Engineering Seniors

A laboratory course to accompany E.E. 401. Laboratory: four hours.

404. *Electronic Systems Laboratory*

Two Credit Hours

Required of Electrical Engineering Seniors

A laboratory course to accompany E.E. 402. Laboratory: four hours.

405. *Electrical Measurements*

Three Credit Hours

Required of Electrical Engineering Seniors.

Modern methods of measuring current, electromotive force, inductance, capacitance, and magnetic quantities; calibration of electrical instruments; location of circuit faults. Lecture: three hours.

Prerequisites: E.E. 302, 304; Physics 302; Math. 302.

407. *Electrical Measurements Laboratory*

Two Credit Hours

Required of Electrical Engineering Seniors.

A laboratory course to accompany E.E. 405. Laboratory: four hours.

408. *Transmission Lines*

Three Credit Hours

Required of Electrical Engineering Seniors.

Hyperbolic functions applied to the treatment of long transmission lines with distributed constants; the dissipationless line; application of the Smith chart; wave guides. Lecture: three hours.

Prerequisites: E.E. 402, 411.

411. *Advanced A.C. Theory*

Three Credit Hours

Required of Electrical Engineering Seniors.

Treatment of transients and oscillatory circuits by the use of differential equations; analysis of complex A.C. waves; complex variable solution of A.C. circuits; unbalanced polyphase circuits; the Fourier Series applied to analyses of waves and pulses. Lecture: three hours

Prerequisites: E.E. 302; Math. 302.

413, 414. *Circuit Networks*

Six Credit Hours

Required of Electrical Engineering Seniors

A two semester course involving networks: transformations: transient systems: filter networks; the use of symmetrical components for analysis of unbalanced polyphase systems; solutions of transients using the LaPlace transform; hyperbolic functions; short-circuit and line fault computations. Lecture: three hours, two semesters.

Prerequisites: E.E. 302, 304, 306; Physics 302; Math. 302.

420. *Senior Essay*

Two Credit Hours

Required of seniors as a prerequisite to graduation. See page 78.

DEPARTMENT OF ENGLISH

Professors: Achurch, Harrison, Durham

Associate Professor: Doyle

Assistant Professors: McDowell, Carpenter, Whitney, Weile, Morris,
Wilson, Mulkey, Peurifoy, Harvey, MacLeod, Alexander, Holbein,
Mathis

Courses in English composition and literature are required of all freshmen and sophomores, regardless of their major fields of study.

The course of study for the English major is designed to give the student a thorough grounding in the English language and in the literature of England and America and at the same time to give additional breadth to the student's development through prescribed courses in the physical sciences, mathematics, history, a modern foreign language, and selected courses from other departments related to the career or field of graduate study the student expects to follow after his graduation.

Since the student majoring in English has the opportunity during his junior and senior years of selecting at least four, and in some instances five, full-year courses in other specialized fields of study, many students select the English major as a liberal arts background for careers in business, journalism, and creative writing, or for graduate study in the fields of business, law, dentistry, theology, and the like.

The required courses in the department for the English major are English 203, 204 (The English Language), English 301 (Chaucer), English 400 (Milton), English 401, 402 (Shakespeare), English 403, 404 (American Literature), and English 420 (Senior Essay, a research paper). In addition, the student must elect six semester courses from the department other than English 205, 206, 405, 406, 409, and 410.

The foreign language requirement for the English major is French or German 101, 102, 201, 202. Entering freshmen with two or more units in either of these languages, complete their modern language requirement in one year and hence acquire another elective course.

For a tabulation of the requirements for the English major, see "Courses of Study," page 85.

101, 102. *Composition and Literature*

Six Credit Hours

Required of freshmen who, on the basis of nationally approved tests, show some real understanding of the fundamentals of English writing. The course stresses the development of the basic skills of writing and reading and of literary evaluations through the study of five types of literature. English 101 is a prerequisite for English 102. Lecture: three hours.

103, 104. *Composition and Literature*

Six Credit Hours

Required of freshmen who, on the basis of tests, show a lack of fundamental skills in writing. The same course as English 101, 102, but

with an additional class hour each week for teaching fundamentals English 103 is a prerequisite for English 104. Lecture: four hours.

105, 106. *English for Spanish-speaking Students* Six Credit Hours
A course in English as a foreign language, taught in the Department of Modern Languages with the cooperation of the Department of English, and made mandatory for the fulfillment of the general Modern Language requirement for those Spanish-speaking students matriculating at The Citadel with too little English to succeed. Lecture: three hours.

201, 202. *A Survey of English Literature* Six Credit Hours
Required of all sophomores. A survey of English literature from Chaucer to the present. Frequent themes on the literature studied. English 201 is a prerequisite for English 202. Lecture: three hours. Prerequisite: English 101, 102 or 103, 104.

203, 204. *The English Language* Six Credit Hours
Required of sophomores majoring in English. Open as an elective to others.

A survey of the history of the English language, beginning with the Indo-European backgrounds, tracing the development of Old, Middle, and Modern English through major phonological, morphological, and syntactical changes, to include some attention to dialectal variations, and concluding with emphasis on standard and current grammar and usage.

205. *Introduction to Public Speaking* Three Credit Hours
Open to sophomores, juniors, and seniors.
The general principles of speech composition and speech presentation; practice in expository speaking. Lecture: three hours.

206. *Persuasive Speaking* Three Credit Hours
Open to sophomores, juniors, and seniors.
Logic, rhetoric, and psychology of securing desired reactions from friendly, neutral, and hostile audiences; sources of speech material and planning the speech; improvement of volume, diction, rate, and platform manners in extemporaneous and manuscript delivery of classroom speeches. Lecture: three hours.
Prerequisite: Public Speaking 205.

210. *General Semantics* Three Credit Hours
Open to sophomores, juniors, and seniors.
A psychological approach to the study of language as an abstracting process employing a system of verbal symbols for informative, directive, and affective purposes. Lecture: three hours.

Except for Chaucer (301), Milton (400), Shakespeare (401, 402) and American Literature (403, 404), which are offered every year, the following courses are offered in alternate years. Starred courses are offered in 1962-1963.

- *301. *Chaucer* Three Credit Hours
 Required of all English majors. Open as an elective to other juniors and seniors.
 An introduction to Chaucer's language, narrative skill, and mastery of poetic forms through reading in the original "The General Prologue" and selected tales from *The Canterbury Tales* and some of the shorter poems. Lecture: three hours.
302. *Seventeenth Century Poetry and Prose* Three Credit Hours
Exclusive of Milton
 Open to juniors and seniors.
 A study of representative prose prior to the Restoration, of representative poetry of Ben Jonson and his "sons," and of John Donne and the metaphysical poets. Lecture: three hours.
303. *Neoclassicism, 1660-1744* Three Credit Hours
 Open to juniors and seniors.
 Dryden, Addison, Swift, and Pope, with some attention to the lesser writers of the period. Lecture: three hours.
304. *The Romantic Movement* Three Credit Hours
 Open to juniors and seniors.
 A study of the chief features which culminated in the Romantic writings of the early nineteenth century, with special emphasis on the five major poets: Wordsworth, Coleridge, Byron, Shelley, Keats. Lecture: three hours.
- *305. *Victorian Poetry and Prose* Three Credit Hours
 Open to juniors and seniors.
 A study of the period from 1830 to 1900, showing the effects of the Industrial and Scientific Revolutions on traditional attitudes toward art and life through the works of the major writers of the period, with emphasis upon the poetry of Tennyson, Browning, and Swinburne and upon the prose of Carlyle, Arnold, Huxley, and Pater. Lecture: three hours.
- *306. *Modern British and American Poetry* Three Credit Hours
 Open to juniors and seniors.
 Study of the poetry of Yeats, Robinson, Frost, Eliot, and Auden from as extensive a reading of their work as time permits; lectures planned to provide a foundation for future reading in these five and other poets; term essay and class report on a twentieth-century poet other than the above five, each member of the class studying a different poet. Lecture: three hours.
- *307. *A Survey of English Drama to 1890* Three Credit Hours
 Open to juniors and seniors.
 A tracing of the course of English drama from its origin in medieval times to the beginnings of modern drama in the middle of the nineteenth century; detailed study of representative plays. Lecture: three hours.

- *308. *Modern British and American Drama* Three Credit Hours
Open to juniors and seniors.

A detailed study of a few representative plays to show the major trends in British and American drama since the time of Ibsen. Lecture: three hours.

- *309. *A Survey of the English Novel to 1900* Three Credit Hours
Open to juniors and seniors.

Lectures on narrative forms which preceded the novel and on lives and works of major eighteenth and nineteenth century novelists; reading and discussion of six of their novels. Lecture: three hours.

- *310. *Modern British and American Novel* Three Credit Hours
Open to juniors and seniors.

Beginning with Conrad and Howells, a study of British and American novels since 1900. Required reading: eight novels. Lecture: three hours.

- *311. *Advanced Composition* Three Credit Hours
Open to selected juniors and seniors.

The development of effective styles of writing through analysis and imitation of masters of English prose.

Prerequisite: English 202 and departmental approval.

- *400. *Milton* Three Credit Hours
Required of all English majors. Open as an elective to other juniors and seniors.

A study of *Paradise Lost* entire, of *Samson Agonistes*, and of representative prose works. Lecture: three hours.

- *401, 402. *Shakespeare* Six Credit Hours
Required of all English majors. Open as an elective to other juniors and seniors.

An intensive study of representative plays—comedies, histories, tragedies, and dramatic romances—to give the student insight into the greatness of Shakespeare as dramatist, poet, and illuminator of life. Lecture: three hours.

- *403, 404. *American Literature* Six Credit Hours
Required of all English majors. Open as an elective to other juniors and seniors.

A study of some of the best writing of twelve to fifteen of the major American authors from colonial times to the present; emphasis upon how literature exhibits intrinsic artistic merit and upon how it reflects American cultural development. Lecture: three hours.

- *405. *World Literature* Three Credit Hours
Open to juniors and seniors.

An introduction through standard translations to the basic masterpieces of Greek and Roman classics, and a consideration of their influence on western thought and culture. Lecture: three hours.

*406. *World Literature*

Three Credit Hours

Open to juniors and seniors.

A study of selected masterpieces in translation of Western European literature from the Renaissance through the nineteenth century. Lecture: three hours.

*407, 408, *Principles of Literary Criticism
in English*

Six Credit Hours

Open to departmental seniors and to any student who has completed two full-year courses in English, or the equivalent, above the sophomore level.

A study of the classical tradition in criticism, the Renaissance restatement, and neoclassic developments; and of the development of modern criticism. Lecture: three hours.

409. *Writing Poetry*

Three Credit Hours

Open to juniors and seniors.

Analysis of and practice in writing poetry; varied in accordance with the experience and expectation of the students registered. Lecture: three hours.

410. *Writing the Short Story*

Three Credit Hours

Open to juniors and seniors.

Analysis of short stories, followed by practice in writing them. Lecture: three hours.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 78.

Professor: Anger

Associate Professors: Phillips, Lee, Martin

Assistant Professors: Fortunato, Coussons, Zuber, Schwint, Goodhart,
Willis, Larkin

The Department of History endeavors to give to the student an acquaintance with and an appreciation of our heritage; to enable him to see causes and effects, contrasts and comparisons as shown in the development of civilization; to give him an accurate knowledge of the history of his own country and to familiarize him with its institutions and the democratic ideals which have influenced American life; to acquaint the student who elects this subject with the standard works in its various fields and to prepare him to pursue graduate and professional studies.

A graduate with a major in history will, with his twenty-one hours of selected electives, be well-qualified not only for the responsibilities of citizenship but also have the broad background necessary for a successful career in business, law, the armed services, the church, and certain fields of science.

Students electing history as a major are required to take in addition to the freshman survey (History 101, 102) the following courses: History 201, 202; History 301, 302; and a total of twenty-one semester hours selected from the junior and senior courses offered by the department. They are also required to take two years of a modern

language, Economic Foundations of Modern Life, American Government, and either International Politics or Constitutional Law. For further details see the tabulation of the curriculum for a History Major, page 86.

Courses marked with an asterisk () are usually offered in alternate years or on demand.*

101, 102. *A Survey of American History* Six Credit Hours
Required of all freshmen except majors in physics and mathematics. Required of sophomores majoring in physics and mathematics.

Survey of American history from the period of discovery to the present; a brief treatment of the colonial period, followed by a more detailed study of such subjects as the cause of the Revolution, the framing of the Constitution, the development of political parties, the sectional conflict, economic progress and problems, and foreign relations; special emphasis placed on understanding the nature of American democracy and the role of the United States in world affairs from 1789 to the present.

201, 202. *A Survey of European Civilization* Six Credit Hours
Since 1500

Required of all sophomores majoring in history, political science, English, and modern languages, and of juniors in physical education. The historical background of contemporary civilization, with emphasis on movements and developments of enduring significance; the evolution of national states; the growth of representative and democratic institutions of government; the development of modern capitalism; the origins of current international conflicts; the progress of science, art, and literature.

301, 302. *History of England* Six Credit Hours
Required of all History majors.

A survey of English history from early times to the present; emphasis on the formation of the English constitution, the growth of limited monarchy and the evolution of parliament; stress throughout the course on social and economic factors conditioning political changes.

303, 304. *The United States since 1900* Six Credit Hours
Juniors majoring in History are required to take either History 303, 304; History 305, 306, or History 313, 314.

American social, cultural, economic, and political development in the twentieth century; emphasis on the increasing importance of the United States in world affairs and significant political and economic changes.

*305, 306. *European History since 1870* Six Credit Hours
A study of the development of liberalism and democracy in Western Europe; international politics and the revival of imperialism; the origins of World War II; efforts toward international organization and collective security; the rise of totalitarian states and their aggression; World War II and its aftermath, the Cold War.

*307. *Studies in Biography* Three Credit Hours
The study of significant personalities in European or American history; lectures, reports, and discussion.

*309. *The American Civil War and Reconstruction* Three Credit Hours
Emphasis on the political, economic, and social developments of the period, with some attention to the military aspects of the war.

*310. *The Era of the French Revolution and Napoleon* Three Credit Hours
A survey of the Old Regime and the causes of the Revolution, followed by an examination of the principal events of the period, stressing the innovations of the Revolutionary governments, the causes of Napoleon's rise to power, his achievements in France and in Europe, the reasons for his eventual downfall.

*311. *The Old South* Three Credit Hours
The political, social, and economic characteristics of the South before 1860 with emphasis on the role of this area in the national scene.

*312. *The New South* Three Credit Hours
The political, economic, and social development of the South since 1877; emphasis on contemporary regional problems and their impact on American life.

*313, 314. *Social and Intellectual History of the United States* Six Credit Hours
A survey of American social and cultural developments and their relationship to each other. Emphasis will be upon the intellectual aspects of American life and their impact upon society as a whole.

*315, 316. *History of Modern Warfare* Six Credit Hours
A survey of the development of modern warfare, emphasizing the impact of social, economic, political, and technological forces upon military theory and practice.

*401, 402. *History of American Diplomacy* Six Credit Hours
Seniors majoring in History are usually required to take either History 401, 402, History 403, 404 or History 409, 410.
An examination of the heritage, fundamental principles, and progressive development of American foreign policy from colonial times to the present.

*403, 404. *Latin American History* Six Credit Hours
Survey of the economic, cultural, and political development of Latin America; study of the nations as a unit, with special attention to the individuality of each; concentration by each student in his collateral reading on some one country.

*405, 406. *History of Colonial America* Six Credit Hours
 Seniors majoring in history are usually required to take either History 405, 406 or History 407, 408.

A more detailed treatment of the foundations of American civilization than in History 101; the motives of colonization, the evolution of self-government, the extension of the frontier; economic, social, and religious life, the causes of the Revolution, the problems of the Confederation.

*407, 408. *History of the Ancient World and the Middle Ages* Six Credit Hours

The Ancient World in the first semester, the Middle Ages in the second: a survey of the history of the Greeks, the Romans, and the people of the Middle Ages, their wars and political institutions, their economic and social life, their cultural and intellectual achievements.

*409. *History of the Far East in Modern Times* Three Credit Hours
 A survey of the Far East from the first contacts with the West to the present.

*410. *History of Modern Russia* Three Credit Hours
 A survey of Russian society, politics, and culture from the early modern era to the present. Intensive treatment is given beginning with the Great Emancipation through the twentieth-century revolutions and the consolidation of Soviet rule.

*411. *South Carolina History* Three Credit Hours
 A survey of the political, economic, social, and intellectual developments of South Carolina from its discovery to the present, with emphasis on the relation of the state to the South and to the nation.

420. *Senior Essay* Two Credit Hours
 Required of all seniors as a prerequisite to graduation. See page 78.

Geography

309. *Elementary Geography* Three Credit Hours
 An introductory course dealing primarily with the elements and principles of geography.

310. *Cultural Geography* Three Credit Hours
 An application of geographic principles to human activities in selected regions of the world.

*311. *Economic Geography* Three Credit Hours
 The geographic foundations and distribution of economic activities in different parts of the world.

*312. *Historical Geography* Three Credit Hours
 A survey of geographic influences in history.

Professors: Dye, Reves, Hutchison

Associate Professor: Saunders

Assistant Professors: Sutton, Thompson, Brown, Hull, Crumley, Kirkland, Hill, McIntyre, Ingraham, Roughton

The stated purpose of The Citadel is the training of young men for service to their country as civilian leaders or as officers in the armed forces, if the need arises. To meet the demands of this modern scientific age such a program of education must include basic studies in chemistry, physics, and mathematics. To this end all students at The Citadel are required to take at least one year of mathematics. In the science and engineering majors two or more years of mathematics must be scheduled.

There is today an ever-increasing demand for college graduates trained in mathematics on the part of government and industrial laboratories as well as schools and colleges. At The Citadel, students who elect mathematics as a major field of study are required to take 44 semester hours of mathematics and have 36 semester hours of electives in related fields of their choice.

The customary mathematical techniques are developed in all the courses of the department, but students are encouraged to obtain results through reasoning processes rather than by stereotyped use of formulas.

111. *College Algebra*

Three Credit Hours

Required of all Arts freshmen.

Linear equations; systems of linear equations; quadratic equations; inequalities; binomial theorem; theory of equations; determinants.

112. *Trigonometry*

Three Credit Hours

Required of all Arts freshmen.

Trigonometric functions; solution of right triangles; trigonometric identities and equations; solution of oblique triangles; logarithmic solution of triangles.

Prerequisite: Mathematics 111.

113. *Analytic Geometry*

Three Credit Hours

Coordinate systems; the straight line; the circle; conics; curve tracing; loci.

Prerequisite: To be preceded or accompanied by Mathematics 112.

119. *College Algebra and Trigonometry*

Five Credit Hours

Required of all Physical Science and Engineering freshmen.

A unified treatment of college algebra and trigonometry.

121, 122. *Analytic Geometry and Calculus*

Ten Credit Hours

Required of all Physical Science and Engineering majors.

A unified treatment of the theory and applications of plane analytical geometry and the differential and integral calculus of functions of one variable.

Prerequisite: Mathematics 119 or Mathematics 111 and 112.

201, 202. *The Calculus*

Ten Credit Hours

Theory of differentiation; application of derivatives; theory of integration; application of integrals; series; partial differentiation; multiple integrals.

Prerequisite: Mathematics 111, 112, 113 with a minimum total of 18 quality points for these courses.

220. *Intermediate Calculus*

Five Credit Hours

Required of all Physics, Mathematics, and Engineering majors.

The analytical geometry of three dimensions; the differential and integral calculus of functions of two or more variables; differential equations of the first order and degree; linear differential equations; with constant coefficients; miscellaneous differential equations; applications.

Prerequisite: Mathematics 121, 122.

301, 302. *Differential equations*

Six Credit Hours

Differential equations of the first order and degree; linear differential equations with constant coefficients; miscellaneous differential equations; applications; power series solutions; partial differential equations; Fourier series.

Prerequisite: Mathematics 201, 202.

*303, 304. *Modern Algebra*

Six Credit Hours

Structure of the number system; integral domains; fields; groups; vector spaces; matrices; determinants.

Prerequisite: Mathematics 201, 202.

*305, 306. *Modern Geometry*

Six Credit Hours

Special topics from axiomatic geometry; Euclidian geometry; projective geometry; non-Euclidean geometry; metric projective geometry; topology.

Prerequisite: Mathematics 111, 112, 113.

*307, 308. *Projective Geometry*

Six Credit Hours

Homogeneous point and line coordinates; principles of duality; cross ratio; projective forms; the conics and their properties.

Prerequisite: Mathematics 201, 202.

321, 322. *Advanced Calculus*

Six Credit Hours

Required of all Physics, Mathematics, and Electrical Engineering majors.

Vector Calculus; Bessel's functions; partial differential equations; Fourier series; LaPlace transforms; functions of a complex variable.

Prerequisite: Mathematics 220 or Mathematics 301, 302.

*403, 404. *Functions of a Complex Variable*

Six Credit Hours

Real and complex numbers; differentiation and integration of a function of a complex variable; mapping; the linear fractional transformation; infinite series; properties of single-valued and multiple-valued functions.

Prerequisite: Mathematics 301, 302.

*405, 406. *The Mathematical Theory of Statistics* Six Credit Hours
Frequency distribution; averages; measures of dispersion; correlation;
probability; the normal curve; theory of sampling.
Prerequisite: Mathematics 301, 302.

*407, 408. *Numerical Analysis* Six Credit Hours
Roots of equations; calculus of finite differences; interpolation form-
ulas; numerical differentiation and numerical integration; numerical
solution of ordinary differential equations; simultaneous equations and
determinants.
Prerequisite: Mathematics 301, 302.

420. *Senior Essay* Two Credit Hours
Required of all seniors as a prerequisite to graduation. See page 78.
*N. B. Two of these starred courses will be offered each year.

DEPARTMENT OF MILITARY SCIENCE

Professor: Sanders

Associate Professors: Price, Clarke

Assistant Professors: Round, Rees, Milburn, Comstock, Crosland, Klein, Hilbert

The Department of Military Science is an academic department of The Citadel. It organizes and supervises all Army ROTC activities on the campus.

The objective of Army ROTC at The Citadel is to provide military science instruction to all cadets and to produce junior officers having the qualities and attributes necessary for reserve or regular officers of the Army. Although all students are required by school regulations to take four years of ROTC, not all cadets earn the privilege of being commissioned an officer in the Armed Forces.

The four-year General Military Science course of Army ROTC is designed to offer instruction in subjects common to all branches of the Army. The first two years comprise the *Basic Course*, and the last two years, including a six-week summer camp, comprise the *Advanced Course*. Cadets with prior ROTC training should make this information known to the Military Department as soon as possible so that credit, if appropriate, may be granted.

Formal Enrollment Requirements

The basic requirements for formal enrollment in Army ROTC are shown below. These must be fully met before the Professor of Military Science can consider a cadet for formal enrollment in the Army program. Cadets who do not meet these requirements are not entitled to ROTC allowances and will be ineligible for a commission.

Be a U. S. Citizen.

Be physically qualified under Department of the Army standards. For the Basic Course, a statement by The Citadel Surgeon that a cadet can perform "normal military duties" usually suffices. An Army-administered physical examination, required for formal enrollment in the Advanced Course, is given to all third classmen (sophomores) in the spring. Waivers of physical defects are granted only in exceptional cases, and then only by authority of the Department of the Army. Any degree of uncorrected vision is acceptable provided visual acuity is correctable to 20/40 in one eye and 20/70 in the other eye, to 20/30 in one eye and 20/100 in the other eye, or to 20/20 in one eye and 20/400 in the other eye. Both eyes must be free from any disfiguring or incapacitating abnormality and from acute or chronic disease.

Maintain satisfactory academic standards with his class.

Maintain a satisfactory leadership rating. This rating is determined by the Commandant of Cadets, the PMS, and other appropriate Citadel officials.

Be of good moral character. Cadets convicted by civil or military

court for offenses other than minor traffic violations are not eligible for formal enrollment without specific approval of the Department of the Army. A cadet may apply for a waiver of conviction, provided the offense was non-recurring and did not involve moral turpitude.

Pass ROTC Qualifying Examination. This examination is administered during the third-class year. Failures cannot be formally enrolled. No make-up examinations are authorized.

Pass Physical Fitness Test. The Physical fitness tests administered by the Physical Education Department will be used as basis for determining eligibility for enrollment. The fundamental is that any cadet competing for an Army Commission must meet the physical fitness requirements established for active-duty officers.

Advanced Course

Formal enrollment in the Advanced Course involves signing a contract with the Government. The signer agrees to accept a commission if it is offered and to serve on active duty for two years or six months, depending upon the needs of the Army. He also recognizes the obligation of The Citadel to withhold a baccalaureate degree from the cadet who fails to comply with his ROTC contract agreement.

Members of non-Army reserve organizations may not be formally enrolled in the Advanced Course. Transfer arrangements normally can be made by application through the Military Department of The Citadel.

Army Aviation Flight Training

A small number of first classmen (seniors), selected after a highly competitive physical, mental, and leadership evaluation, will be permitted to participate in the Army Flight Training Program as part of their ROTC instruction. This program is extracurricular and serves to motivate students to seek a career in Army Aviation, and also serves as a program for screening applicants for Army Aviation training. The program consists of approximately 71 hours of ground and flight instruction. Students may be awarded the Federal Aeronautical Agency private pilot's certificate upon completion of this training.

Distinguished Military Students

Certain cadets who, at the start of their first-class (senior) year, have clearly demonstrated outstanding leadership and academic ability, along with the highest moral traits, may be selected as Distinguished Military Students. These students have the option of applying for direct appointment in the Regular Army.

Course of Instruction

- 101, 102. *Military Science I, First Year Basic* Two Credit Hours
Organization of the Army and ROTC (10 hours)
Employment and Control of Individual Weapons (20 hours)
Gunnery, Fire Control, and Employment of Crew-Served Weapons
(15 hours)

The Role of the U. S. Army in National Security (15 hours)
Leadership, Laboratory (160 hours)

- 201, 202. *Military Science II, Second Year Basic* Two Credit Hours
The Theory of Map Reading and Aerial Photography (15 hours)
Introduction to Tactical Operations (15 hours)
American Military History (30 hours)
Leadership, Laboratory (160 hours)

- 301, 302. *Military Science III, First Year Advanced* Three Credit Hours
The Principles of Leadership (12 hours)
The Principles and Techniques of Military Teaching (23 hours)
Branches of the Army (25 hours)
The Employment of Small Units in Combat and Military Communications Systems (55 hours)
Orientation on the Duties and Performance of Cadets at Summer Camp (45 hours)
Leadership Laboratory (160 hours)

Summer Camp Training: Upon completion of Military Science III, all formally enrolled ROTC cadets are required to attend the Summer Camp for practical instruction and field training. The camp lasts six weeks and begins on or about 20 June. Each camp is conducted by the Army at an appropriate Army Camp or station, and is considered a concentrated laboratory in Military Science where theory learned in the classroom is put into practice.

- 401, 402. *Military Science IV, Second Year Advanced* Three Credit Hours
Theory and Techniques of Army Operations, including:
The Principles of Command and Staff Procedures (10 hours)
The Techniques of Decision Making and the Preparation of Combat Orders (7 hours)
Organization and Fundamentals of the Military Intelligence System (8 hours)
Composition and Functions of Various Military Teams (20 hours)
Principles of Army Training Management (5 hours)
Theory and Techniques of the Army Logistical System, including:
Principles of Supply and Evacuation (10 hours)
Troop Movement and Transportation Requirements (5 hours)
Types and Methods of Motor Transport (5 hours)
Orientation on Service in the United States Army, including:
The Role of the United States in World Affairs and Seminar on Present World Situation (10 hours)
Advanced Principles of Leadership (4 hours)
Practical Indoctrination in the Role of the Army Officer (6 hours)
The Techniques of Army Administration (15 hours)
The Methods of Administering Military Justice (15 hours)
Leadership, Laboratory (160 hours)

Professors: Fitch, Van de Luyster

Associate Professor: Brand

Assistant Professors: Smith, Blevins, Pappas, Brown, Helfers, Wuerth

It is the purpose of the Department of Modern Languages that students majoring in this subject shall receive a thorough knowledge of one language, written and spoken, a reasonable degree of competence in a second, and a good understanding of the important writers, the literary developments, and the cultures which these languages represent. The aims of the department are both to develop understanding of other civilizations and to prepare the student to follow a career requiring linguistic skill or literary knowledge. He is prepared to do graduate work in a language if he so desires.

In a world being rapidly drawn together by improved means of communication, yet with its parts still sharply differentiated in language, customs, and ways of thinking, it is important that an educated man should not be reduced to indirect and highly defective means of contact with all cultures other than his own. While one cannot learn all

languages, certain ones, such as French, German, and Spanish, are widely used outside the countries where they originated and are keys to a better understanding of mankind. For scientific research and for many commercial and professional positions, knowledge of languages may prove valuable or even essential.

Students who elect languages as their major field must satisfactorily complete seven courses in languages, including, for one language, at least two courses above the intermediate level. They must complete the Survey of French Literature. The exact sequence of their courses may vary according to the language chosen for their major work and the point at which their college work in languages was begun. Students wishing to take a language course as an elective may take any course for which they have done the prerequisite work.

In courses above the intermediate level, the work of each semester is a unit, and credit will be given for its successful completion.

French

101, 102. *Elementary French* Six Credit Hours

For students who elect French and have entered The Citadel with less than two units of the language.

The reading and writing of simple French; dictation; elementary conversation with drill in pronunciation; elements of French grammar.

201, 202. *Intermediate French*. Six Credit Hours

For students who have completed French 102, or have entered The Citadel with two or three units of the language.

Reading from authors of the nineteenth and twentieth centuries; composition and conversation based on the reading material; grammar review to correct faults in usage.

301, 302. *Introductory Survey of French Literature* Six Credit Hours

Required for the modern languages elective course. Open to students who have completed French 202.

A general survey of French Literature from its beginnings through the nineteenth century; extensive reading, reports, discussion in French.

The following courses will be given when there is sufficient demand, and according to the wishes and needs of the students.

401, 402. *French Composition and Conversation* Six Credit Hours
Open to students who have completed French 302, or who have completed French 202 with a grade of A or B.

Composition and conversation with grammar review when needed, to produce fluency and accuracy in the use of spoken and written French; some use of an elementary form of the *explication de textes*.

403, 404. *Eighteenth Century French Literature* Six Credit Hours
Political and philosophical thought in the eighteenth century, traced through the writings of Montesquieu, Voltaire, and Rousseau; the be-

ginnings of Romanticism as shown in Rousseau and other writers; lectures in French; collateral readings and reports.

Prerequisite: French 302.

405, 406. *The Classical Period of French Literature* Six Credit Hours
The literature of the seventeenth century, that of France's most distinctive and in many respects finest contribution to the world's literature and culture; especial attention given to the plays of Corneille, Racine, and Molière.

Prerequisite: French 302.

407, 408. *Nineteenth Century French Literature* Six Credit Hours
French literature from Chateaubriand to Zola and Anatole France; the Romantic, realistic, and naturalistic movements, with special emphasis on Balzac, Hugo, and Flaubert; lectures in French, discussion, outside reading.

Prerequisite: French 302.

German

101, 102. *Elementary German* Six Credit Hours
For students electing German and having entered The Citadel with less than two units of the language.

Pronunciation and the elements of German grammar; written and oral exercises; translation of simple German into English.

201, 202. *Scientific German* Six Credit Hours
For the students taking the chemistry, physics, or pre-medical course. First-year grammar study continued; translation of texts in various sciences; special stress on sentence structure and word-building.

Prerequisite: German 102 or two entrance units.

203, 204. *Intermediate German* Six Credit Hours
Completion and review of elementary grammar; reading of texts from German literature; conversation in German.

Prerequisite: German 102 or two entrance units.

301, 302. *German Literature of the Nineteenth Century* Six Credit Hours

Representative work of outstanding novelists and dramatists, with discussion of the literature of the period; assigned reading and reports.

401, 402. *Goethe's Faust* Six Credit Hours
Goethe's greatest drama, *Faust*, studied in connection with his life and with regard to his message today; its genesis and growth; translation of Part I and selections from Part II; *Faust das Puppenspiel* and its relation to Goethe's *Faust*; lectures, reading, and reports.

Spanish

101, 102. *Elementary Spanish* Six Credit Hours
For students electing Spanish and having entered The Citadel with less than two units of the language.

Essentially a drill course in the reading, writing, and speaking of simple Spanish.

201. *Intermediate Spanish* Three Credit Hours

The first semester of second-year Spanish, designed to develop general understanding of the language, oral and written. Texts deal with Spanish American material.

Prerequisite: Spanish 102 or two entrance units.

202. *Business Spanish* Three Credit Hours

Completion of the second year, primarily for students in Business Administration. Texts on commercial subjects; some work in correspondence.

Prerequisite: Spanish 201.

204. *Intermediate Spanish* Three Credit Hours

Completion of the second year, primarily for other than Business Administration students. Texts used are literary or general.

Prerequisite: Spanish 201.

301, 302. *Spanish Literature of the Golden Age* Six Credit Hours

Literature of the late sixteenth and seventeenth centuries, the age producing the characters of Don Quixote and Don Juan; a study of the works of Cervantes, Lope, Tirso, Calderon, and others.

Prerequisite: Spanish 204 or 202, or four entrance units, or equivalent competence in the language.

303, 304. *Spanish-American Literature* Six Credit Hours

Leading works from Mexico and Central and South America studied, with both individual and class reading.

Prerequisite: Same as for Spanish 301, 302. Given in alternating years with that course.

Russian

101, 102. *Introductory Russian* Six Credit Hours

Open only to students who have already completed intermediate work in another foreign language with good grades.

A course designed to introduce the student to the nature of the language, the fundamentals of the grammar, and a basic vocabulary. Not mainly conversational, but with some attention to pronunciation.

Prerequisite: Permission of the head of the department.

201, 202. *Intermediate Russian* Six Credit Hours

A continuation of Russian 101, 102, with emphasis on vocabulary building and the development of reading skill.

Offered when demand justifies.

All Modern Languages

420. *Senior Essay* Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 78.

Classical Languages

Offered when demand justifies.

101, 102. *Elementary Greek* Six Credit Hours

Fundamentals of the Greek language.

Recommended for students preparing for the study of medicine or theology.

201, 201. *Intermediate Greek* Six Credit Hours

Selections from Xenophon or the New Testament.

Prerequisite: Greek 101, 102.

101, 102. *Elementary Latin* Six Credit Hours

Latin grammar and translation. Course dependent upon the background of the student.

Recommended for pre-law students.

201, 202. *Intermediate Latin* Six Credit Hours

Translation from Latin prose writers.

Prerequisite: Latin 101, 102 or two entrance units.

DEPARTMENT OF PHYSICAL EDUCATION

Professor: Dellastatious

Assistant Professors: Feigl, Rumsey

The purpose of the Department of Physical Education is threefold:

(1) Professional Physical Education Program: Prepare and qualify Physical Education majors for secondary-school teaching in the fields of physical education, athletics, and a selected minor.

(2) Required Physical Education Program: Organize and administer a four-year required physical education program for the Corps of Cadets.

(3) Intramural Program: Organize and administer a voluntary intramural program for the Corps of Cadets during their free time.

The Physical Education Major

The Department of Physical Education-Intramural Athletics requires the following physical education courses for its physical education majors:

201. *Introduction to Physical Education* Three Credit Hours

An introductory survey of physical education; historical background, nature, scope, and function of physical education; its aims, objectives, and principles.

301. *Personal and Community Health* Three Credit Hours

A body of knowledge from the biological and social sciences which is essential for sound decisions in health maintenance and conducive to proper sense of health values for the individual and the community.

303. *Basketball* Two Credit Hours

Comparative study of defensive and offensive systems of team play; development of basic individual skills and techniques; teaching and coaching: rules and officiating. Lecture: one hour a week; laboratory; two hours a week.

308. *Gymnastics and Tumbling* Two Credit Hours

Theory and practice of gymnastics, tumbling, and developmental activities with respect to teaching methods, skills, and the conduct of gymnastic meets. Lecture: one hour; laboratory: two hours.

Ph. Ed. 401. *Organization and Administration of Physical Education* Three Credit Hours

Organization: delegation of authority and responsibility; use of the democratic method; formation of teams, tournaments, and leagues; program aims and objectives; curriculum building; course construction; lesson planning.

Administration: selection, purchase; and care of equipment; office policies and systems; budgeting in finances; publicity; team and game management.

403. *Individual and Dual Sports* Three Credit Hours
Teaching methods with applied techniques in golf, fencing, handball, and wrestling.

404. *Individual Physical Education* Three Credit Hours
Principles and practices in the conditioning and care of athletes. Prevention and care of injuries, first aid, kinesiological analysis of the body, corrective exercise for the physically handicapped student.

405. *Health Education* Three Credit Hours
Organization and administration of a school health program with specific attention to methods and techniques of health instruction.

406. *Spring Sports* Three Credit Hours
Theory and practice in the fundamentals of coaching baseball, track, lacrosse, and tennis. Administration and execution of meets and tournaments. Lectures: two hours; laboratory: two hours.

407. *Football Theory* Two Credit Hours
Analysis and evaluation of offensive and defensive tactics, formations, and plays; individual techniques and fundamental skills in position play; teaching materials and methods; coaching; rules and rule interpretations.

410. *Recreation and Outdoor Education* Two Credit Hours
Planning, conducting, and evaluating playground activities, camps, and recreational activities. Methods, procedures, and on-the-job planning. The study of nature in the outdoors in its relation to recreation.

412. *Tests and Measurements in Physical Education* Two Credit Hours
The place and importance of tests and measurements in the teaching process; the tools of scientific measurement now available in physical education.

420. *Senior Essay* Two Credit Hours
Required of all seniors as a prerequisite to graduation. See page 78.

DEPARTMENT OF PHYSICS

Professors: Anderson, Hanson

Assistant Professors: Johnson, Allen, Bailey, Mason, Clauss, Meeks,
Richardson, Brunet, Major

It is the purpose of the Department of Physics to offer to all students at The Citadel a fundamental course in one of the basic physical sciences, and to offer to students specializing in other departments such advanced courses in physics as are necessary to meet their needs. To students taking their major work in the department, it offers a program of courses sufficient to enable them to enroll as graduate students in full standing at the leading universities, or to fill positions as physicists in the government service and in industrial laboratories.

The rooms of the department are located in the east wing of Bond Hall. On the first floor are two large laboratories for advanced physics courses, one of which is air-conditioned, a photometric laboratory, photographic dark room, and a machine shop for instrument repair and maintenance. A room containing D.C. generators and the main electric switchboard is also located on this floor. On the second floor are a large air-conditioned lecture room seating one hundred and ten, four smaller lecture rooms, one of which is air-conditioned, one

classroom, and two laboratories for elementary physics. Two additional elementary laboratories are located on the third floor. At all lecture desks and laboratory tables, electric power, both A.C. and D.C., of the required voltage is available from direct current generators or the commercial A.C. power supply. Gas, water and compressed air outlets are also available in all lecture rooms and laboratories. Distribution panels, connected with the main electric switchboard, are located in the advanced laboratories. The lecture rooms and laboratories are conveniently arranged and well equipped with modern apparatus to carry out the department policy of frequent student experimental work and extensive lecture demonstrations.

Apparatus available for detecting, counting, and analyzing nuclear radiations has been significantly increased recently with the help of a grant from the United States Atomic Energy Commission.

A chapter of Sigma Pi Sigma, Physics Honor Society, has been maintained at The Citadel since 1941. In addition the department sponsors a Student Section of the American Institute of Physics.

The college requirement of one year of physics in the sophomore class can be met by Physics 201, 202 in all courses of study. Physics 203, 204 does not satisfy the requirement in the chemistry, mathematics, physics or engineering electives. The objectives, methods, and to some extent the content in these two courses are different. Accordingly, it is recommended that Physics 201 be followed by Physics 202 even by those students who change to a different course of study during the first semester of the sophomore year.

Students taking physics as their major work are required to take all courses offered by the department for physics majors. In addition they are required to take Mathematics 321, 322; German 201, 202. For valid reasons the study of German may be postponed to the junior or senior year. Physics majors are advised to choose their electives from the advanced courses offered in the Department of Chemistry and the Department of Mathematics.

201, 202. *Elementary College Physics* Eight Credit Hours
Required of all sophomores majoring in engineering, mathematics, chemistry or physics. The less mathematical portions of mechanics, heat, electricity, sound and light covered with no assumption of prior knowledge of physics; laboratory work of about twenty-eight individual quantitative experiments based on fundamental principles discussed in lectures; instruction in the use of the slide rule, which is required equipment. Lecture: three hours; laboratory: two hours.

Prerequisite: To be preceded or accompanied by Math. 121 or 201.

203, 204. *Introduction to College Physics* Eight Credit Hours
Required of all sophomores who do not take Physics 201, 202.

A course similar to Physics 201, 202, adapted primarily to the needs of students who expect to take no additional courses in the physical sciences and including recent developments in physics bearing directly on everyday life; laboratory periods devoted to individual experiments performed by the students, experiments conducted by the instructor, solution of problems, or showing of technical films.

Lecture: three hours; laboratory: two hours.

Prerequisite: To be preceded or accompanied by Math. 112 or 119.

301, 302. *Advanced General Physics* Six Credit Hours
Required of all Physics Juniors; open to others.

A continuation of Physics 201, 202 covering in a more advanced and mathematical manner portions of mechanics, heat, electricity, and magnetism not included in the earlier course. Lecture: three hours.

Prerequisites: Physics 201, 202; Math. 202 or 122.

303, 304. *Laboratory Physics* Four Credit Hours
Required of all Physics Juniors; open to others.

A study in the laboratory of many of the topics considered in Physics 301, 302; about sixty more advanced experiments than those in Physics 201, 202 involving the use of most of the standard instruments of physical measurement. Laboratory: four hours.

Prerequisite: To be preceded or accompanied by Physics 301 or 302.

305, 306. *Physics for Premedical Students* Six Credit Hours
Required of all Premedical Juniors.

Designed to supplement the introductory course and meet the requirements in physics for admission to the best medical schools; laboratory work of about thirty individual quantitative experiments dealing with mechanics, molecular physics, heat, electricity, sound and light. Lecture: two hours; laboratory: two hours.

Prerequisite: An introductory course in college physics.

307. *Geometrical Optics* Three Credit Hours
Required of all Physics Juniors; open to others.

Principles of geometrical optics and optical instruments; reflection, refraction and dispersion in theory and experiment. Lecture: two hours; laboratory: two hours.

Prerequisites: Physics 202; Math. 201 or 122.

308. *Physical Optics* Three Credit Hours
Required of all Physics Juniors; open to others.

The general equations of wave motion; interference, diffraction, polarization, and double refraction studied both theoretically and experimentally. Lecture: two hours; laboratory: two hours.

Prerequisites: Physics 307; Math. 202 or 122.

310. *Heat and Thermodynamics*

Three Credit Hours

Required of all Physics Juniors; open to others.

Kinetic theory of gases and transport phenomena, thermodynamics of gases, Maxwell-Boltzmann statistics, thermoelectricity and theory of thermal radiation.

Lecture: three hours.

Prerequisite: Physics 301.

401. *Modern Physics*

Three Credit Hours

Required of all Physics Seniors; open to others.

The background of modern atomic physics, Maxwell's equations for electromagnetic waves, charged atomic particles, photoelectricity, X-rays, special theory of relativity, atomic spectra and atomic structure.

Lecture: three hours.

Prerequisites: Physics 302, 308; Math. 301 or 220.

402. *Nuclear Physics*

Three Credit Hours

Required of all Physics Seniors; open to others.

A continuation of Physics 401 to include natural radioactivity, isotopes, artificial radioactivity and nuclear disintegration, nuclear reactions, detection of charged particles and radiation, cosmic rays and fundamental particles. Lecture: three hours.

Prerequisite: Physics 401.

403, 404. *Advanced Laboratory Physics*

Two Credit Hours

Required of all Physics Seniors.

A course accompanying Physics 401 and 402. Experiments of an advanced nature in mechanics and heat, and experiments in atomic and nuclear physics to include electron emission, determination of fundamental constants, conduction of electricity through gases, X-rays, radioactivity, detection, counting and analysis of nuclear radiations. Laboratory: Two hours.

405. *Advanced Physics*

Three Credit Hours

Senior Elective.

An introduction to modern physics and the principles of mechanics, heat, electricity, and light essential to its understanding; lectures and demonstration experiments on many topics covered more completely in Physics 308 and 401. Lecture: three hours.

Prerequisites: Physics 301, 302.

406. *Electronics*

Five Credit Hours

Required of all Physics Seniors.

Characteristics of electron tubes and transistors and their use as rectifiers, detectors, amplifiers and oscillators; a course designed to introduce students to the use of electron tube and transistor circuits in the field of measurements.

Lecture: three hours; laboratory: four hours.

Prerequisite: Physics 413.

407. *Mechanics*

Four Credit Hours

Required of all Physics Seniors.

Selected topics in mechanics extending the treatment given in Physics 301 and using the methods of vector analysis; kinematics, work and energy, gravitational theory, oscillations, dynamics of particles and rigid bodies. Lecture: four hours.

Prerequisite: Physics 301; Math. 301 or 220.

413. *Electricity and Magnetism*

Five Credit Hours

Required of all Physics Seniors.

The electrostatic field and its effect on matter, the properties of magnetic fields and magnetic materials, electromagnetic effects, electrical transients, periodic currents. Lecture: three hours; laboratory: four hours.

Prerequisites: Physics 302; Math. 301 or 220.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 78.

Professors: Coleman, Hodges

Associate Professor: Kline

Assistant Professors: Fairchild, Flowers, Kingston, Mitchell.

The curriculum of political science at The Citadel is planned to give the student a background in the political, social, and economic developments of the modern world. It seeks an understanding and interpretation of tendencies, a breadth of view, and a spirit of scientific inquiry into those fields which will qualify its majors for admission to graduate and professional schools.

While this program undertakes to provide a broad liberal education, it is especially designed as basic preparation for the administration of business enterprises and governmental services both foreign and domestic, and to provide a program for pre-law students. The head of this department is the designated pre-legal curriculum adviser for students interested in the study of law.

The Political Science Department has long been aware of the need for men trained in international affairs and encourages students to prepare for careers in the Foreign Service and Intelligence activities. This course of study has the approval of the State Department. Students entering the Armed Services have also found it to be a useful supplement to their military training.

A student who selects political science as his major course of study is required to take Political Science 201 (American National Government) and 202 (State and Local Government) in the Sophomore year. For the requirements in the junior and senior years, see page 91. Two years of a modern language are required. There are fifteen hours of electives which may be chosen according to the individual's requirements and interests, subject to the approval of this department.

201. *American National Government* Three Credit Hours
Required of all Political Science Sophomores. Open to others.

The origins and development of the American constitutional system; relations between national and state governments in the American federal system; the political process, with emphasis upon election procedures, public opinion, and pressure groups and political party activity; the individual and his government; the institutional organization of the national government; the national government in action.

202. *State and Local Government* Three Credit Hours
Required of Political Science Sophomores. Open to others.

The historic evolution of state governmental and constitutional systems; the role of the states in the American constitutional system; the institutional organization of state governments; the relationship between states and their political subdivisions; the organization and activities of local governmental units.

Prerequisite: Polit. 201.

301, 302. *International Law and Organization* Six Credit Hours
Required of political Science Juniors. Open to others receiving permission of the instructor.

A survey of international law as developed through treaties, customs, usages, and decisions of national and international tribunals; a study of the League of Nations, the United Nations, and the international machinery for the settlement of international problems and disputes.

303. *American Foreign Relations* Three Credit Hours
Required of Political Science Juniors. Open to others receiving permission of the instructor.

A study of the organization of the American government for the conduct of foreign relations; the institutions and elements in the making of foreign policy; emphasis on the important problems and developments of the post-war years.

304. *American Parties and Politics* Three Credit Hours
Required of Political Science Juniors. Open to others.

An analysis of the dynamics of American politics, with particular emphasis upon the factors entering into the formation of public opinion, the role of pressure groups, and the operations of the party system.

305, 306. *Public Administration* Six Credit Hours
Required of Political Science Juniors. Open to Others.

A study of the characteristics of public administration at all levels; the principles and practices of organization; the role of leadership and its process; the management of personnel and finance; the effects of the regulatory process upon administration; the problems of securing administrative responsibility.

Prerequisites: Polit. 201, 202.

307, 308. *Economic Foundations of Modern Life* Six Credit Hours
Required of Political Science Juniors. Open to others.

Basic economic concepts. National income, diminishing returns, population and progress, organization of business enterprise, social aspects of corporation finance and the securities market, monopoly and monopolistic prices, public utilities regulation, risk, insurance, speculation, money and banking, prices, labor problems and public policy, wages, interest, rent, profits, international trade and finance.

310. *Public Personnel Administration* Three Credit Hours
Open to juniors and seniors.

A study of the structure of governmental personnel management; its processes of securing, training, rewarding, disciplining, and separating employees; analysis of selected cases and problems in human relations in management.

312. *Municipal Government* Three Credit Hours
Open to juniors and seniors.

A study of the legal status of municipalities, their administrative or-

ganization; personnel and financial problems; planning and zoning; safety administration; regulatory and management problems.

401, 402. *Constitutional Law* Six Credit Hours
Required of Political Science Seniors. Open to others receiving permission of the instructor.

A study of the underlying and basic principles of the Constitution as reflected in the leading decisions of the United States Supreme Court.

403. *Government Finance* Three Credit Hours
Required of Political Science Seniors. Open to others receiving permission of the instructor.

An analysis of the scope and methods of governmental taxing, spending, and borrowing; current financial problems of all levels of government; implications of alternative fiscal problems.

Prerequisite: Polit. 307, 308.

405, 406. *International Politics* Six Credit Hours
Required of Political Science Seniors. Open to others receiving permission of the instructor.

An analysis of the development and distribution of power among nations; the geographic, demographic, economic, political, psychological, and military bases of national power; emphasis on the problems and policies of the major powers.

407, 408. *Political Theory* Six Credit Hours
Required of Political Science Seniors. Open to liberal arts seniors.

Major theoretical writing from Plato to Thomas Hill Green; emphasis on a comparison of basic ideas and on the relationship between theories and contemporary problems.

409, 410. *Far Eastern Affairs* Six Credit Hours
Open to juniors and seniors.

A survey of the Far East and Southeast Asia; a study of the power elements of these areas; emphasis on the role of Asia and its problems in American foreign policy.

411. *Comparative Government* Three Credit Hours
Open to juniors and seniors.

An analysis of the structure and operation of the basic political institutions of the major powers; emphasis on divergent approaches to their common problems.

412. *Administrative Law* Three Credit Hours
Open to seniors with adequate background in history, economics, and political science.

The origins and development of the administrative processes on national, state, and local levels; the scope and limits of administrative powers; the enforcement of administrative action; remedies against administrative action.

414. *Latin American Affairs*

Three Credit Hours

Open to juniors and seniors.

A survey of the Latin American areas; a study of the power elements and related problems; emphasis on the relationships and importance of the area to the United States.

416. *National Policy and Administration*

Three Credit Hours

Open to juniors and seniors.

Analytical and critical survey of the process of formulating and administering basic domestic policy; the role and influence of special interest groups; the problems of the President and Congress in formulating general interest programs.

418. *Middle Eastern Affairs*

Three Credit Hours

Open to juniors and seniors.

A survey of the Middle East; a study of the power elements and related problems; emphasis on the role of the area in American foreign policy.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 78

In order to bring all Citadel students into closest possible contact with outstanding leaders of thought and action in the free world, General Mark W. Clark inaugurated in 1954-55, his first full year after assuming the presidency of The Citadel, a Greater Issues Course. Its purpose is to bring to The Citadel annually speakers of national and international reputation. Each is invited to discuss some segment of public affairs with which he is especially familiar. The Greater Issues Course is a part of the curriculum of every Citadel student and has proved of outstanding interest and value.

In 1961 the Greater Issues series again brought to The Citadel campus distinguished individuals who discussed first hand the issues that disturb and motivate today's world. Included among them were: Mr. Bruce Catton, Pulitzer-prize winning historian, noted writer on the Civil War era, and Editor of American Heritage Magazine, who donated to The Citadel Memorial Library the original manuscripts and notes of his books; General Lauris Norstad, U.S. Air Force, Supreme Commander, Headquarters, Allied Powers, Europe (SHAPE); Mr. Erwin D. Canham, Editor, Christian Science Monitor; Lieutenant General Arthur G. Trudeau, Chief of U. S. Army Research and Development; General Alfred M. Gruenther, U. S. Army, retired, president of the American Red Cross; and The Honorable Elvis J. Stahr, Secretary of the Army.

THE HONOR SYSTEM

The honor system of, by and for the Corps of Cadets came into being in September 1955. Since that time it has become an integral part of the training received by a cadet. The purpose of the honor system is to inculcate honor into each cadet so that he instinctively conducts himself in an honorable manner.

The guiding principle of the honor system is the Honor Code which says simply "A cadet does not lie, cheat or steal." These are three of the four violations - the fourth being failure to report a case of lying, cheating or stealing.

The honor system is enforced by a Cadet Honor Committee made up of twenty-one members of the First Class who are elected by the three lower classes during the second semester of their Second Class year. The Honor Committee investigates all honor violations reported and conducts trials as necessary. Conviction by the Honor Court requires a unanimous secret vote of "guilty" by members of the court. In case a cadet is found guilty by the Honor Court and the President approves the findings of the court, he is permitted to resign from the college.

The Honor Committee keeps current and distributes an honor manual which describes the honor system and its workings in considerable detail.

Early Morning Routine

It is 6:15 a.m. and a bugle is sounding reveille over the speakers in all four barracks. Some plebes, freshmen, are waiting on the edge of the quadrangle. In a moment, the "steel" sounds and the plebes dash to their spot for the breakfast formation. The upperclassmen take their places more leisurely.

Whether it is a cool day in November or a warm spring morning in April, the routine is the same. The cadet battalion commander gives the command "Attention." Reports and announcements are made. The commander gives the command for company officers to take charge and march their companies to mess. The sound of "forward march," "column right," and "hup, two, three, four" is heard as each company marches off on its scheduled route to the mess hall.

It is now five or ten minutes after seven, and cadets are leaving the mess hall individually and returning to their rooms. One can recognize the plebes by the way they turn corners "on the square." From now until time for morning classes, beds will be made and rooms put in order. Cadets may be making a last hurried review in preparation for a quiz, packing laundry, listening to news or music on the radio, or just chatting with a group of fellow students.

Morning Schedule

At a few minutes before eight on this typical morning, streams of cadets are coming out of the barracks. Most of them are hurrying toward the classroom buildings (Bond Hall or the Arts Building). Those going the other way have sliderules attached to their belts. They are the civil engineering majors whose classrooms are at the north end of the parade ground.

The groups forming in double lines in front of the classroom building are freshmen. Each section has a specific place to form. The cadet in front is the section leader, who takes the muster and, as the bugle sounds, marches his section to its classroom. On the way he gives his muster report to a cadet officer of the guard. In the meantime, the upperclassmen have reported to their respective classrooms individually.

It is ten minutes before nine, when the first period ends. Cadets are rushing out of all classroom building exits. Some are hurrying to another building for the next class; others with a free period the next hour are heading toward the barracks, the library, or the activities building while discussing with one or two companions the correct answers to the quiz just finished. Inside the buildings, cadets are standing in small groups talking about the class just completed or the one about to be held. For example, business administration juniors and seniors have most of their classes on the third floor of Bond Hall and, therefore, do not go outside between classes. Of course, the discussion may not be about class work at all but about plans for the coming weekend.

During the morning there are four class periods commencing on the hour and lasting 50 minutes each. A normal schedule would give a cadet three classes and one free period during the morning.

Dinner Hour

It is now about 12:05 p.m. The center of activity is again the quadrangles of the four barracks. In approximately five minutes each battalion will have formed and marched to dinner as was done at breakfast.

Let us go to the dining hall and observe. As the cadets reach the entrance, they break ranks and double time into the building cheering as they enter the door, and move rapidly to their assigned tables and chairs. Those cadets you see standing at attention behind their chairs are the plebes waiting until all at their "mess" (group of seven cadets at the same table) are in place and the "mess carver" (senior at the head of the table) directs them to be seated. Grace is pronounced by the regimental commander over the public address system followed by the command, "Rest," the signal to start eating for all but the plebes. Before the plebes may start, the water glasses, coffee cups, or milk glasses of the upperclassmen at the table must be filled. Even then, the plebe must ask permission from the head of his table to have each item on the menu.

If this is a Wednesday, you will likely see steak as the main part of the meal, but regardless of the day, you will observe a good solid meal designed for active, growing young men with large appetites.

It is now time for announcements possibly including a short pep talk by a member of a varsity team. Cadets may not leave their places until the command, "Rest", known as second rest. Then they leave the dining hall and individually head for their barracks. As we linger in the dining hall, we notice a few at each table still eating. These are the plebes probably enjoying a few moments of eating after the upperclassmen have left.

Before we leave, let us go through the completely modern kitchen which is used to prepare three good meals a day for two thousand hungry people.

Afternoon Activities

As we return to the parade ground the scene is similar to that at 8:00 a.m. The cadets are now assembling for their afternoon classes. There are two afternoon class periods between 1 and 3 p.m. Many of the laboratory classes are conducted in this period.

It is now 3 p.m. on a weekday. On the parade ground cadets are practicing military drill. The groups vary in size from an individual cadet improving his manual-of-arms technique to a whole company working on group maneuvers.

If we should go to other parts of the campus, we would see other cadets working on the obstacle course or other features of the physical-training program required of all cadets.

At 4 p.m. the drill practice and physical fitness program is over. The activity on the parade ground now shifts to intramural games — touch-football, volleyball, or softball. At the same time the varsity sports squads are holding their daily practice sessions.

Other cadets will be busy getting news for the school paper, arranging for a yacht club outing, a talent show, attending a meeting of the Standing Hop or Museum Committee or doing any one of many similar activities.

Evening

Supper is just over and we see cadets strolling back to their barracks. Some go by way of Mark Clark Hall to put in a telephone call home or a girl friend. Others get an early start toward the library.

At 7:30, we hear the bugle sound call to quarters. This is evening study period (ESP). At this time, all is quiet on the campus and the sight of all the lights in the four barracks is a brilliant reminder that this is study time.

At 11 p.m. we hear taps, the lights go out, and another day at The Citadel has come to a close.
